SECTION 1

Time—30 minutes

45 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. SUMMON: (A) shorten (B) enclose (C) delight (D) send away (E) pull apart
2. TERMINATE: (A) obey (B) begin (C) assist (D) combine (E) illuminate
3. BLAND: (A) airy (B) golden (C) spicy (D) quick (E) distant
4. DEPLETE: (A) prefer (B) wrinkle (C) restore (D) allow (E) surface
5. BIZARRE: (A) underhanded (B) commonplace (C) sincere (D) polite (E) competitive
6. DISARRAY: (A) contemplation (B) friendliness (C) advocation (D) orderliness (E) happiness
7. RIGOR: (A) laxity (B) secrecy (C) immensity (D) tardiness (E) originality
8. DISTANT: (A) cordial (B) graceful (C) scholarly (D) diligent (E) sizable
9. AUDACITY: (A) justice (B) interior (C) silence (D) usefulness (E) meekness
10. AVARICE: (A) intelligence (B) generosity (C) curiosity (D) hypocrisy (E) guilt
11. RESPLENDENT: (A) brief (B) dim (C) isolated (D) inaudible (E) irrational
12. PROSAIC: (A) imaginative (B) agreeable (C) committed (D) successful (E) descriptive
13. RUMINATE: (A) consider fleetingly (B) shout angrily (C) gaze admiringly (D) speak convincingly (E) advance mincingly
14. PARSIMONY: (A) plainness (B) cowardice (C) prodigality (D) formality (E) punctuality
15. FETID: (A) silent (B) refrigerated (C) solidified (D) animated (E) aromatic

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ---, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. Ballet is known to be ----; once you go, you are likely to find yourself going again and again, loving the performances more each time.

(A) addictive (B) erratic (C) expendable (D) anticlimactic (E) interminable

17. American technology borrowed its ideas and methods from the British Industrial Revolution, but soon the natural ---- of Americans became evident and they quickly outstripped their teachers.

(A) inventiveness (B) stubbornness (C) forgetfulness (D) indifference (E) imitativeness

18. Although they are ---- by traps, poison, and shotguns, predators ---- to feast on flocks of sheep.

(A) lured. .refuse (B) destroyed. .cease (C) impeded. .continue (D) encouraged. .attempt (E) harmed. .hesitate

19. Because even the briefest period of idleness bored and exasperated her, she worked ---- at some project or activity.

(A) constantly (B) reluctantly (C) occasionally (D) cynically (E) languidly

20. Meteors become ---- only after they enter the atmosphere, for it is then that they begin to burn and leave their luminous trails.

(A) incandescent (B) invisible (C) illusionary (D) reflective (E) elemental

1

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

"I should like," said Mrs. Cantlop in her crooning voice (it was always a croon except when it was a wail), "to add my mite of welcome, Mr. Swyndle. And so, if he were here, would Keturah's father." Here Mrs. Cantlop's voice faltered, and Mrs. Velindre eyed her with contemptuous interest.

The gentleman alluded to was Mr. Cantlop. He was not, as might be supposed, defunct. He was, to use his wife's words, "looking for gold in the wickedest place in the world." He had been thus engaged for the past thirty years, but so far there was no indication of his having found any. In their early married life he had set up as a tea merchant at Dormer. He did not make a living. Mr. Darke, a very arbitrary old gentleman, rated him soundly and told him if he couldn't make gold he'd better "go and scrat for it." As Mr. Cantlop afterwards told his wife, "Incompetence was mentioned, and the name of California." It was useless for Mr. Cantlop to say he did not want gold, or for Mrs. Cantlop to say she wanted Mr. Cantlop. Public opinion was too strong for them. They tried to be cheerful.

"My dear," said Mr. Cantlop, "I'll seek it. I'll find it. I'll bring it." He had a gift for terse and energetic expression; but there it usually stopped. Under the stern eye of Mr. Darke the poor little man did really set out with a carpet bag and a red pocket-handkerchief and eyes even redder from the parting with Amelia, and a ticket provided by the rector. Mystery had flung her curtains over his doings after this, though from his yearly letters it was known that he had arrived in California. In these letters he always spoke of the gold as being just at hand. Mrs. Cantlop nearly always alluded to him as "Keturah's father," seeming to feel that his personality, taken alone, was rather misty. Keturah had ceased to exist a few hours after she began her earthly race (during the tea period) so her personality was, at best, doubtful. But taken together, rolled into a ball and shaped by her imagination, they became quite intimidating and attained a kind of ghostly awfulness, a spook-like majesty. With them—or, rather, with it, for Mrs. Cantlop had made out of two nonentities an entity—the timid old lady was even able to enter the lists with autocratic Mrs. Velindre.

21. In the passage, Mr. Cantlop is portrayed most specifically as

(A) ineffectual (B) adventurous (C) discreet (D) shiftless (E) affectionate

22. The narrator suggests that, in addressing Mr. Swyndle, Mrs. Cantlop speaks of her husband as if he were

(A) stupid (B) dead (C) remarkable (D) famous (E) sick

23. The fact that in his letters Mr. Cantlop "always spoke of the gold as being just at hand" (line 34) expresses primarily what aspect of Mr. Cantlop's character?

(A) His defeatism (B) His diligence (C) His faithfulness (D) His optimism (E) His honesty

24. Why did Mrs. Cantlop always speak of her husband as "Keturah's father" ?

(A) She was afraid of Mr. Cantlop's ghost.
(B) It upset her too deeply to say his name.
(C) People could remember Keturah more easily than Mr. Cantlop.
(D) Keturah was more important than Mr. Cantlop in her eyes.
(E) Giving him a distinctive attribute increased his substance.

25. One trait common to all of the members of the Cantlop family described in the passage is

(A) the lack of a strong personality
(B) a financial dependence on others
(C) an active imagination
(D) a thirst for material gain
(E) a fear of Mr. Darke

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

The United States civil rights movement in its most important sense is as old as the introduction of human slavery in the New World. From the beginning, the essential conflict of the civil rights movement was inherent in the contradiction between, on the one hand, the practical economic advantages and social status associated with slavery and racial oppression and, on the other hand, the Judeo-Christian ideals of love and brotherhood and their translation into the democratic ideology of equality and justice. The presence of African slaves, visibly different from their owners in culture and color of skin, intensified this contradiction.

One could read the early history of the United States as an attempt to resolve the conflict by continuing slavery while making grudging concessions to religious and democratic ideology. The effort to try to convert some of the African slaves to Christianity and to teach some to read English could be interpreted as the first "victory" of the civil rights movement, but at the same time it paradoxically intensified the conflict. It would have been more consistent logically to leave the African slaves unconverted and uneducated if they were to be kept in slavery. Even the economic demands of slavery, however, required that the slaves be skilled, adaptable, and efficient. The fact that such skills were being developed called attention to the humanity of the African and the beginning of the end of human slavery in a society committed to social and political democracy.

The dynamics of the contemporary civil rights movement continue to reflect this same struggle between the desire to deny Black people full and unqualified status as human beings and the unquestioned evidence that such denial cannot be based on fact. Once the Civil War and Reconstruction were past, signs of a civil rights renaissance did not emerge until the 1940's, when Black resentment mounted against segregation in the armed services and discrimination in employment. A new period of overt and sustained protest had begun. In 1941, A. Philip Randolph threatened a march on Washington to force President Roosevelt to issue the first executive order compelling fair employment of Black people. Testimony to the depth of the ambivalence of the American nation on civil rights was the fact that Roosevelt, himself generally considered one of the most liberal and farseeing Presidents in United States history, only reluctantly issued this order. This conflict between Roosevelt and Randolph marked the beginning of a new militance and assertiveness on the part of Black people that has been sustained in different ways by different leaders ever since.

26. The first two paragraphs of the passage are primarily concerned with which of the following?

(A) Challenging the value of an established point of view
(B) Drawing conclusions based on newly discovered evidence
(C) Presenting the details of a solution to a problem
(D) Stating reasons why existing conditions must be improved
(E) Discussing the historical foundation of a problem

27. According to the author, an example of the "essential conflict" (lines 3-4) of the United States civil rights movement is the conflict between

(A) Black and White religious beliefs about love and brotherhood
(B) the economic benefits derived from slavery and the cost of teaching slaves skills
(C) the usefulness of cheap labor and the unfairness of human enslavement
(D) Judeo-Christian ideals and the moral ideology of a democratic nation
(E) the need to educate slaves and the religious principles of their owners

28. According to the passage, some citizens early in United States history dealt with the issues of slavery and racial oppression by

(A) arguing that slavery was portrayed in the religious writings of both Jews and Christians and was, therefore, acceptable
(B) depriving slaves of all training in an attempt to prevent their assimilation into society
(C) keeping Black people enslaved but granting them the right to practice the religion of their choice
(D) converting slaves to Christianity and educating them while still attempting to maintain the institution of slavery
(E) denying the humanity of the slaves by claiming that they were unable to learn, to adapt, or to work efficiently

29. The passage suggests that the civil rights movement in the United States was LEAST eventful during which of the following ten-year periods?

(A) 1855-1864 (B) 1865-1874 (C) The 1920's (D) The 1940's (E) The 1960's

30. The passage suggests that A. Philip Randolph's confrontation with President Roosevelt was significant because it

(A) resulted in an executive order ending segregation in the armed forces
(B) represented a turning point in the methods used by those involved in the United States civil rights movement
(C) marked the first time that a Black civil rights leader had dealt personally with a United States President
(D) revealed the willingness of minority groups in the United States to adjust their demands for the good of the nation
(E) offered evidence of the shrewdness and progressiveness of the President of the United States

Select the word or set of words that best completes each of the following sentences.

31. The superficiality of his calmness was --- by the tremor of his hands as he tried to pick up the paper.

(A) intensified (B) betrayed (C) imposed (D) secured (E) unchanged

32. The article claimed that, unlike words, which can be --- context, the essential expressions of music are unchanging, no matter in what musical context they appear.

(A) devoid of (B) transformed by (C) indicative of (D) compatible with (E) unaltered by

33. When the ruthless and authoritarian emperor was overthrown, the act was hailed as a --- of sanity over ---- despotism.

(A) victory. .benign
(B) tyranny. .cruel
(C) celebration. .reasoned
(D) domination. .courageous
(E) triumph. .murderous

34. Polls are so ---- in our society that it is almost impossible to go out in public without being ---- by an opinion-seeker.

(A) impertinent. .solicited
(B) explicit. .manipulated
(C) gratifying. .cajoled
(D) pervasive. .accosted
(E) ominous. .distracted

35. Luard implies that rising state centralization is ---- as well as detestable and, so, nowhere sets out a strategy for ---- it.

(A) unfortunate. .modifying
(B) intriguing. .evaluating
(C) offensive. .opposing
(D) inevitable. .resisting
(E) momentous. .confronting

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep (B) anger : madness (C) smile : amusement (D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. BABBLE : SPEAK :: (A) mutter : hear (B) scribble : write (C) jabber : whisper (D) quibble : ask (E) cuddle : touch

37. FILAMENT : LIGHT BULB ::
(A) meteor : trajectory (B) ashes : fireplace (C) wick : candle (D) food : body (E) thread : cloth

38. SHIN : KNEE :: (A) foot : hip (B) tendon : wrist (C) ear : forehead (D) forearm : elbow (E) knuckle : fist

39. ANTIDOTE : POISON :: (A) fertilizer : irrigation (B) sedative : relaxation (C) lubricant : friction (D) radar : frequency (E) fuel : motion

40. EMBEZZLER : FUNDS :: (A) poacher : game (B) traitor : enemy (C) instigator : disturbance (D) opportunist : luck (E) convict : sentence

41. SAVORY : TASTE :: (A) obnoxious : smell (B) slippery : touch (C) blurred : vision (D) melodious : hearing (E) elusive : memory

42. COMMISERATE : SYMPATHY ::
(A) surrender : hostility (B) confide : suspicion (C) discuss : admiration (D) revere : devotion (E) free : coercion

43. DIN : CACOPHONOUS :: (A) discordance : peaceful (B) silence : continuous (C) drone : monotonous (D) music : staccato (E) sound : harmonious

44. MATERIALISM : OBJECTS ::
(A) plagiarism : ideas
(B) cynicism : falsehood
(C) hedonism : pleasure
(D) liberalism : education
(E) metamorphism : change

45. STUBBORN : VACILLATION ::
(A) poised : embarrassment
(B) subtle : maneuverability
(C) doubtful : concern
(D) hopeful : decisiveness
(E) immune : healthiness

SECTION 2

Time—30 minutes

25 QUESTIONS

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

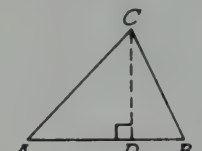

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$

The number of degrees of arc in a circle is 360.

The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

---

1. If $5x - 3 = 2a$, then $\frac{5x-3}{2} =$

(A) $\frac{a}{4}$ (B) $\frac{a}{2}$ (C) a (D) $2a$ (E) $4a$

2. A train traveling 60 miles per hour for 1 hour covers the same distance as a train traveling 30 miles per hour for how many hours?

(A) 3 (B) 2 (C) 1 (D) $\frac{1}{2}$ (E) $\frac{1}{3}$

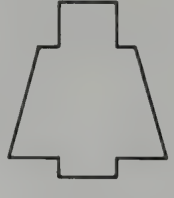

3. The container above has a rectangular base with sides that are perpendicular to the base. If a cut is made along each of the four vertical edges and the sides folded out flat, which of the following patterns results?

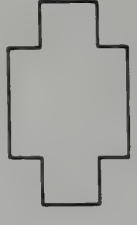

(A)

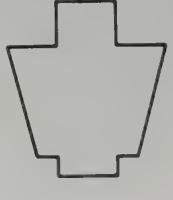

(B)

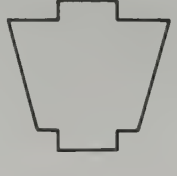

(C)

(D)

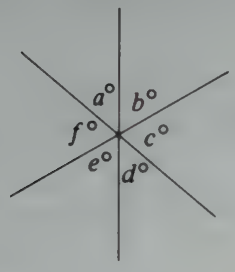

(E)

GO ON TO THE NEXT PAGE

4. What is the sum of 5 consecutive integers if the middle one is 70 ?

(A) 14 (B) 75 (C) 272 (D) 330 (E) 350

5. In the figure above, if the three lines intersect at a point as shown, then $a + b$ must be equal to which of the following?

I. $d + e$
II. $c + f$
III. $e + f$

(A) I only (B) II only (C) III only
(D) II and III only (E) I, II, and III

6. This question was not counted in computing scores.

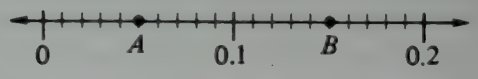

7. On the line above, if $AB < BC < CD < DE$, which of the following must be true?

(A) $AC < CD$
(B) $AC < CE$
(C) $AD < CE$
(D) $AD < DE$
(E) $BD < DE$

8. In a basket of 120 apples, exactly 6 were rotten. What percent of the apples were rotten?

(A) 5% (B) 6% (C) 10%
(D) 20% (E) 25%

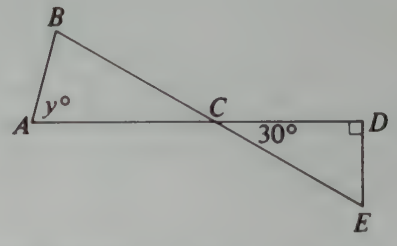

9. In the figure above, what is the length of AB ?

(A) 1.00
(B) 0.50
(C) 0.15
(D) 0.10
(E) 0.05

10. For any sentence J, the expression $N_t(J)$ is defined to mean the number of times the letter "t" appears in J. If J is the sentence "All cats are good luck," then $N_t(J) =$

(A) 0 (B) 1 (C) 2 (D) 3 (E) 4

11. In the figure above, if $BC = CA$, then $y =$

(A) 15
(B) 60
(C) 75
(D) 150
(E) 165

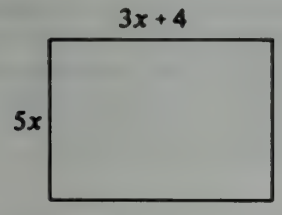

12. If 44 is the average (arithmetic mean) of x, x, x, 35, and 65, then $x =$

(A) 40
(B) 42
(C) 44
(D) 48
(E) 50

13. If a sports outfit consisting of a jacket, slacks, and hat can be made up from any of 3 different jackets, 4 different pairs of slacks, and 2 different hats, then the total number of different such sports outfits possible is

(A) 4 (B) 9 (C) 12 (D) 24 (E) 36

14. What is the perimeter of the rectangle above?

(A) $8x + 4$
(B) $8x + 8$
(C) $15x + 4$
(D) $16x + 4$
(E) $16x + 8$

15. In a relay race, 4 runners each ran 400 meters in 51.0 seconds, 53.2 seconds, 50.8 seconds, and 49.7 seconds, respectively. Their total running time exceeded 3 minutes by how many seconds?

(A) 14.7
(B) 23.3
(C) 24.3
(D) 24.7
(E) 34.7

16. How many shares of stock must be bought at $31\frac{1}{4}$ dollars per share and sold at $31\frac{3}{8}$ dollars per share in order to make a profit of \$100 ? (Ignore fees and taxes.)

(A) 1,000
(B) 800
(C) 400
(D) 80
(E) 40

17. If $x + y = 3$ and $x - y = 5$, then $x^2 - y^2 =$

(A) 4 (B) 8 (C) 15 (D) 16 (E) 64

Questions 18-19 refer to the following definition.

$<x>$ is defined as 1 less than the number of digits in the integer x. For example, $<100> = 3 - 1 = 2$.

18. If x is a positive integer less than 1,000,001, then $<x>$ is at most

(A) 5 (B) 6 (C) 7
(D) 999,999 (E) 1,000,000

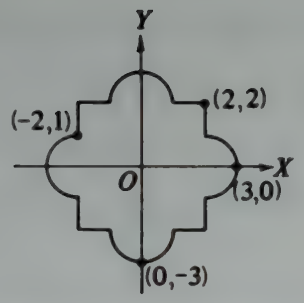

19. If x has 1,001 digits, then what is the value of $<<<x>>>$?

(A) 997
(B) 1
(C) 0
(D) −1
(E) It cannot be determined from the information given.

20. In a lottery, a green ticket costs 2 dollars more than a red ticket and a red ticket costs 2 dollars more than a blue ticket. If 12 blue tickets cost $2x$ dollars, what is the price, in dollars, of 5 green tickets and 7 red tickets?

(A) $2x + 24$
(B) $2x + 34$
(C) $2x + 48$
(D) $12x + 24$
(E) $24x + 34$

GO ON TO THE NEXT PAGE

21. In the figure above, the two axes divide the enclosed region into four regions that have the same size and shape. Of the following, which is closest to the area of the entire enclosed region?

(A) 7 (B) 10 (C) 19 (D) 22 (E) 29

22. At Central High School, the math club has 15 members and the chess club has 12 members. If a total of 13 students belong to only one of the two clubs, how many students belong to both clubs?

(A) 2
(B) 6
(C) 7
(D) 12
(E) 14

23. From which of the following statements must it follow that $x > y$?

(A) $x = 2y$
(B) $2x = y$
(C) $x + 2 = y$
(D) $x - 2 = y$
(E) None of the above

24. The population of Norson, the largest city in Transitania, is 50 percent of the rest of the population of Transitania. The population of Norson is what percent of the entire population of Transitania?

(A) 20% (B) 25% (C) 30%

(D) $33\frac{1}{3}\%$ (E) 50%

25. When 30 gallons of water is poured into a cylindrical tank whose sides are perpendicular to a flat base, the water level rises 0.5 foot. If 7.5 gallons of water occupies 1 cubic foot of space, then the base of the tank has an area of how many square feet? (volume of the tank = height × area of base)

(A) 37.5 (B) 8 (C) 4.5 (D) 4

(E) It cannot be determined from the information given.

40 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. IGNITE: (A) snuff out (B) balance carefully (C) clarify immediately (D) stretch over (E) dig up

2. ABRUPT: (A) safe and familiar (B) slow and gentle (C) good and innocent (D) useful (E) decisive

3. INCOHERENCE: (A) prying, rude questioning (B) clear, orderly expression (C) flattery (D) vigilance (E) permanence

4. CONTEST: (A) deflate (B) insert (C) think positively (D) accept without dispute (E) escape without detection

5. FLAMBOYANT: (A) unfamiliar (B) unappealing (C) plain (D) amusing (E) unkempt

6. TREPIDATION: (A) honesty (B) devotion (C) affluence (D) fearlessness (E) talkativeness

7. SEQUESTER: (A) pacify (B) facilitate (C) discuss angrily (D) ward off danger (E) allow to mingle freely

8. MALINGER: (A) discuss rationally (B) depart angrily (C) listen attentively (D) admit readily (E) perform dutifully

9. NEFARIOUSNESS: (A) hilarity (B) insularity (C) tactfulness (D) wondrousness (E) righteousness

10. COALESCENCE: (A) fragmentation (B) fumigation (C) solubility (D) distortion (E) divulgence

4

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ---, the film itself is intelligent, well-acted, handsomely produced, and altogether ---.

(A) tasteless. .respectable (B) extensive. .moderate
(C) sophisticated. .amateur (D) risqué. .crude
(E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. Although the media has certainly --- its coverage of newsworthy events in the Black community, some Black groups maintain that the quality of this coverage is still ---.

(A) curtailed. .declining
(B) extolled. .excellent
(C) condemned. .dreadful
(D) increased. .inadequate
(E) revived. .unsurpassable

12. He was suddenly thrown into a fit of despair, his faith in himself infirm, his self-confidence ---.

(A) shattered (B) soaring
(C) unassailable (D) inflated (E) delayed

13. Anthropologists have learned that no single one of the tribes could --- the --- of Native American cultures found in the plains, desert, and mountain areas of the West.

(A) reduce. .organization (B) serve. .integrity
(C) emulate. .level (D) approach. .types
(E) represent. .diversity

14. In poetry intended for presentation to large audiences with --- expectations, there can be no place for --- or for strained subtleties of any kind.

(A) emotional. .controversy (B) limited. .candor
(C) political. .duplicity (D) humorous. .levity
(E) unsophisticated. .preciosity

15. Although the more benign advertising slogans are designed merely to sell products and the more insidious are --- that set goals for behavior and achievement, they both serve to interfere with self-acceptance and to --- discontent.

(A) deterrents. .inhibit (B) queries. .suspend
(C) auguries. .challenge (D) mandates. .banish
(E) imperatives. .engender

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. ATOM : MOLECULE :: (A) portrait : masterpiece
(B) electron : void (C) nail : hammer
(D) element : compound (E) vegetable : mineral

17. KNIT : EYEBROWS :: (A) shake : hands
(B) purse : lips (C) walk : legs
(D) stoop : knees (E) squirm : body

18. JUDGE : JUSTICE :: (A) guest : invitation
(B) doctor : hospital (C) actor : entertainment
(D) chef : recipe (E) lawyer : trial

19. MARATHON : ENDURANCE :: (A) race : track
(B) hike : guide (C) hurdle : victory
(D) line : length (E) sprint : speed

20. CONGRATULATION : SUCCESS ::
(A) diligence : wealth (B) immunization : infection
(C) condolence : sorrow (D) envy : fame
(E) responsibility : burden

21. COFFER : VALUABLES :: (A) cistern : water
(B) ocean : tide (C) lawn : grass
(D) asylum : refuge (E) pyramid : stone

22. CIRCUMLOCUTORY : SPEECH ::
(A) humorous : joke (B) meandering : path
(C) tactless : remark (D) successful : attack
(E) logical : conclusion

23. STRUT : OSTENTATIOUS :: (A) vacillate : modest
(B) cringe : servile (C) flinch : indolent
(D) waiver : arrogant (E) sputter : fastidious

24. ASCETIC : SELF-DENIAL :: (A) lunatic : violence
(B) miser : frugality (C) investigator : suspicion
(D) zealot : participation (E) hermit : selfhood

25. READ : PERUSE :: (A) examine : ignore
(B) anticipate : complete (C) express : denounce
(D) free : enclose (E) reprove : condemn

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

Many contemporary cosmologists hold that the universe began in a cataclysmic explosion, or "big bang." Evidence for the initial fireball comes primarily from observations of galaxies out beyond our Milky Way. Kinematic studies of such objects show them to be receding from us at a rate proportional to their distance. That is, those galaxies most distant from us have larger recessional velocities. Now, because of the finite speed with which light (a type of radiation) travels, the most distant objects are seen as they were when the light we receive first left them. These most distant galaxies, having the greatest velocities of expansion, provide us with information about the early universe.

In the past decade, the discovery of a weak hiss of radio radiation has given support to the big-bang model for the origin of the universe. This low-level static, observed coming from every direction in space, is regarded as a cool relic of the initial fireball. At the very beginning, the temperature of the fireball was unimaginably hot. But as the universe expanded to fill a larger volume, it also began to cool. It can be shown mathematically that the remnant of the initial fireball, after about 15 to 20 billion years of expansion, should have cooled substantially to the value now measured isotropically (in all directions) by large radio telescopes.

26. The main point of the passage is to

(A) delineate various theories about the origin of the universe
(B) show how scientists derived the age of the universe
(C) consider one major use of the radio telescope
(D) discuss some evidence for one theory of the origin of the universe
(E) prove the existence of galaxies other than our own

27. In order to support the validity of the big-bang theory, the author utilizes which of the following?

I. Studies measuring the different speeds of various types of radiation
II. The discovery of low-level radio radiation
III. The composition of the initial fireball

(A) I only (B) II only (C) III only
(D) I and II only (E) I, II, and III

28. The tone of the passage can best be described as

(A) inquisitive
(B) argumentative
(C) aggressive and dogmatic
(D) conciliatory and apologetic
(E) instructional and explanatory

4

Writers often become the medium through which the future is forecast. Just like other artists, they are often especially sensitive to the new tendencies at work in the society and are active in disseminating images of new goals. These may kindle in the readers' minds emotional drives that lead to the setting up of new patterns of conduct and new social structures. As the history of literature reminds us, again and again writers have set forth such scathing revelations of the life about them or have created such attractive images of ways of life different from those accepted by their times, that they have helped to introduce new standards, new modes of sensibility, new possibilities of behavior, and new social ideals.

However, the typical conservative fear that literary works may incite young people to rush into all sorts of new and untried modes of behavior is a decidedly unrealistic view. Victorian critics often seemed to believe that the mere reading about particular actions in a book would in itself lead to the performance of the same actions in life. They mistakenly thought of the reader as a blank photographic plate upon which was projected the series of images offered by a literary work. But there are many factors that make the individual reader anything but such a blank photographic plate. In the interplay of forces acting on the individual, the literary work will probably have very little weight if its emphasis is directly opposed to the images that many of the agencies in the society about the reader may be reiterating.

29. In the passage, the author claims that those critics who compare the reader of a literary work to a blank photographic plate are wrong because

(A) the influence of literature is much more subtle than that of the visual arts
(B) the degree of influence exerted by a literary work is determined by the intelligence and prestige of those who read it
(C) not all readers respond to the same stimulus in the same way
(D) the same reader can be as strongly influenced by art and music as by literature
(E) literary influences represent but one of the many influences which combine to shape an individual's actions

30. Which of the following is the most valid comment on the organization of the passage?

(A) The second paragraph contradicts the main idea of the first paragraph.
(B) The second paragraph is an example used to clarify the basic idea of the first paragraph.
(C) The second paragraph qualifies the first paragraph and detracts from the drama of its claims.
(D) The second paragraph reinforces and strengthens the first paragraph.
(E) The second paragraph is only indirectly related to the first paragraph.

31. According to the second paragraph, the typical conservative fear of injurious effects of literature on young people is unrealistic because

(A) literary influences are effective mainly when they reinforce current social trends
(B) much that would have shocked people a hundred years ago is universally accepted today
(C) beneficial influences are at least as common as harmful ones
(D) literary influences are usually too transitory to result in lasting harm
(E) modern adolescents are rarely exposed to the harmful influences that were prevalent in the Victorian era

The most fruitful areas for the growth of the sciences are those neglected areas between the various established fields. Since Leibniz, there has perhaps been no one who has had a full command of all the intellectual activity of the day. Increasingly, science has become the task of specialists, in fields which show a tendency to grow progressively narrower. Yet it is the boundary regions of science which offer the richest opportunities to the qualified investigator. At the same time, these regions are most refractory to the accepted techniques of mass attack and the division of labor.

If the difficulty of a physiological problem is mathematical in essence, ten physiologists ignorant of mathematics will get precisely as far as one physiologist ignorant of mathematics, and no further. However, if a physiologist who knows no mathematics works together with a mathematician who knows no physiology, the one will be unable to state a problem in terms that the other can manipulate, and the second will be unable to put the answers in any form that the first can understand. A proper exploration of these blank spaces on the map of science can only be made by a team of scientists, each a specialist in one field, but each possessing a thoroughly sound and trained acquaintance with the other fields. In addition, all must be in the habit of working together, of knowing one another's intellectual customs, and of recognizing the significance of a colleague's new suggestion before it has taken on a full formal expression. The mathematician need not have the skill to conduct a physiological experiment, but must have the skill to understand one, to criticize one, to suggest one. The physiologist need not be able to prove a certain mathematical theorem, but must be able to describe what is needed to the mathematician.

32. It can be inferred from the passage that the explanation for the lack of successful exploration in the boundary regions of science is the

(A) shortage in all fields of scientific specialists
(B) lack of interest accorded this problem by the public
(C) reluctance of scientists to avail themselves of a humanistic education
(D) suspicion with which specialists view these border areas
(E) inability of research teams as presently organized to solve these problems

33. In general, the passage may be interpreted as urging changes in the

(A) number of specialists who work in science
(B) definition of "boundary region" in science
(C) distinction between mathematics and science
(D) education of scientists for research in the boundary regions
(E) use of mass attack and division of labor in the established fields

34. The author most probably cites the example of Leibniz' comprehensive knowledge of the intellectual life of his time in order to

(A) demonstrate that it is necessary for scientists of today to possess such an understanding
(B) establish Leibniz' reputation as the precursor of the modern scientist
(C) indicate the magnitude of the changes that have occurred since the time of Leibniz
(D) contrast the simplicity of Leibniz' mind with the complexity of that of the contemporary scientist
(E) soften the criticism leveled at modern scientific research methods

35. According to the author, which of the following should an individual member of a research team possess?

I. Sensitivity to the thought processes of colleagues
II. Ability to design experiments in several fields
III. Specialization in one field and a working knowledge of the fields of colleagues

(A) I only (B) II only (C) III only
(D) I and II only (E) I and III only

4

If the origin of art had to wait for somebody's conception of an inner meaning, and on the intention of that person to express it, then our poor addle-brained race would probably never have produced the first artistic creation. We see significance in things long before we know what we are seeing, and it takes some other interest, practical or emotional or superstitious, to make us produce an object which turns out to have expressive virtue as well. We cannot conceive significant form in a vacuum; we can only find it and create something in its image; but when someone has seen the "significant form" in a thing, the copy of that thing is given certain emphasis, not by measure, but by the selective, interpretive power of an intelligent eye.

This insight is not the function of formal education. Apparently the earliest people in most societies have had a vegetative period of artistic activity, as they have had of linguistic and mythological and ritual growth. A pre-Athenian peasant makes a bust of Hermes for the protection of a home and produces a statue of classic beauty. An early Native American carves a totem pole and achieves a composition, or fashions a canoe or molds a water jar and creates a lovely form. The model is the human body, the tree trunk, the curled dry leaf floating, the shell or skull or coconut used for drinking.

But in the imitation of such models for practical ends, those with special vision see more than the utilitarian import of such shapes; they see the reflection of human feeling, the dynamic laws of life, power, and rhythm, in forms on which their attention is focused; they see things they cannot name—magical imports, rightness of line and mass; their hands unwittingly express and even overdraw what they see, and the product amazes and delights them and looks "beautiful." But they do not "know," in discursive terms, what they are expressing, or why they deviate from the model to make the form more "significant." As a society emerges and takes discursive reasoning more seriously, these "artists" try to copy more accurately; and that ambition for naturalistic, literal representation, for rational standards of art, moral interpretations, and so forth, confuses their intuition and endangers their visual apprehension.

36. The implication of the first paragraph is that art is primarily the product of

(A) desire for recognition
(B) self-understanding
(C) exact imitation
(D) reason
(E) intuition

37. Which of the following would be an example of deviating "from the model to make the form more 'significant' " (lines 40-41)?

(A) Exaggerating the whorl shapes in molding a shell-shaped jar
(B) Including several animal or human forms in a single totem pole
(C) Elevating human importance by making gods look like people
(D) Attaching moral significance to the most beautiful object one makes
(E) Covering a canoe frame with birch bark rather than with sealed dry leaves

38. Which of the following assumptions does the author make about art?

(A) Art is dependent on the development of language and ritual for its existence.
(B) Artistic vision is ultimately of less significance than artistic technique.
(C) Art must come purely from a desire to create something beautiful.
(D) Artistic ability is an innate trait.
(E) Beauty should have objective criteria.

39. The central thought of the passage is most clearly expressed in which of the following lines?

(A) 1-5
(B) 5-10
(C) 18-21
(D) 38-41
(E) 41-43

40. Which of the following best describes the author's technique in this passage?

(A) Presenting highly emotional ideas in a cooly detached tone
(B) Discussing art in a patronizing tone while elevating artists
(C) Offering highly intellectual theories in a stridently anti-intellectual tone
(D) Stating facts in an objective tone in order to debunk the mystery of art
(E) Developing reasons for an assertion in a tone that is explanatory yet not pedantic

S T O P

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY.
DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 5

Time—30 minutes

35 QUESTIONS

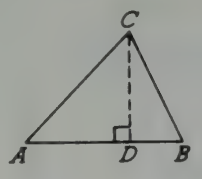

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.
If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

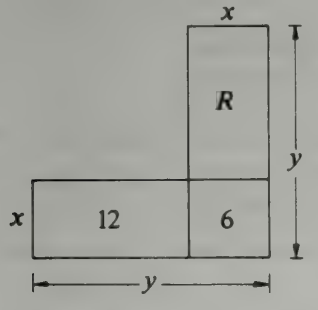

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

---

1. Adding one to which digit of the number 12,345 increases the number by one hundred?

(A) 1
(B) 2
(C) 3
(D) 4
(E) 5

2. In the figure above, if two identical rectangles overlap to form three regions with areas 12, 6, and R, respectively, then $R =$

(A) 6 (B) 12 (C) 15 (D) 18 (E) 24

---

3. A person bought 12 cards for 30 cents. If the next day the price of the cards was 5 cents each, how much did the person save per card by buying at the earlier price?

(A) $2¢$ (B) $2\frac{1}{2}¢$ (C) $3¢$ (D) $3\frac{1}{2}¢$ (E) $5¢$

$$\begin{array}{r} 5\triangle 2 \\ \times \quad 9 \\ \hline 5,2\square 8 \end{array}$$

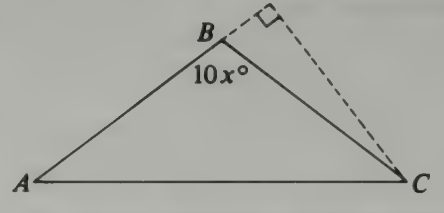

4. In the correctly computed multiplication problem above, if $\triangle$ and $\square$ are different digits, then $\triangle =$

(A) 1 (B) 5 (C) 6 (D) 7 (E) 8

---

5. Of the following, which is greater than $\frac{1}{2}$?

(A) $\frac{3}{7}$ (B) $\frac{4}{9}$ (C) $\frac{5}{11}$ (D) $\frac{7}{13}$ (E) $\frac{8}{17}$

6. In $\triangle ABC$ above, which of the following could be a value of x ?

(A) 12 (B) 8 (C) 4 (D) 2 (E) 1

---

7. Carol has twice as many books as Beverly has. After Carol gives Beverly 5 books, she still has 10 more books than Beverly has. How many books did Carol have originally?

(A) 20 (B) 25 (C) 30 (D) 35 (E) 40

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet blacken space

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

Notes: 1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● ① ② ③
E2.	 $180 - x$	y	① ● ② ③
E3.	$p - q$	$q - p$	① ② ● ③

	Column A	Column B
8.	333,733	$10 \times 33{,}373$

Of the 100 members of a law school class, exactly 55 are women.

9.	Percent of the class members who are men	55%

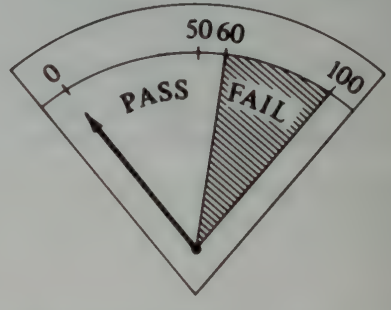

10.	Length FG	$h + k$

A 3-liter bottle of solution P costs \$9.66 and a 4-liter bottle of solution Q costs \$12.88.

11.	The average cost per liter of solution P	The average cost per liter of solution Q
12.	$1 - 0.0001$	$1 - 0.0011$

	Column A	Column B

POLLUTION SCALE

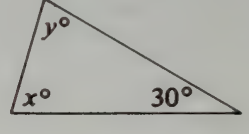

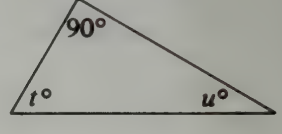

An automobile fails a pollution test if the reading on the meter above is in the shaded region.

13.	The reading for an automobile that has passed the test	65

Rita has more than twice the money that Frank and Lisa have together.

14.	Amount of money Rita has	Three times the amount Lisa has

15.	$x + y$	$t + u$

$$xy = 6$$
$$x^2 + y^2 = 13$$

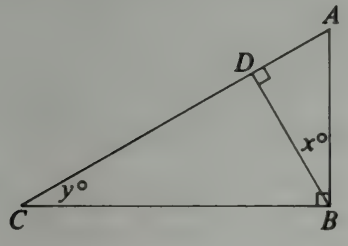

16.	$(x + y)^2$	18

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

	Column A	Column B
	The three-digit number 6 ■ 5 is divisible by 5.	
17.	■	5

18.	x	y

Questions 19-20 refer to the following definition.

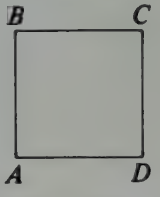

For $x \neq 0$, let (x) be defined by $(x) = x + \frac{1}{x}$.

19.	(-4)	-4
20.	(2)	$\left(\frac{1}{2}\right)$

List A	List B
6	17
13	24
19	11
8	16
14	19

21.	The sum of 3 different numbers from list A	The sum of 3 different numbers from list B

	Column A	Column B
22.	$x(x+y) - z(x+y)$	$(x-z)(x+y)$

In square $ABCD$, X is the midpoint of side CD, and Y is the midpoint of segment AX.

23.	Length AY	Length CY

x is 10% of y.

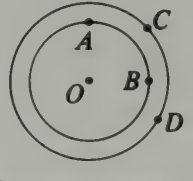

24.	The percent that y is of x	100%

$y^2 - 1 > x^2 - 1$

25.	x	y

S is the sum and k is the average (arithmetic mean) of the consecutive positive integers from 1 to n, inclusive.

26.	S	nk

Note: Figure not drawn to scale.

Minor arcs AB and CD have equal length and each lies on a different circle with center O.

27.	Degree measure of minor arc AB	Degree measure of minor arc CD

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

28. If p is an odd integer, which of the following is an even integer?

(A) $p-2$
(B) p^2
(C) p^2-2
(D) $(p-2)^2$
(E) p^2-p

29. The circle above has center P. Given segments of the following lengths, which is the length of the longest one that can be placed entirely inside this circle?

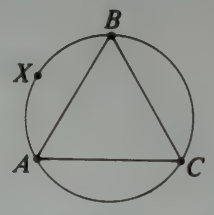

(A) 6.99
(B) 7.00
(C) 7.99
(D) 8.10
(E) 14.00

30. A machine can insert letters in envelopes at the rate of 120 per minute. Another machine can stamp the envelopes at the rate of 3 per second. How many such stamping machines are needed to keep up with 18 inserting machines of this kind?

(A) 9
(B) 12
(C) 15
(D) 24
(E) 27

31. For all numbers x, y, and z, if the operation ϕ is defined by the equation $x \phi y = x + xy$, then $x \phi (y \phi z) =$

(A) $x + xy + xyz$
(B) $x + xyz$
(C) $x + xy + x + xz$
(D) $x + y + yz$
(E) $x + y + xyz$

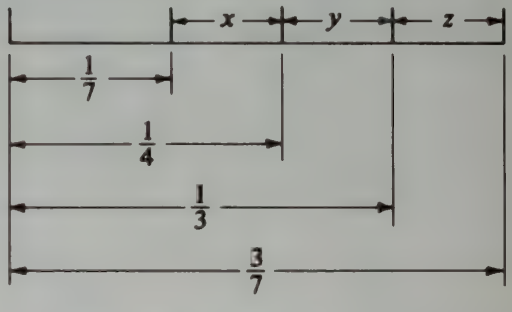

32. In the figure above, inscribed $\triangle ABC$ is equilateral. If the radius of the circle is r, then the length of arc AXB is

(A) $\frac{2\pi r}{3}$ (B) $\frac{4\pi r}{3}$ (C) $\frac{3\pi r}{2}$
(D) $\frac{\pi r^2}{3}$ (E) $\frac{2\pi r^2}{3}$

33. If $x + 2x$ is 5 more than $y + 2y$, then $x - y =$

(A) -5 (B) $-\frac{5}{3}$ (C) $\frac{3}{5}$ (D) $\frac{5}{3}$ (E) 5

Note: Figure not drawn to scale.

34. In the figure above, if x, y, and z are the lengths indicated, what is an arrangement of x, y, and z in order of increasing length?

(A) x, y, z
(B) z, x, y
(C) y, x, z
(D) z, y, x
(E) y, z, x

35. If $(x+y)^2 = x^2 + y^2$, which of the following statements must also be true?

I. $x = 0$
II. $(x-y)^2 = x^2 + y^2$
III. $xy = 0$

(A) None (B) I only (C) II only
(D) III only (E) II and III

†Not scored

*Indicates four-choice questions. (All of the other questions are five-choice.)

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

  $$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

  Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.
- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

You can verify the College Board SAT scores reported to you recently by using the information in this booklet along with the copy of your answer sheet. *Before you begin, check that the first two characters (number and letter) of the form code you marked in item 3 on your answer sheet are the same as the form code printed on the front of this booklet.* Compare the responses shown on the copy of your answer sheet with the list of correct answers.

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on page 122. Enter this figure on the worksheet.

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for *section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on page 122. Enter this figure on the worksheet.

SAT SCORING WORKSHEET

FORM CODE 1E

SAT-Verbal Sections

A. Section 1: _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 4: _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw score (Rounded to nearest whole number) _____ D

E. SAT-verbal reported scaled score (See the conversion table on the back cover.) [ ] SAT-verbal score

SAT-Mathematical Sections

A. Section 2: _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 5: Questions 1 through 7 and 28 through 35 (5-choice) _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal B

C. Section 5: Questions 8 through 27 (4-choice) _____ (no. correct) − ⅓ (_____ no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw score (Rounded to nearest whole number) _____ E

F. SAT-mathematical reported scaled score (See the conversion table on the back cover.) [ ] SAT-math score
