SECTION 1

Time—30 minutes

45 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. MASSIVE: (A) simple (B) quiet (C) small (D) shallow (E) reliable

2. UNSTABLE: (A) inflatable (B) remarkable (C) technical (D) relieved (E) fixed

3. IMPROVE: (A) denounce (B) ruin (C) assess (D) reject (E) despise

4. LOITER: (A) crowd (B) reveal (C) disdain (D) hasten (E) straighten

5. CONFOUND: (A) enlighten (B) excavate (C) agitate (D) enclose (E) pierce

6. APATHY: (A) vagrancy (B) depravity (C) security (D) enthusiastic devotion (E) sudden reluctance

7. EXPENDITURES: (A) actions (B) receipts (C) complaints (D) associations (E) acknowledgments

8. THEATRICAL: (A) unaffected (B) disquieting (C) auditory (D) imprecise (E) satisfying

9. INEXTRICABLE: (A) reasonable (B) durable (C) separable (D) finite (E) appropriate

10. CLEMENCY: (A) foolishness (B) sadness (C) loudness (D) restlessness (E) harshness

11. ADVERSITY: (A) prosperity (B) independence (C) availability (D) sanity (E) versatility

12. TABLE: (A) illustrate clearly (B) consider immediately (C) travel separately (D) trespass (E) guess

13. CAPRICIOUS: (A) feeble (B) scant (C) constant (D) heavy (E) ungainly

14. TRUNCATE: (A) infer (B) vibrate (C) outline (D) lengthen (E) liquefy

15. ACERBIC: (A) dense (B) nearby (C) kindly (D) slow (E) flawed

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. Few people appreciate the irony of a situation in which a flour company removes approximately twenty vitamins from the flour, puts four back, and then touts its product as ----.

(A) inexpensive (B) processed (C) enriched (D) edible (E) novel

17. Because of the dramatic qualities of her voice, a voice too rich for humorous roles, she ---- comedy.

(A) avoided (B) interpreted (C) preferred (D) inspired (E) analyzed

18. Newton gave due credit to his ---- when he said, "If I have seen a little farther than others, it is because I have stood on the shoulders of giants."

(A) disciples (B) opposition (C) progeny (D) predecessors (E) imitators

19. By nature a scholar, this candidate ---- all the rules of the game of politics, disdaining to solicit votes or to cater to powerful groups.

(A) restored (B) evaluated (C) obscured (D) flouted (E) invented

20. Business is not ---- in this economist's view; in fact, he describes it as an intricate ----.

(A) variegated. .collage
(B) moribund. .fiasco
(C) hierarchical. .bureaucracy
(D) prodigious. .achievement
(E) monolithic. .mosaic

1

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

The Circumlocution Office was (as everybody knew without being told) the most important department of the government. No public business of any kind could possibly be done at any time without the acquiescence of the Circumlocution Office. It was equally impossible to do the plainest right and to undo the plainest wrong without the express authority of the Circumlocution Office.

This glorious establishment had been early in the field, when the one sublime principle involving the difficult art of governing a country was first distinctly revealed to the modern mind. It had been foremost to study that bright revelation and to carry its shining influence through the whole of the official proceedings. Whatever was required to be done, the Circumlocution Office was beforehand with all the public departments in the art of perceiving—How Not To Do It.

It is true that How Not To Do It was the great study and object of all public departments and professional politicians all round the Circumlocution Office. It is true that every victorious political party, elected because it had upheld a certain thing as necessary to be done, was no sooner come into office than it applied its utmost faculties to discovering How Not To Do It. All this is true, but the Circumlocution Office went further.

The Circumlocution Office went on mechanically, every day, keeping this wonderful, all-sufficient wheel of statesmanship, How Not To Do It, in motion. The Circumlocution Office was down upon any ill-advised public servants who were going to do it (or who appeared to be, by any surprising accident, in remote danger of doing it) with a memorandum, and a letter of instructions that extinguished them.

This spirit of national efficiency in the Circumlocution Office had gradually led to its having something to do with everything. Mechanics, philosophers, petitioners, people with grievances, people who wanted to prevent grievances, people who couldn't get rewarded for merit, and people who couldn't get punished for demerit—all were indiscriminately tucked up under the Circumlocution Office's mountain of loose papers. Indeed, numbers of people were lost in the Circumlocution Office. Unfortunates who had been wronged, who in slow lapse of time had passed safely through other public departments, got referred at last to the Circumlocution Office and never reappeared in the light of day. Committees met upon them, secretaries minuted upon them, commissioners gabbled about them, clerks registered, checked, and ticked them off, and they melted away. In short, all the business of the country went through the Circumlocution Office, except the business that never came out of it; and that was prodigious.

21. Which of the following titles best describes the passage?

(A) An Objective Record of the Circumlocution Office
(B) How to Use the Circumlocution Office
(C) An Ironic View of a Government Institution
(D) Crimes and Abuses of the New Government
(E) The Development of Modern Political Institutions

22. The style and point of view suggest that the passage is most likely drawn from which of the following sources?

(A) The report of an official of the Circumlocution Office
(B) A carefully researched account by a historian
(C) The diary of a successful politician
(D) A description of a problem by a satiric observer
(E) The formal complaint of an innocent person against the office

23. Which of the following best describes the author's style in the second paragraph?

(A) Comically inflated with superlatives
(B) Highly specific in its examples
(C) Alternately formal and informal
(D) Heavily dependent on personal memories
(E) Direct and immediate in stating an idea

24. The author would most likely view the Circumlocution Office as which of the following?

(A) A brutal monster
(B) A beneficent dictator
(C) A gigantic roadblock
(D) An admirable masterpiece
(E) A ruthless politician

25. The author uses all of the following to support the main point of the passage EXCEPT

(A) repetition of a motto
(B) grandiose language
(C) listing of examples
(D) extensive quotation
(E) exaggeration of fact

GO ON TO THE NEXT PAGE

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

The scene has changed from Florence to Rome, from the city of sharp wits, light feet, graceful movement, to a city of weight, a city that is like a huge compost-heap of human hopes and ambitions, despoiled of its ornament, almost unintelligible, a wilderness of imperial splendor, with the statue of only one ancient emperor, Marcus Aurelius, surviving aboveground in the sunshine through the centuries. The scale has changed. I am standing in the courtyard of the Vatican, at the end of which the architect Bramante has built a sun-trap, known as the Belvedere, from which the pope could enjoy the view of the ancient city. It is in the form of a niche, but instead of being designed to hold a life-size statue it is enormous—in fact it has always been known as *il nicchione*, the monster niche. It is the outward and visible sign of the great change that overcame the civilization of the Renaissance in about the year 1500. This is no longer a world of free and active individuals, but a world of giants and heroes.

In the niche is a bronze pinecone big enough to contain a person. It came from that earlier world of giants, antiquity, and was probably the finial of Hadrian's tomb. But in the Middle Ages it was thought to have marked the point at which the chariots turned in their races round the hippodrome, and since in that hippodrome many Christian martyrs were put to death, it was here that the Christian Church elected to make its headquarters. Huge, cloudy concepts, compared to the sharp focus of Florence. But in Rome they were not so cloudy after all, because the huge buildings of antiquity were there. Even after three centuries in which they were used as quarries, and in which our sense of scale has expanded, they still are surprisingly big. In the Middle Ages people had been crushed by this gigantic scale. They said that these buildings must be the work of demons, or at best they treated them simply as natural phenomena—like mountains—and built their huts in them, as people take advantage of a ravine or sheltering escarpment. Rome was a city of cowherds and stray goats in which nothing was built except a few fortified towers.

But by 1500 the Romans had begun to realize that these ancient buildings had been built by people. The lively and intelligent individuals who created the Renaissance, bursting with vitality and confidence, were not in a mood to be crushed by antiquity. They meant to absorb it, to equal it, to master it. They were going to produce their own race of giants and heroes.

26. The author's main purpose in this passage is best defined as an attempt to show how

(A) the Renaissance languished as it moved from Florence to Rome
(B) those who created the spirit of Renaissance Rome responded to the legacy of ancient Rome
(C) the styles of Renaissance Florence and Renaissance Rome contrasted with each other
(D) historical continuity was maintained between the Middle Ages and the Renaissance
(E) Rome developed from ancient times to the Renaissance

27. The author views the architecture of ancient Rome and of Renaissance Rome primarily as

(A) a record of human thought
(B) a kind of dangerous obsession
(C) a monument to spiritual decadence
(D) a statement of religious faith
(E) an expression of human grandeur

28. The difference between Florence and Rome is seen by the author as most fundamentally one of

(A) cleverness (B) power (C) luxury (D) proportion (E) freedom

29. From the passage as a whole, it can be inferred that the author regards the statue of the Emperor Marcus Aurelius primarily as

(A) a tribute to the final victor in the long and confused struggles of the Roman Empire
(B) an artistic expression of life's perpetual renewal in the sunlight
(C) a happy exception to the decay that befell ancient Rome's symbols of imperial power
(D) the single clue to the otherwise inexplicable history of the Roman Empire
(E) the sole surviving example of ancient Roman greatness in the wasteland of time

30. The author thinks of "*il nicchione*" (line 16) as an outward and visible sign of the change that overcame the civilization of the Renaissance because

(A) its size reflects the tremendous confidence and aspirations of the Romans who lived at that time
(B) its function as a vantage point for the pope symbolized the pope's authority over Romans at that time
(C) it glorified Rome by dramatizing the past history of the city
(D) it reduced other relics of Rome's ancient glory to mere ornaments
(E) its use as a private retreat for the pope showed that life was being lived on a simpler and more personal scale than in ancient Rome

1

Select the word or set of words that best completes each of the following sentences.

31. Although it was once ----, the small piglike animal known as a peccary is found today only in the Western Hemisphere.

(A) domesticated (B) widespread
(C) dwindling (D) primordial
(E) eradicable

32. Researchers are looking for a harmless preservative for cured-meat products to replace nitrites should nitrites be ----.

(A) supplemented (B) studied (C) conserved
(D) publicized (E) banned

33. The passage of the fair housing bill, an important political victory for its supporters, received scant attention from the press even though it was ---- setback for the opposition and, therefore, highly ----.

(A) a minor. .boring
(B) a devastating. .newsworthy
(C) an unusual. .uninteresting
(D) a famous. .discreet
(E) an inconsequential. .readable

34. Interestingly, few of the statues of Queen Victoria that were erected displayed attributes so ---- as feet.

(A) utopian (B) mundane (C) esoteric
(D) chimerical (E) resplendent

35. His habitual ---- had seemingly left its imprint on both his physique and speech, the one lean, the other ----.

(A) puritanism. .indecent
(B) duplicity. .guileless
(C) frugality. .laconic
(D) debauchery. .bombastic
(E) loquacity. .refined

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. AUTOBIOGRAPHY : AUTHOR ::
(A) autograph : signature
(B) self-sufficiency : provision
(C) automation : worker
(D) self-portrait : artist
(E) autopsy : doctor

37. CUMULUS : CLOUD :: (A) lake : ocean
(B) carnivore : meat (C) glacier : blizzard
(D) evergreen : tree (E) evening : daylight

38. PATTER : RAIN :: (A) rainbow : storm
(B) call : telephone (C) clank : chain
(D) volume : radio (E) eruption: volcano

39. SOLITUDE : RECLUSE ::
(A) attention : exhibitionist
(B) courtesy : braggart
(C) poverty : donor
(D) abuse : official
(E) persecution : director

40. METICULOUS : DETAIL :: (A) tidy : order
(B) wicked : morality (C) memorable : facts
(D) uninformed : events (E) jovial : smile

41. FETTER : MOBILITY ::
(A) nourish : appetite (B) enfeeble : strength
(C) soothe : composure (D) distract : ignorance
(E) fortify : reconnaissance

42. INDECIPHERABLE : DECODED ::
(A) enfranchised : voted
(B) anarchical : reprimanded
(C) irrefutable : disproved
(D) prodigal : returned
(E) infamous : known

43. AUTHORITARIAN : DISCIPLINE ::
(A) heckler : sincerity
(B) pragmatist : utility
(C) glutton : abstinence
(D) polemicist : conciliation
(E) infiltrator : purity

44. EXHORTATION : ENCOURAGE ::
(A) eulogy : condemn (B) tirade : reproach
(C) conversation : debate (D) lecture : ramble
(E) sermon : praise

45. DISCERNING : NUANCES ::
(A) hypocritical : motives (B) brave : decisions
(C) artless : possessions (D) slothful : results
(E) sensitive : slights

S T O P

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY.
DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 2

Time—30 minutes

25 QUESTIONS

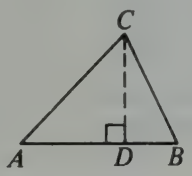

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.
If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

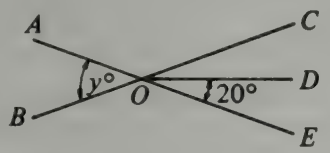

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

---

1. If $x + y = 9$, then $2x + 2y =$

(A) 3 (B) $\frac{9}{2}$ (C) 18 (D) 36 (E) 81

2. In the figure above, if segments BC and AE intersect at O and segment OD bisects $\angle COE$, then $y =$

(A) 10 (B) 20 (C) 30 (D) 40 (E) 60

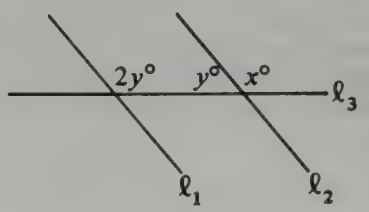

---

3. If the cost of a pound of peanuts is $\frac{1}{2}$ the cost of a pound of walnuts, and walnuts cost \$2.40 per pound, what is the total cost of 1 pound of peanuts and $\frac{1}{2}$ pound of walnuts?

(A) \$1.20
(B) \$1.80
(C) \$2.40
(D) \$3.60
(E) \$4.80

4. For all $n \neq 0$, $n \times \frac{1}{n} =$

(A) 0 (B) 1 (C) n (D) $\frac{n^2+1}{n}$ (E) $\frac{1}{n^2}$

Note: Figure not drawn to scale.

5. If $\ell_1 \parallel \ell_2$ in the figure above, what is the value of x?

(A) 60 (B) 90 (C) 100 (D) 120 (E) 150

GO ON TO THE NEXT PAGE

6. The set T consists of all multiples of 3, that is, $T = \{\ldots, -9, -6, -3, 0, 3, 6, 9, \ldots\}$. If the integers a and b are in T, all of the following must be in T EXCEPT

(A) ab

(B) $a + b$

(C) $a - b$

(D) $-a - b$

(E) $\frac{a}{b}$

7. If a team received 45 points out of a total of 60 points, what percent of the total number of points did it receive?

(A) 65%
(B) 70%
(C) 75%
(D) 80%
(E) 85%

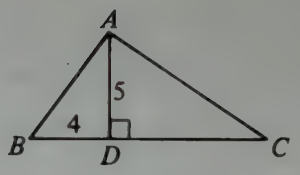

8. If X, Y, and Z indicate numbers on the number line as shown in the figure above, then the average (arithmetic mean) of X, Y, and Z is

(A) between 0 and X
(B) between X and Y
(C) equal to Y
(D) between Y and Z
(E) greater than Z

---

9. Bob bought a total of 40 feet of tubing, some of which was copper and some of which was brass. If both types of tubing sell for \$1.50 per foot and Bob spent a total of \$60 for his purchase, how many feet of copper tubing did he buy?

(A) 10
(B) 15
(C) 20
(D) 30
(E) It cannot be determined from the information given.

10. If the area of $\triangle ABC$ in the figure above is 30, then the length of DC is

(A) 2 (B) 4 (C) 6 (D) 8 (E) 12

---

11. If $40 \cdot 20{,}000 = 8 \cdot 10^x$, then $x =$

(A) 4
(B) 5
(C) 6
(D) 7
(E) 8

INCOME FOR THE EXCEL COMPANY

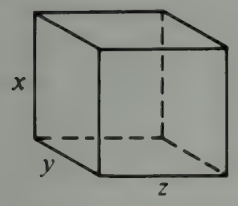

January to April, 1980

January	+ \$4,700,000
February	- \$4,000,000
March	+ \$5,300,000
April	+ \$2,000,000

12. Based on the table above, the average (arithmetic mean) monthly income from January to April, inclusive, for the Excel Company was

(A) \$2,000,000
(B) \$3,000,000
(C) \$3,500,000
(D) \$4,000,000
(E) \$4,100,000

GO ON TO THE NEXT PAGE

Note: Figure not drawn to scale.

13. In the figure above, x, y, and z are the dimensions of the rectangular solid and each of these dimensions is an integer greater than 1. Each of the the following could be the volume of the rectangular solid EXCEPT

(A) 8 (B) 12 (C) 24 (D) 27 (E) 69

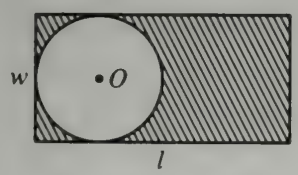

---

14. If 2 more than x is 3 more than y, what is x in terms of y?

(A) $y+1$
(B) $y+2$
(C) $y+3$
(D) $y+4$
(E) $y+5$

15. If p, q, r, s, and t are consecutive integers such that $p<q<r<s<t$ and $p+t=0$, what is the value of r?

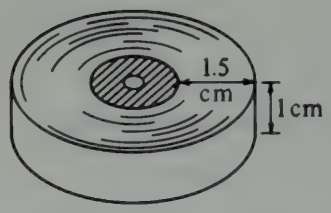

(A) 3
(B) 2
(C) 1
(D) 0
(E) It cannot be determined from the information given.

16. In the figure above, a circle with center O touches three sides of a rectangle of length l and width w. Which of the following gives the area of the shaded region?

(A) $\frac{\pi w^2}{4}$ (B) $lw - 2\pi w$ (C) $lw - \pi w^2$

(D) $lw - \frac{\pi w^2}{2}$ (E) $lw - \frac{\pi w^2}{4}$

17. In the figure above, tape 1.0 centimeter wide and 0.005 centimeter thick is tightly wrapped around a spool until 1.5 centimeters has been added to the radius of the spool. Approximately how many times is the tape wrapped around the spool?

(A) 33 (B) 150 (C) 300
(D) 333 (E) 3,000

---

18. Of the 45 students in a room, the ratio of girls to boys is 2 to 3. How many girls are in the room?

(A) 18
(B) 20
(C) 27
(D) 30
(E) 33

GO ON TO THE NEXT PAGE

Questions 19-20 refer to the following definition.

For all integers x,

$\textcircled{x} = x$ if x is positive or zero and

$\textcircled{x} = x + 1$ if x is negative.

19. $\textcircled{18} + \textcircled{-18} =$

(A) -1
(B) 0
(C) 1
(D) 2
(E) 36

20. The solution set for $\textcircled{x} + 2 = \textcircled{x + 2}$ is the set of all integers x such that

(A) $x = 0$
(B) $x \geqq 0$
(C) $x \leqq -2$
(D) $x \leqq -3$ or $x \geqq 0$
(E) $x \neq 0$

---

21. If $x < -1$, then

(A) $x < x^2 < x^3$
(B) $x < x^3 < x^2$
(C) $x^2 < x^3 < x$
(D) $x^3 < x < x^2$
(E) $x^3 < x^2 < x$

22. Bill has savings of s dollars that earn no interest. If he earns k dollars per week, spends p dollars per week where $p > k$, and makes up the shortage from s, how many weeks will his savings last?

(A) $\frac{s}{p-k}$ (B) $\frac{p-k}{s}$ (C) $\frac{p-s}{k}$

(D) $\frac{s}{k-p}$ (E) $\frac{s-k}{p}$

Note: Figure not drawn to scale.

23. In the figure above, $\frac{AB}{BC} = \frac{3}{4}$ and $\frac{BC}{CD} = \frac{3}{5}$. If $AD = 82$, then $AB =$

(A) $\frac{41}{6}$

(B) 12

(C) 18

(D) 24

(E) 40

---

24. If $a = x + \frac{1}{3} = \frac{x+2}{3}$, then $a =$

(A) $\frac{1}{2}$

(B) $\frac{2}{3}$

(C) $\frac{3}{4}$

(D) $\frac{4}{5}$

(E) $\frac{5}{6}$

25. If the circumference of circle R is 2π inches longer than the circumference of circle Q, the radius of R is how many inches longer than the radius of Q?

(A) $\frac{1}{2\pi}$ (B) 1 (C) $\frac{4}{\pi}$ (D) 2 (E) 2π

SECTION 4

Time—30 minutes

40 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. SECONDHAND: (A) essential (B) plain (C) public (D) busy (E) new

2. FLOURISH: (A) repeat (B) decay (C) creep (D) hurl suddenly (E) sail gracefully

3. IMMUNITY:
   (A) allowance for error
   (B) need for supervision
   (C) change of direction
   (D) lack of resistance
   (E) desire for improvement

4. RESOURCEFUL: (A) grateful (B) hopeful (C) impressionable (D) unlikely to occur (E) unable to cope

5. FACILITATE: (A) intensify (B) mobilize (C) decline (D) complicate (E) meditate

6. FITFUL: (A) brittle (B) original (C) awkward (D) constant (E) recognizable

7. VIABLE: (A) affiliated (B) prevalent (C) easy to annoy (D) incapable of development (E) difficult to express

8. STRIDENCY: (A) accuracy (B) misfortune (C) urgency (D) kindness to strangers (E) soothing tone

9. VILIFICATION: (A) reliable performance (B) need for assistance (C) high praise (D) rapid recovery (E) lack of variety

10. ENDEMIC: (A) alien (B) bloated (C) energetic (D) virulent (E) angelic

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ---, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. Far from being mere replicas of seventeenth-century African culture, Maroon societies have continually developed as their members have ---- the artistic heritage bequeathed by their ancestors, adapting it creatively to their changing lives.

    (A) confused (B) invented (C) repressed (D) denied (E) modified

12. Political experts believe that the prime minister's defeat in the election is ---- because even his own party finds his stance ----.

    (A) plausible. .justified
    (B) inevitable. .insupportable
    (C) avoidable. .objectionable
    (D) uncertain. .trivial
    (E) sure. .popular

GO ON TO THE NEXT PAGE

4

13. Specialization has been emphasized to such a degree that some students ---- nothing that is ---- to their primary area of interest.

(A) ignore. .contradictory
(B) incorporate. .necessary
(C) recognize. .fundamental
(D) appreciate. .relevant
(E) value. .extraneous

14. In order to be sold to worldwide television, a movie should be ----; that is, it should neither use strong language nor tackle a controversial theme.

(A) didactic (B) innocuous (C) illustrative (D) derivative (E) spurious

15. The composer's works were never original; they were merely ---- of other composers' music.

(A) a pastiche
(B) a privation
(C) a determinant
(D) an insurgence
(E) a repudiation

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep (B) anger : madness (C) smile : amusement (D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. BARK : TREE :: (A) skin : fruit (B) dew : grass (C) seed : flower (D) peak : hill (E) wake : boat

17. EXCERPT : BOOK :: (A) type : page (B) script : play (C) solo : routine (D) clip : film (E) drama : musical

18. PIROUETTE : DANCER :: (A) touchdown : referee (B) motivation : coach (C) somersault : acrobat (D) model : sculptor (E) rink : skater

19. HARBOR : SAFETY :: (A) quicksand : security (B) music : disturbance (C) prison : confinement (D) restaurant : starvation (E) oasis : thirst

20. BLUEPRINT : BUILDING :: (A) receipt : money (B) symphony : concert (C) map : automobile (D) briefcase : lawyer (E) agenda : meeting

21. GULLY : EROSION ::
(A) drought : precipitation (B) mine : excavation (C) clot : dispersion (D) forest : cultivation (E) water : inundation

22. REPREHENSIBLE : BLAME ::
(A) virtuous : isolation
(B) enviable : restriction
(C) disrespectful : honor
(D) trustworthy : confidence
(E) questionable : ignorance

23. MORTIFY : EMBARRASS :: (A) unleash : abandon (B) overlook : recognize (C) tease : compliment (D) laugh : amuse (E) rout : defeat

24. BLUNTNESS : HONING ::
(A) leakiness : caulking
(B) sloppiness : skipping
(C) monotony : rehearsing
(D) maturity : developing
(E) brightness : polishing

25. APOCRYPHAL : AUTHENTICATION ::
(A) ridiculous : familiarity
(B) detrimental : intention
(C) mystical : intolerance
(D) dogmatic : impatience
(E) profane : sanctity

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

When lung disease frustrates the intake of oxygen, the bone marrow makes up for the shortage by increasing the production of new red blood cells and releasing them into the circulatory system to transport whatever oxygen is available to the various areas of the body. Patients with chronic bronchitis and emphysema, for example, often have as many as eight million red blood cells per cubic millimeter of blood, as opposed to the five million found in normal blood.

A shortage of atmospheric oxygen produces the same biological effect. At high altitudes, respiration automatically deepens in the attempt to compensate for the smaller amount of oxygen contained in each normal breath. This adaptation, however, is relatively inefficient: the extra muscular effort consumes so much oxygen that it tends to defeat its own purpose. The body, therefore, must undertake a more rewarding form of acclimatization and, after a few weeks, the blood begins to show a recognizable increase in the number of circulating red blood cells. Thus, it is not unusual to see a new arrival in the Andes who has formerly lived at a low altitude prostrated by breathlessness, while local inhabitants are able to do heavy work without any sign of respiratory distress. The high blood count of the inhabitants is an expression of furiously energetic activity on the part of the bone marrow.

26. According to the passage, the first response of an individual to a shortage of atmospheric oxygen is
    (A) a surge of activity in the bone marrow
    (B) an increase in respiratory intake
    (C) an increase in the number of respiratory passages
    (D) an increase in the growth rate of muscle cells
    (E) an increase in the blood cell count

27. Which of the following statements about deeper-than-normal breathing is supported by the passage?
    (A) It enables the lungs to acclimatize to high altitudes.
    (B) It satisfactorily compensates for oxygen deficiency.
    (C) It is a largely self-defeating response to oxygen deficiency.
    (D) It is a characteristic of inhabitants of mountainous regions.
    (E) It stimulates bone marrow activity.

28. It can be inferred from the passage that bronchitis patients suffer from a lack of oxygen because
    (A) they cannot adapt their breathing to their environment
    (B) they have poor blood circulation
    (C) their blood cell count is below normal
    (D) their lungs do not function properly
    (E) their bone marrow is inactive

A supernova, the catastrophic explosion of a massive star, is believed to occur in a galaxy about twice a century. The last supernova visible from the Earth in our own galaxy was seen in 1604, five years before the telescope was used for celestial observation. Since thousands of galaxies are visible from the Earth with large telescopes, however, on the average one may expect to see a supernova in one galaxy or another once every few months. Indeed, in observatories around the world there are astronomers monitoring the sky for the appearance of such stellar explosions in distant galaxies—explosions that for a few weeks may outshine all the rest of a galaxy's billions of stars combined.

Nearly 400 extragalactic supernovas have been observed over the past 90 years. Such observations have helped to make it possible to develop a complete picture of the life cycle of stars. It is believed by most astrophysicists that a supernova is a violent explosion that disrupts a star and ends its life as a normal star. Some supernovas may leave behind cosmic ashes in the form of a neutron star or a black hole. It has also been suggested that the tremendous heat and pressure generated in the explosion synthesize new elements and then expel them into the interstellar gas of a galaxy and that perhaps supernovas are the origin of the cosmic rays that steadily bombard the Earth. It has been imagined further that the energy released by the supernovas is somehow related to such exotic and powerful extragalactic energy emitters as the Seyfert galaxies and the quasars.

29. According to the passage, all of the following are true of supernovas EXCEPT that they

(A) are sometimes visible without a telescope
(B) have only recently begun to occur
(C) are extraordinarily bright
(D) represent an explosion of some type
(E) produce great amounts of heat

30. According to the passage, we could expect a supernova to occur within our galaxy

(A) once every month or two
(B) hundreds of times a century
(C) at least twice every decade
(D) about once every fifty years
(E) once every other century

31. Which of the following questions does the passage answer?

(A) When did the first supernova occur?
(B) What is the normal life cycle of a star?
(C) What characteristics do scientists associate with supernovas?
(D) What causes a supernova to develop into a neutron star?
(E) How do scientists determine the next star that will become a supernova?

32. Which of the following assessments of the state of scientific knowledge about supernovas and their effects can be inferred from the passage?

(A) The crucial facts about the effects have been clearly established.
(B) Further study of supernovas will yield little additional information.
(C) Recent studies have employed questionable methodology.
(D) Today's scientists know little more about supernovas than did their predecessors.
(E) Many theories are still of speculative nature.

The subject of my study is women who are initiating social change in a small region in Texas. The women are Mexican Americans who are, or were, migrant agricultural workers. There is more than one kind of innovation at work in the region, of course, but I have chosen to focus on three related patterns of family behavior.

The pattern I life-style represents how migrant farm workers of all nationalities lived in the past and how many continue to live. I treat this pattern as a baseline with which to compare the changes represented by patterns II and III. Families in pattern I work on farms year round, migrating for as many as ten months each year. They work and travel in extended kin units, with the eldest male occupying the position of authority. Families are large—eight or nine children are not unusual—and all members are economic contributors in this strategy of family migration.

Families in pattern II manifest some differences in behavior while still maintaining aspects of pattern I. They continue to migrate but on a reduced scale, often modifying their schedules of migration to allow children to finish the school year. Parents in this pattern often find temporary local jobs as checkers or clerks to offset lost farming income. Pattern II families usually have fewer children than do pattern I families.

The greatest amount of change from pattern I, however, is found in pattern III families, who no longer migrate at all. Both parents work full time in the area and have an average of three children. Children attend school for the entire school year. In pattern III, the women in particular create new roles for themselves for which no local models exist. They not only work full time but may, in addition, return to school. They also assume a greater responsibility in family decisions than do women in the other patterns. Although these women are in the minority among residents of the region, they serve as role models for others, causing ripples of change to spread in their communities.

New opportunities have continued to be determined by preexisting values. When federal jobs became available in the region, most involved working under the direction of female professionals such as teachers or nurses. Such positions were unacceptable to many men in the area because they were not accustomed to being subordinate to women. Women therefore took the jobs, at first, because the income was desperately needed. But some of the women decided to stay at their jobs after the family's financial distress was over. These women enjoyed their work, its responsibility, and the companionship of fellow women workers. The steady, relatively high income allowed their families to stop migrating. And, as the efficaciousness of these women became increasingly apparent, they and their families became even more willing to consider changes in their lives that they would not have considered before.

33. Which of the following titles best reflects the main focus of the passage?

(A) A Study of Three Mexican-American Families at Work in Texas
(B) Innovative Career Women: Effects on Family Unity
(C) Changes in the Life-styles of Migrant Mexican-American Families
(D) Farming or Family: The Unavoidable Choice for Migrant Farm Workers
(E) Recent Changes in Methods of Farming in Texas

34. According to the passage, pattern I families are characterized by which of the following?

(A) Small numbers of children
(B) Brief periods of migrant labor
(C) Female figures of family authority
(D) Commercial as well as agricultural sources of income
(E) Parents and children working and traveling together

35. All of the following statements about pattern II children express differences between them and pattern I children EXCEPT:

(A) They migrate for part of each year.
(B) They have fewer siblings.
(C) They spend less time contributing to family income.
(D) They spend more months in school.
(E) Their parents sometimes work at jobs other than farming.

36. According to the passage, which of the following is NOT true of women in pattern III families?

(A) They earn a reliable and comparatively high income.
(B) They continue to work solely to meet the urgent needs of their families.
(C) They are more involved in the deciding of family issues than they once were.
(D) They enjoy the fellowship involved in working with other women.
(E) They serve as models of behavior for others in the region.

37. The author's attitude toward the three patterns of behavior mentioned in the passage is best described as one of

(A) great admiration
(B) grudging respect
(C) unbiased objectivity
(D) dissatisfaction
(E) indifference

4

Human beings are consistent in their codes of honor but endlessly fickle in deciding to whom these codes apply. The genius of human sociability is in fact the ease with which alliances are formed, broken, and reconstituted, always with strong emotional appeals to rules believed to be absolute. The important distinction today, as it appears to have been since the Ice Age, is between the in-group and the out-group, but the precise location of the dividing line is shifted back and forth with ease. Professional sports thrive on the durability of this basic phenomenon. For a few hours the spectators can resolve their world into an elemental physical struggle between tribal surrogates. The athletes come from everywhere and are sold and traded on an almost yearly basis. The teams themselves are sold from city to city. But it does not matter; the fan identifies with an aggressive in-group, admires teamwork, bravery, and sacrifice, and shares the exultation of the victors.

Nations play by the same rules. During the past thirty years geopolitical alignments have changed from a confrontation between the Axis and the Allies to one between the communist world and the free world, then to oppositions between largely economic blocs. The substance matters little, the form is all.

38. A main point of the passage is that

(A) the adversarial relations between groups are artificial and changeable
(B) the practice of trading and selling players belies the sporting spirit
(C) people no longer find it possible to believe in codes of honor
(D) nations are able to resolve their differences through surrogates
(E) people no longer need to distinguish between opposing social forces

39. According to the author, human alliances are most notable for their

(A) durability (B) destructiveness
(C) uselessness (D) fluidity (E) hypocrisy

40. It can be inferred that the author considers the kind of human fickleness described in the passage to be a sign of

(A) immorality (B) benevolence
(C) indecisiveness (D) apathy
(E) adaptability

S T O P

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY.
DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 5

Time—30 minutes

35 QUESTIONS

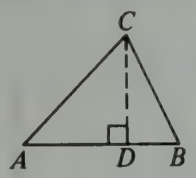

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.
If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

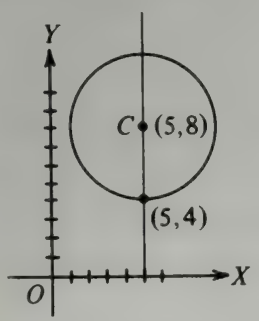

---

1. $\left(\dfrac{7}{15} \cdot \dfrac{9}{14}\right) \div \dfrac{9}{10} =$

(A) $\frac{1}{6}$ (B) $\frac{1}{3}$ (C) $\frac{1}{2}$ (D) $\frac{3}{5}$ (E) $\frac{2}{3}$

2. If a man's age now is n years, then in terms of n, how many years old will he be 5 years from now?

(A) $5 - n$ (B) $n + 5$ (C) $\dfrac{5}{n}$
(D) $n - 5$ (E) $5n$

3. In the figure above, what is the circumference of the circle with center C?

(A) 2π (B) 4π (C) 5π (D) 8π (E) 10π

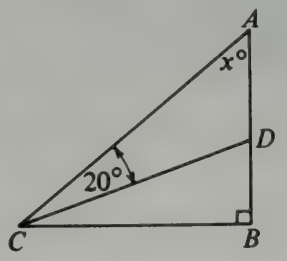

---

4. What are all values of x for which $x(x-3) = 0$?

(A) 0 (B) 3 (C) 0, −3
(D) 0, 3 (E) 0, 3, −3

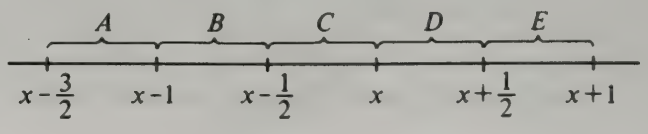

5. Seven children start to count off "one, two, three, four" in a game. Each child who calls "four" drops out and the next child starts over at "one." Rosa starts the counting. At which of her calls will Rosa drop out?

(A) Second (B) Third (C) Fourth
(D) Fifth (E) Sixth

6. In right $\triangle ABC$ above, if CD is the bisector of $\angle ACB$, then $x =$

(A) 15 (B) 20 (C) 25 (D) 40 (E) 50

7. The fraction $\dfrac{3x-1}{3}$ falls in which lettered region on the number line above?

(A) A (B) B (C) C (D) D (E) E

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet blacken space

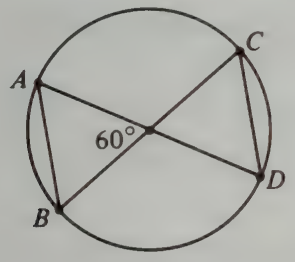

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

Notes: 1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● Ⓑ Ⓒ Ⓓ
E2.	 $180 - x$	y	Ⓐ Ⓑ ● Ⓓ
E3.	$p - q$	$q - p$	Ⓐ Ⓑ Ⓒ ●

	Column A	Column B
8.	$10^6 - 2^6$	$10^6 - 3^6$
9.	The number of seconds in a half hour	1,800
	$y = 2x$ and $x \neq 0$	
10.	$2x - y$	$2xy$

AD and BC intersect at the center of the circle.

11.	Length of chord AB	Length of chord CD

	Column A	Column B
	$x < 0$	
12.	$\sqrt{x^2 + 1}$	$\sqrt{x^2}$
13.	Twice an even integer greater than 5	Three times an even integer greater than 2
	x and y are positive integers less than 10.	
14.	$x - y$	9

Parallel lines ℓ_1 and ℓ_2 are intersected by line ℓ_3.

15.	a	$180 - b$
	$2x - 7 = 13$	
16.	$2x + 7$	21

A film cartoon is shown at the rate of 24 frames per second.

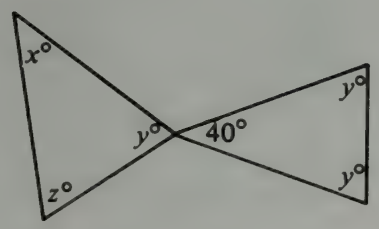

17.	The number of frames used for a 6-minute cartoon shown at this rate	8,640

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

Column A Column B

Note: Figure not drawn to scale.

18. x 65

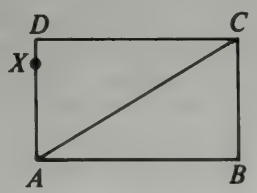

Questions 19-20 refer to the following definitions.

For all nonzero numbers x and y, let $x \circ y = \frac{x}{y}$ and $x \triangle y = \frac{y}{x}$.

19. $3 \circ 2$ $3 \triangle 2$

$z \neq 0$

20. $1 \circ z$ $1 \triangle z$

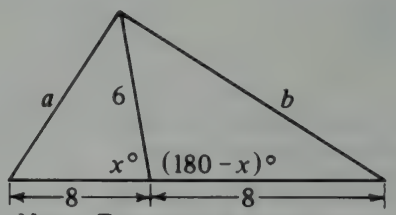

Rectangle $ABCD$

21. Length of diagonal AC Length of a line segment from X to a point Y (not shown) on segment BC.

---

22. $\dfrac{1}{\frac{3}{2} - 1}$ $\frac{3}{2} - 1$

Column A Column B

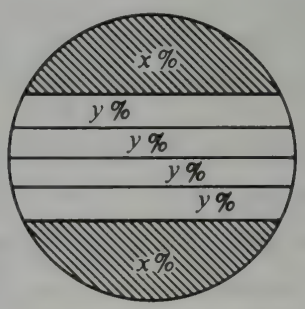

Note: Figure not drawn to scale.

23. a b

$x = \frac{2}{3}r,\ r = \frac{12}{5}y,\ y = \frac{5}{2}z$

24. x $4z$

$2x\%$ of the circle is shaded and $4y\%$ is unshaded.

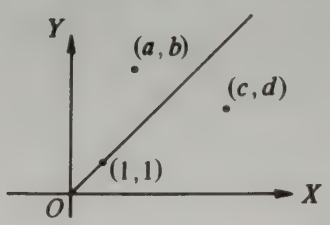

$x > 30$

25. y 10

---

x and y are positive integers.

26. $(3^x)^y$ $3^x \cdot 3^y$

27. $\frac{b}{a}$ $\frac{d}{c}$

GO ON TO THE NEXT PAGE

5

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

28. If $3x + 2y = 17$ and x and y are positive integers, then y could equal which of the following?

(A) 2
(B) 3
(C) 4
(D) 5
(E) 6

29. If a six-sided polygon has 3 sides of length $x + y$ each and 3 sides of length $x - y$ each, what is its perimeter?

(A) $3x$ (B) $3y$ (C) $6x$
(D) $6y$ (E) $6x - 6y$

30. If $\frac{11k}{4}$ is an integer, then k could be any of the following EXCEPT

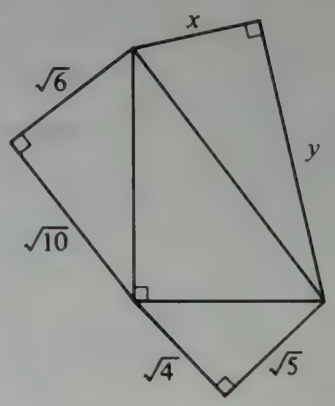

(A) −96
(B) −28
(C) 0
(D) 4
(E) 6

31. On the first day of a sale, a store owner sold $\frac{1}{2}$ of the television sets in stock. After 3 sets were sold on the second day, $\frac{2}{5}$ of the original number of sets remained. How many sets were in stock before the sale?

(A) 10
(B) 20
(C) 30
(D) 40
(E) 50

32. If $\frac{y+x}{y} = 2$ and $\frac{z+x}{z} = 3$, what is the value of $\frac{y}{z}$?

(A) $\frac{5}{2}$
(B) 2
(C) $\frac{3}{2}$
(D) 1
(E) $\frac{2}{3}$

33. In the figure above, $x^2 + y^2 =$

(A) 5 (B) 7 (C) 25 (D) 80 (E) 625

---

34. The longest of 4 rods of unequal lengths is 70 centimeters and the shortest is 50 centimeters. If x centimeters is the average (arithmetic mean) length of the 4 rods, which of the following indicates all possible values of x and only those possible values?

(A) $50 < x < 70$
(B) $51 < x < 69$
(C) $54 < x < 64$
(D) $55 < x < 65$
(E) $59 < x < 61$

35. A "word" is defined as a sequence of three dots arranged in a row. Each dot is colored either red or green. Two such "words" are said to be different if at least one pair of corresponding dots has different colors, for example, if the second dot of one sequence is colored red and the second dot of the second sequence is colored green. How many different "words" can be formed?

(A) 3
(B) 5
(C) 6
(D) 8
(E) 9

*Indicates four-choice questions. (All of the other questions are five-choice.)

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

$$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

  Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.
- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

You can verify the College Board SAT scores reported to you recently by using the information in this booklet along with the copy of your answer sheet. *Before you begin, check that the first two characters (number and letter) of the form code you marked in item 3 on your answer sheet are the same as the form code printed on the front of this booklet.* Compare the responses shown on the copy of your answer sheet with the list of correct answers.

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on page 252. Enter this figure on the worksheet.

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for *section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on page 252. Enter this figure on the worksheet.
