TEST 6—FORM CODE 3I

SECTION 1 Time—30 minutes 45 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. FERTILE: (A) eccentric (B) inept (C) unproductive (D) weary (E) unimportant

2. RECLINE: (A) improve (B) sit up (C) worry (D) slow down (E) desist

3. MODERATE: (A) moralist (B) extremist (C) clairvoyant (D) winner (E) civilian

4. RUTHLESS: (A) willing (B) talented (C) hopeful (D) deliberate (E) merciful

5. CHAOS: (A) validity (B) chance (C) authority (D) order (E) insight

6. TAPERING: (A) failing (B) focusing (C) cracking (D) broadening (E) revealing

7. VIVID: (A) tardy (B) harmless (C) similar (D) lackluster (E) inaccurate

8. COALESCE: (A) revitalize (B) surround (C) enumerate (D) deny access (E) break up

9. INNATE: (A) tested (B) active (C) learned (D) parallel (E) approved

10. RAZE: (A) construct (B) gather (C) harass (D) provide food (E) make beautiful

11. SAVANT: (A) performer (B) plaintiff (C) dunce (D) provocative remark (E) confused opinion

12. GARNER: (A) ignite (B) obstruct (C) disperse (D) disprove (E) precede

13. METTLE: (A) inflexibility (B) ingenuity (C) dishonesty (D) lack of courage (E) lack of planning

14. PERDITION: (A) anxiety (B) celebration (C) salvation (D) seclusion (E) solemnity

15. MUNIFICENT: (A) parsimonious (B) malicious (C) bourgeois (D) contemptible (E) blasphemous

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. The dramatist was ---- over his lack of funds and his inability to sell any of his plays, and his letters to his wife reflected his unhappiness.

(A) despondent (B) supercilious (C) prudent (D) encouraged (E) fortified

17. The history of commissions indicates that they are most effective when dealing with ---- problem and least effective when the scope of the problem is broad.

(A) an obvious (B) a limited (C) a difficult (D) a persistent (E) an immaterial

18. Mobility has scattered families and ---- the continuities that once cemented local loyalties.

(A) fused (B) eroded (C) cradled (D) perpetuated (E) consolidated

19. Until Florence Nightingale made nursing ----, it was considered a ---- profession.

(A) scientific. .painstaking
(B) essential. .dangerous
(C) noble. .lofty
(D) patriotic. .worthy
(E) respectable. .degrading

20. There is ---- material in these books, but unfortunately it is ---- by the author's rambling style and buried in excessive detail.

(A) trivial. .marred
(B) insipid. .diluted
(C) imaginative. .highlighted
(D) fascinating. .obscured
(E) unforgettable. .exaggerated

1

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

(This passage was written in 1929.)

In the history of education, the most striking phenomenon is that schools of learning, which in one era are alive with a ferment of genius, in a succeeding generation exhibit mere pedantry and routine. The reason is that these schools are overladen with inert ideas–that is to say, ideas that are merely received into the mind without being used, or tested, or thrown into fresh combinations. Education with inert ideas is not only useless; it is, above all things, harmful. Except at rare intervals of intellectual ferment, education in the past has been radically infected with inert ideas. That is the reason why, in an age when only men received formal higher education, intelligent women who had seen much of the world made up the most cultured part of the community. They had escaped the enormous disadvantage of inert ideas. Every intellectual revolution that has ever stirred humanity into greatness has been a passionate protest against inert ideas. Then, alas, with pathetic ignorance of human psychology, each revolution has proceeded by some educational scheme to bind humanity afresh with inert ideas of its own fashioning.

Let us now ask how in our system of education we are to guard against this mental dry rot. We enunciate two educational commandments: "Do not teach too many subjects," and again, "What you teach, teach thoroughly."

The result of teaching small parts of a large number of subjects is the passive reception of disconnected ideas, not illumined with any spark of vitality. Let the main ideas that are introduced into a child's education be few and important, and let them be thrown into every combination possible. All children should make them their own possessions and should understand their application in the circumstances of daily life. From the very beginning of an education, the child should experience the joy of discovering that general ideas give an understanding of that stream of events that pours through one's life, that *is* one's life. By understanding I mean more than a mere logical analysis, though that is included. I mean "understanding" in the sense in which it is used in the French proverb, "To understand all is to forgive all." Pedants sneer at an education that is useful. But if education is not useful, what is it? Is it a talent, to be hidden away in a napkin? Of course, education should be useful, whatever your aim in life. It was useful to Saint Augustine, a philosopher, and it was useful to Napoleon, a general. It is useful because understanding is useful.

21. A primary concern of the author is to suggest the
    (A) unreliability of education based on ideas
    (B) most beneficial type of education
    (C) theoretical justifications of modern teaching methods
    (D) importance of exposing children to a wide range of concepts
    (E) strength of earlier educational methods and ideas

22. The author's attitude toward those whose teaching is hampered by "inert ideas" (line 6) is best described as
    (A) respect for the success of their work
    (B) tolerance for the difficulty of their task
    (C) nostalgia for concepts of an earlier era
    (D) disapproval of their negative influence
    (E) hostility toward their revolutionary concepts

23. According to the passage, the author believes that certain women of an earlier time had an intellectual advantage because
    (A) they were committed to revolutionary ideas
    (B) travel was considered an optional part of higher education
    (C) their minds were not hampered by useless ideas
    (D) they concentrated on developing skill in the fine arts
    (E) they were able to meet people who had received formal education

24. The author implies that which of the following would be the result of teaching students a little bit about many subjects?
    (A) Attentiveness to detail
    (B) Respect for creative thinking
    (C) Apathy and incomplete understanding
    (D) Curiosity and tolerance for diversity
    (E) Rejection of modern ideas

25. In the author's opinion, education is "useful" (line 48) if it is taught by which of the following methods?
    (A) Showing children famous people to be imitated
    (B) Encouraging the student to learn to do only one thing very well
    (C) Presenting many ideas that provide mental stimulation
    (D) Giving each person the means to make sense of life
    (E) Urging students to pursue their special interests

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

GO ON TO THE NEXT PAGE

Valley glaciers are powerful agents of erosion, which they bring about primarily by plucking and abrasion. Plucking takes place mainly near the "head" (the back wall) of the glacier where the ice freezes to the rock wall and pulls off slabs as the glacier moves forward. Usually a large crack or crevasse, called a bergschrund, develops between the ice and the wall of rock as a result of the tension at the head of the glacier. The bergschrund rarely becomes much wider than 10-15 feet, though, because each winter it is filled with snow that in turn becomes part of the glacier, freezes to the rock wall, and continues to pluck rock as the glacier slowly moves downhill. The continuous plucking action of the glacier results in the formation of a deep amphitheater called a cirque.

Abrasion is caused by rock fragments that are frozen into the bottom and sides of the glacier. These fragments act as a huge file or rasp as the ice moves down its course. Valleys eroded by streams are V-shaped, but glaciers scour and grind the sides and bottoms to form the characteristic U-shaped cross section found in practically all the valleys in glacial areas. Since the main glaciers are usually at least a half-mile thick, the results of glaciation can be seen far up the sides of the large valleys.

The tributaries of glacial valleys are also peculiar in that they usually enter high above the floor of the main valley and thus are known as hanging valleys. The thicker the stream of ice, the more erosion it is capable of causing; consequently the main valley becomes greatly deepened, whereas the smaller glacier in the tributary valley does not cut so rapidly, leaving its valley "hanging" high above the floor of the major valley. Fortunately, the ice has melted from innumerable glacial valleys, exposing many hanging valleys to view. Among the most spectacular sights in countless glacial valleys are the tumultuous waterfalls that leap from hanging valleys and drop their thundering ribbons of white to the placid waters in the valleys far below.

Even more conspicious than the large U-shaped valleys and their hanging tributaries are the sharp-crested ridges that form the background of glacial mountain ranges. These features, known as arêtes, owe their origin to glaciers. As long valley glaciers enlarge their cirques and cut farther in toward the center of the range, this area is finally reduced to a very narrow steep-sided ridge, the arête. In certain places three or more glaciers on the same ridge pluck their way back toward a common point, leaving at their heads a conspicuous, sharp, pointed peak known as a horn.

26. Which of the following titles would be most appropriate for this passage?

(A) Glaciers and Their Effects on the Land
(B) The Glacier as an Agent of Destruction
(C) How and Why Glaciers Advance and Recede
(D) The Last Remnants of the Ice Age
(E) The Surprising Beauty of Glaciers

27. According to the passage, hanging valleys are formed by

(A) glaciers that develop before main glaciers do
(B) the plucking action of main glaciers high on mountain sides
(C) the slower action of glaciers smaller than the main glacier
(D) the rapid melting of tributary glaciers before main glaciers melt
(E) glaciers that cause erosion by plucking rather than by abrasion

28. As it is used in the passage, the phrase "thundering ribbons of white" (line 40) emphasizes which of the following?

(A) The erosive power of waterfalls
(B) The ever-changing landscape in glacial regions
(C) The danger of waterfalls at high elevations
(D) The various forms of water in glacial regions
(E) The majestic beauty brought about by glaciers

29. It can be inferred from the passage that the most extensive erosion in glacial regions results from the

(A) alternate freezing and thawing as seasons change
(B) cracking that occurs during the formation of a bergschrund
(C) cutting action of melting ice
(D) plucking action of a tributary glacier
(E) abrasive action of a main glacier

30. The author develops the passage by doing all of the following EXCEPT

(A) analyzing the process that causes glacial movement
(B) defining terminology relating to glacial action
(C) including a simile to explain glacial erosion
(D) describing the results of glacial erosion on the landscape
(E) comparing glacial erosion to another type of erosion

1

Select the word or set of words that best completes each of the following sentences.

31. Considering Edwin's tendency to ---- those whom he encountered as he journeyed through hostile lands, it was a miracle that he survived at all.

(A) idolize (B) enchant (C) placate (D) provoke (E) appease

32. Ethnic groups usually respond to sociocultural changes either by rapidly losing their cultural ---- or by ---- and emphasizing their cultural identity and uniqueness.

(A) heritage. .forgetting
(B) distinctiveness. .retaining
(C) vitality. .misdirecting
(D) selectivity. .rejecting
(E) awareness. .misplacing

33. The ---- of drug-resistant strains of bacteria and viruses has ---- researchers' hopes that permanent victories against many diseases have been achieved.

(A) vigor. .corroborated
(B) feebleness. .dashed
(C) proliferation. .blighted
(D) destruction. .disputed
(E) disappearance. .frustrated

34. There has been little ---- criticism written about de la Mare; indeed, that which has been written is at the two extremes, either appallingly ---- or bitterly antagonistic.

(A) hostile. .ambiguous
(B) recent. .illogical
(C) fervent. .complimentary
(D) objective. .sycophantic
(E) temperate. .censorious

35. If it is to satisfy its supporters, an administration that claims to have received a popular mandate to make sweeping changes should not leave ---- the most ---- features of the old order.

(A) unauthorized. .neglected
(B) unscathed. .exceptionable
(C) uncounted. .idealistic
(D) unstated. .prestigious
(E) unbalanced. .irrevocable

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep (B) anger : madness (C) smile : amusement (D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. FLEA : DOG :: (A) tusk : elephant (B) spot : leopard (C) parasite : host (D) receptacle : jar (E) insect : pest

37. WHITTLE : STICK :: (A) lick : hand (B) shatter : glass (C) hammer : nail (D) chisel : stone (E) nuzzle : nose

38. MONARCH : SUBJECTS :: (A) victim : defenders (B) tenant : employers (C) truant : pupils (D) witness : jurors (E) general : soldiers

39. REFINE : PETROLEUM :: (A) consume : fuel (B) smelt : ore (C) prospect : uranium (D) blend : alloy (E) import : rubber

40. MINUET : DANCE :: (A) beret : bowler (B) clarinet : symphony (C) chariot : wheel (D) sonnet : poem (E) gown : petticoat

41. TIDINGS : MESSENGER :: (A) clue : detective (B) gossip : telltale (C) verdict : convict (D) inauguration : voter (E) exposure : spy

42. COMPLEX : BUILDING :: (A) tapestry : fabric (B) apple : tree (C) classroom : campus (D) federation : state (E) highway : truck

43. HELPFUL : OFFICIOUS ::
(A) distraught : villainous
(B) compliant : slavish
(C) congenial : complacent
(D) passionate : faithful
(E) inscrutable : curious

44. WAYLAY : PROGRESS ::
(A) view : vista
(B) hesitate : indecision
(C) check : movement
(D) enhance : reputation
(E) advocate : advancement

45. SURREPTITIOUS : STEALTH ::
(A) clandestine : secrecy
(B) subversive : unity
(C) omnipresent : generosity
(D) verbose : enunciation
(E) opulent : simplicity

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 2 Time—30 minutes, 25 Questions

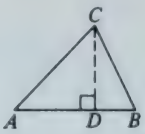

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. All of the following are equal to $\frac{3}{7}$ EXCEPT

(A) $\frac{6}{14}$ (B) $\frac{9}{21}$ (C) $\frac{12}{27}$ (D) $\frac{15}{35}$ (E) $\frac{18}{42}$

2. If $2y + 9 = 5y$, then $y =$

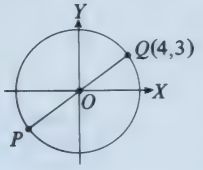

(A) -3

(B) $\frac{7}{9}$

(C) $\frac{9}{7}$

(D) 3

(E) 27

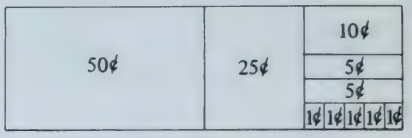

3. In the figure above, POQ is a diameter of circle O with center at the origin. If the coordinates of Q are (4, 3), then the coordinates of P are

(A) $(-4, -3)$ (B) $(-3, -4)$ (C) $(-4, 3)$
(D) $(4, -3)$ (E) $(3, 4)$

4. If $5x\left(\frac{1}{5}y\right) = 1$, then $xy =$

(A) 0 (B) $\frac{1}{25}$ (C) 1 (D) 5 (E) 25

5. The diagram above shows the values of some of the coins used in the United States. How many combinations of complete regions shown could be shaded to indicate 75 cents?

(A) One (B) Two (C) Three
(D) Four (E) Five

GO ON TO THE NEXT PAGE

6. If $\frac{1}{3}$ of a certain number is $\frac{1}{2}$, then $\frac{2}{3}$ of this number is

(A) $\frac{1}{6}$

(B) $\frac{2}{9}$

(C) $\frac{1}{3}$

(D) $\frac{2}{3}$

(E) 1

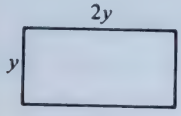

7. Carlos bought gasoline at a price of \$1.299 per gallon. Of the following, which is closest to the number of gallons Carlos bought if he paid \$26 for the gasoline?

(A) 21 (B) 20 (C) 19 (D) 18 (E) 13

8. In the figure above, the hand pointing to 5 moves clockwise to the next numeral every hour. At the end of 24 hours, to which numeral will it point?

(A) 7 (B) 5 (C) 3 (D) 2 (E) 1

9. If the area of the rectangle above is 32, what is the value of y?

(A) 2 (B) 4 (C) 6 (D) 8 (E) 16

10. The first of four identical bottles is $\frac{1}{2}$ full of water, the second is $\frac{3}{4}$ full, the third is $\frac{7}{8}$ full, and the fourth is $\frac{15}{16}$ full. After water is poured from the fourth bottle to fill each of the first three bottles, what fraction of the fourth bottle will be full?

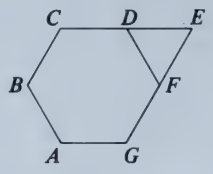

(A) $\frac{1}{32}$ (B) $\frac{1}{16}$ (C) $\frac{1}{12}$ (D) $\frac{1}{9}$ (E) $\frac{1}{8}$

11. If n is an integer, which of the following will NEVER represent an even number?

(A) $2n$ (B) $2n+1$ (C) $3n+2$
(D) $2(n-1)$ (E) $2(n+1)^2$

12. If $x+y=7$, $3x-y=5$, and $2x-y=r-1$, what is the value of r?

(A) -3
(B) -1
(C) 1
(D) 2
(E) 3

13. Eight toothpicks of equal length form the figure shown above. If the perimeter of $\triangle DEF$ is 4 inches, what is the perimeter, in inches, of hexagon $ABCDFG$?

(A) 6 (B) 8 (C) 12 (D) 18 (E) 24

GO ON TO THE NEXT PAGE

14. If n faces of a cube are painted, the area of the unpainted faces is what fraction of the total surface area of the cube?

(A) $\frac{n}{6}$ (B) $\frac{n}{8}$ (C) $\frac{n-6}{6}$

(D) $\frac{6-n}{6}$ (E) $\frac{6-n}{8}$

15. Alan is twice as old as Sue and half as old as Joseph. If the average (arithmetic mean) of all three ages is 14, how old is Sue?

(A) 6
(B) 7
(C) 14
(D) 16
(E) 21

Questions 16-17 refer to the following definition.

For all real numbers p and q,

$$p \boxed{\ } q = 2pq - (p + q).$$

16. $5 \boxed{\ } 4 =$

(A) 2 (B) 11 (C) 31 (D) 39 (E) 49

17. Which of the following must be true for all real numbers p and q ?

I. $p \boxed{\ } q = q \boxed{\ } p$

II. $0 \boxed{\ } q = 0$

III. $p \boxed{\ } p = 2p(p - 1)$

(A) I only
(B) II only
(C) III only
(D) I and III only
(E) I, II, and III

18. In a restaurant Patty's share of the expenses for lunch was \$2 more than Karen's. Karen did not have enough money to pay her share, so Patty paid \$8 of the expenses and Karen paid the remaining \$4. How much did Karen owe Patty to settle the lunch expenses?

(A) \$1
(B) \$3
(C) \$5
(D) \$6
(E) \$9

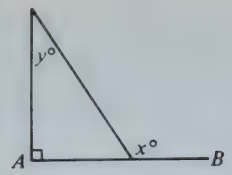

19. The degree measures of the angles of a triangle are x, y, and z. If x, y, and z are integers and $x < y < z$, what is the least possible value of z ?

(A) 58°
(B) 59°
(C) 60°
(D) 61°
(E) 62°

20. A team has won 60 percent of the 20 games it has played so far this season. If the team plays a total of 50 games all season and wins 80 percent of the remaining games, then the percent of games it won for the entire season will be

(A) 66%
(B) 68%
(C) 70%
(D) 72%
(E) 74%

GO ON TO THE NEXT PAGE

Note: Figure not drawn to scale.

21. In the figure above, if AB is a line segment and $x = 6y$, what is the value of y?

(A) 18 (B) 24 (C) 30 (D) 45 (E) 60

---

22. There are 10 children in a room. The ratio of boys to girls increased when another boy and another girl entered the room. What is the greatest number of boys that could originally have been in the room?

(A) 1
(B) 4
(C) 5
(D) 9
(E) 10

$$A\overline{)B}\quad \text{0 remainder 3}$$

23. In the division problem above, if $A > 0$, which of the following must be true?

(A) $A = 3$ (B) $A = 3B$ (C) $B = 0$
(D) $B = 3$ (E) $B = 3A$

24. If the area of an isosceles right triangle is 36, what is its perimeter?

(A) $12 + 12\sqrt{2}$
(B) $12 + 6\sqrt{2}$
(C) $6 + 12\sqrt{2}$
(D) $18\sqrt{2}$
(E) $12\sqrt{2}$

25. If the population of a town doubles every 10 years, the population in year $X + 100$ will be how many times the population in year X?

(A) 20
(B) 100
(C) 200
(D) 512
(E) 1,024

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 4 Time—30 minutes 40 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. ADJACENT: (A) frequently noticed (B) widely separated (C) sparse (D) harmonious (E) expanded
2. RECREATION: (A) labor (B) growth (C) generous reward (D) economical purchase (E) exchange of information
3. QUAKE: (A) examine (B) favor (C) diminish (D) become bright (E) remain motionless
4. ABOLISH: (A) release (B) betray (C) recuperate (D) initiate (E) surpass
5. METAPHORICALLY: (A) positively (B) rationally (C) partially (D) literally (E) hurriedly
6. ENGAGING: (A) honest (B) dissimilar (C) liberal (D) offensive (E) indecisive
7. GUILE: (A) willingness (B) tolerance (C) openness (D) influence (E) consciousness
8. LANGUISH: (A) accept (B) misuse (C) desire (D) become strong (E) speak correctly
9. ANTEDILUVIAN: (A) brawny (B) truthful (C) cooperative (D) posthumous (E) ultramodern
10. GAMBOL: (A) oppose (B) escape (C) avoid (D) trudge (E) bore

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. Since energy costs rise as fuel supplies diminish, we will not be able to maintain price ---- unless we are able to develop a renewable energy source.

(A) differentiation (B) identity (C) augmentation (D) consideration (E) stability

12. The essence of the scientific attitude is the abandonment of personal ----: one must, that is, ---- private likes and dislikes.

(A) interests. .divulge
(B) experimentation. .pursue
(C) inquisitiveness. .promote
(D) inhibitions. .integrate
(E) prejudices. .overcome

GO ON TO THE NEXT PAGE

4

13. Professor Chen believes that the universal character of art refutes the prevalent notion that art is a ---- of civilization, a cultural frill, a social veneer.

(A) guarantee (B) hallmark (C) record (D) luxury (E) depiction

14. Paradoxically, while the country's government officially operated with the ---- usual in any communist regime, factions within that government carried on shrieking debates with each other.

(A) incompetence (B) unanimity (C) opposition (D) illegality (E) discordancy

15. Even though she was then callow and unabashedly eager for ---- reviews, the young actress found the drama critic's ---- flattery revoltingly unrestrained.

(A) banal. .perspicacious (B) affirmative. .laconic (C) laudatory. .fulsome (D) intelligible. .suave (E) antagonistic. .torpid

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep (B) anger : madness (C) smile : amusement (D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. LUNG : WHALE :: (A) shell : clam (B) claw : crab (C) gill : fish (D) fin : shark (E) pearl : oyster

17. PULPIT : MINISTER :: (A) chair : dentist (B) sink : plumber (C) podium : conductor (D) ship : sailor (E) pedestal : sculptor

18. DASHIKI : GARMENT :: (A) spoon : utensil (B) hat : coat (C) cotton : summer (D) foot : shoe (E) plate : table

19. ACROPHOBIA : HEIGHT :: (A) hydrophobia : water (B) pyromania : fire (C) claustrophobia : fear (D) hemophilia : heredity (E) psychology : behavior

20. SPOUSE : WIFE :: (A) husband : uncle (B) son : mother (C) child : daughter (D) brother : sister (E) grandparent : parent

21. BARRIER : ACCESS :: (A) tonic : vigor (B) barge : commerce (C) gag : speech (D) cot : relaxation (E) refrigerator : storage

22. DEFOLIATE : LEAVES :: (A) domesticate : pets (B) unwrap : presents (C) germinate : seeds (D) undress : clothes (E) harvest : fields

23. ABSTRUSE : COMPREHEND ::
(A) antique : renovate
(B) valid : authenticate
(C) indistinct : discern
(D) unethical : expurgate
(E) practical : utilize

24. GRATIS : COST :: (A) threateningly : menace (B) immediately : past (C) freely : hindrance (D) wisely : choice (E) gratefully : comment

25. MUTINOUS : TRACTABLE :: (A) fractious : competent (B) morose : grave (C) precious : stilted (D) fervent : disinterested (E) perverse : witty

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

It was cool in the shade of the trees and high up in them Nick could hear the breeze that was rising. No sun came through as they walked and Nick knew there would be no sun through the high top branches until nearly noon. His sister put her hand in his and walked close to him.

"I'm not scared, Nickie. But it makes me feel very strange."

"Me too. I always feel strange. Like the way I ought to feel in church."

"Nickie, where we're going to live isn't as solemn as this, is it?"

"No. Don't you worry. There it is cheerful. You just enjoy this, Littless. This is good for you. This is the way forests were in the olden days. This is about the last good country there is left. Nobody's going to chase us through here."

"I love the olden days. But I wouldn't want it all this solemn. It's wonderful walking though. I thought behind our house was wonderful, but this is better. This kind of woods makes me feel awfully religious."

"That's why they build cathedrals to be like this."

"You've never seen a cathedral, have you?"

"No, but I've read about them and I can imagine them. This is the best one we have around here."

"Do you think we can go to Europe sometime and see cathedrals?"

"Sure we will. But first I have to get out of this trouble and learn how to make some money."

"Let's be cheerful, Nickie," his sister said. "These woods make us too solemn."

"We'll be out of them pretty soon," Nick told her. "Then you'll see where we're going to live."

26. Nick's attitude toward his sister can best be characterized as

(A) domineering (B) protective (C) romantic (D) uncaring (E) submissive

27. How does Nick's sister respond to Nick's references to being in trouble (lines 16-17 and lines 30-31) ?

(A) She avoids discussion of the subject.
(B) She tries to convince Nick that things will work out.
(C) She analyzes the problem and tries to solve it.
(D) She worries about the consequences for herself.
(E) She gets angry at Nick's brooding.

28. Nick and his sister both find the forest to be chiefly

(A) relaxing (B) exciting (C) cheerful (D) awe-inspiring (E) frightening

4

If a complicated social organization is a valid measure of the success of a species, then bumblebees have somehow failed. They have much simpler colonies than honeybees: less distinct castes, for example, and no comparable information dissemination system. But whatever its virtues may be, an elaborate social order also seems to entail a perpetual energy crisis. A large society in a fixed location tends to deplete the neighborhood of those resources the society needs. One way of dealing with this is to stockpile resources when they become available. The resulting huge reserves attract predators, however, which makes an elaborate defense establishment necessary, and this in turn further drains available resources.

From this perspective, the bumblebees are a great success. They have achieved a modest social order without committing themselves to the costly business of supporting a large standing army. They can manage this because they have learned how to forage successfully in weather that keeps most other species of bees in the hive. Bumblebees, which some biologists believe evolved in the Arctic, have the remarkable ability to control their body heat. They have also developed a talent for foraging among widely scattered and minute food sources. Thus they are not obliged to accumulate surpluses as protection against future shortages. Honeybees, on the other hand, evolved in tropical Asia and adapted to capitalizing quickly on the discovery of major food sources, such as large flowering trees. They have developed in such a way that they are committed to a corporate, garrison existence.

29. It can be inferred that, in line 19, "a large standing army" refers to those bees whose primary function is to

(A) scout for new food sources
(B) attack the hives of other bees
(C) compete with other bees for major food sources
(D) act as sentries outside the hive in bad weather
(E) protect the food stockpiled in the hive

30. According to the passage, the success of the bumblebees' social organization derives from bumblebees' ability to do which of the following?

I. Range widely to find food
II. Find food in cold weather
III. Defend themselves against predators

(A) I only
(B) II only
(C) I and II only
(D) II and III only
(E) I, II, and III

31. It can be inferred that a honeybee hive is most similar to which of the following?

(A) A wealthy city-state always prepared to fend off attacks
(B) A palace in which treasures are stored and never used
(C) A completely self-sufficient nation on a remote island
(D) A community of resourceful but eccentric pioneers
(E) A highly civilized society whose greatest fear is internal revolt

GO ON TO THE NEXT PAGE

(This passage was written in 1963.)

In any nonviolent campaign there are four basic steps: (1) collection of the facts to determine whether injustices are alive; (2) negotiation; (3) self-purification; and (4) direct action. We have gone through all these steps.

As in so many experiences of the past we were confronted with blasted hopes, and the dark shadow of a deep disappointment settled upon us. So we had no alternative except that of preparing for direct action, whereby we would present our very bodies as a means of laying our case before the conscience of the local and national community. We were not unmindful of the difficulties involved. So we decided to go through a process of self-purification. We started having workshops on nonviolence and repeatedly asked ourselves the questions, "Are you able to accept blows without retaliating? Are you able to endure the ordeals of jail?" This reveals that we did not move irresponsibly into direct action.

You may well ask, "Why direct action? Why sit-ins, marches, etc.? Isn't negotiation a better path?" You are exactly right in your call for negotiation. Indeed, this is the purpose of direct action. Nonviolent direct action seeks to create such a crisis and such a creative tension that a community that has constantly refused to negotiate is forced to confront the issue. It seeks to so dramatize the issue that it can no longer be ignored. Just as Socrates felt that it was necessary to create a tension in the mind so that individuals could rise from the bondage of myths and half-truths to the unfettered realm of creative analysis and objective appraisal, we must see the need of having nonviolent gadflies to create the kind of tension in society that will help men rise from the dark depths of prejudice and racism to the majestic heights of understanding and brotherhood. So the purpose of direct action is to create a situation so crisis-packed that it will inevitably open the door to negotiation.

History is the long and tragic story of the fact that privileged groups seldom give up their privileges voluntarily. Individuals may see the moral light and voluntarily give up their unjust posture; but as Reinhold Niebuhr has reminded us, groups are more immoral than individuals. We know from painful experience that freedom is never voluntarily given by the oppressor; it must be demanded by the oppressed. For years now I have heard the word "Wait!" This "wait" has almost always meant "never." We must come to see with the distinguished jurist of yesterday that "justice too long delayed is justice denied."

32. The content and tone of the passage suggest that the primary purpose of the author is to
(A) define the difficulties of correcting social injustice
(B) summarize the effects of civil disobedience in a specific community
(C) establish the relationship between the oppressors and the oppressed
(D) apply Socrates' ideas on nonviolence to modern social conditions
(E) describe and justify a nonviolent campaign for social justice

33. The passage indicates that without the preparatory step of self-purification, the practitioners of nonviolent action would be
(A) prone to respond to violence with violence
(B) deserving of the ordeals of imprisonment
(C) uncertain whether injustices in fact existed
(D) unclear about what result they were seeking
(E) guilty of the same motivations as their oppressors

34. Which of the following serves as the best example of the kind of direct action discussed in lines 20-28 ?
(A) Harrassing members of the opposition by slandering them in newspaper editorials
(B) Preventing an establishment from doing business by peacefully blocking the entrances to the building
(C) Conducting a series of workshops and discussions for those who are interested in bringing about social changes
(D) Recruiting students from local schools to distribute pamphlets and information door-to-door in the community
(E) Holding a member of the opposition hostage until negotiations are opened and made public

35. It can be inferred from the context of the passage that the "nonviolent gadflies" mentioned in line 33 are
(A) leaders who are remarkable primarily for their patience
(B) strategists who concentrate on planning diversionary tactics
(C) activists who advocate the effectiveness of civil disobedience
(D) individuals who are able to serve as objective mediators
(E) idealists who are inspired by the violent actions of others

GO ON TO THE NEXT PAGE

36. According to the author, a lesson to be learned from history is that

(A) persistent and direct confrontation is usually necessary to bring about significant social change
(B) a delay in the eventual gratification of a desire will lessen the degree of satisfaction
(C) any efforts to implement reforms in order to benefit society are doomed to failure
(D) it is as impossible to change individuals as it is to change history
(E) it is time to reverse the social positions of the oppressors and the oppressed

---

An unusual view of the *Conquista* is presented in a picture by Jan Mostaert, probably dating from the 1540's. This remarkable work depicts an imaginary scene of the conquest rather than any specific incident. The pastoral landscape, similar to that which Mostaert provided for Adam and Eve in another painting, is one that the artist and other European readers of Columbus might well have imagined to exist in the West Indies. And the nude figures with the lithe, athletic, well-proportioned bodies of Greek and Roman warriors drawn by Mantegna, Pollaiuolo, and others accord perfectly with the Indians as seen through the spectacles of a Renaissance humanist. Only the strange straw huts and a monkey squatting on a tree stump are manifestly exotic. It is a vision of the Golden Age of the Indies glimpsed at the moment when it is shattered by Spanish steel. While sheep and cows browse impassively on this fresh green breast of the New World, the inhabitants, clutching rudimentary weapons, streak across the panel to encounter a posse of Europeans, armed with pikes and halberds and cannon, remorselessly advancing from the shore where they have beached their boats. Mostaert no doubt had personal experience of the behavior of Spanish soldiers and the picture may well allude, if only obliquely, to their activities in his native Low Countries. But more generally, it is a visual parable on the peace of unspoilt nature and the destructive urge of all peoples—a parallel to his painting of Eve banished from the pastoral dream of Eden, with Cain killing Abel nearby. It is a theme that was to echo down the ages in the Americas.

37. The central purpose of the passage is to

(A) announce the discovery of a great artist
(B) describe and analyze a work of art
(C) point out the historical inaccuracies of a painting
(D) provide an example of the pastoral school of landscape painting
(E) criticize the behavior of the Spanish in the New World

38. The author uses all of the following in discussing Mostaert's painting of the conquest EXCEPT

(A) comparison with other paintings
(B) analysis of the techniques of painting
(C) reference to classical imagery
(D) direct description of the pictorial content
(E) reference to Mostaert's life

39. It can be inferred from the passage that the author's interest in Mostaert's painting centers chiefly on its

(A) ideological content
(B) geographical accuracy
(C) elements of exoticism
(D) drawing of the figures
(E) treatment of the landscape

40. The passage indicates that all of the following exerted an influence on Mostaert's painting of the *Conquista* EXCEPT

(A) paintings of classical figures
(B) biblical mythology
(C) personal experience and preconceptions
(D) readings of Columbus
(E) other paintings of the conquest of the Indies

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 5 Time—30 minutes 35 Questions

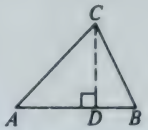

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. If $10x - 4 = 8$, then $10x - 5 =$

   (A) -17 (B) -1 (C) 3 (D) 7 (E) 12

2. If $x = 1$, which of the following is greatest?

   (A) $1 + x$

   (B) $1 - x$

   (C) $\frac{1}{x}$

   (D) x^2

   (E) x^3

3. If X is the midpoint of the segment AB, which of the following is NOT true?

   (A) $AX + XB = AB$
   (B) $XB < AB$
   (C) $XB < AX$
   (D) $AX < AB$
   (E) $AX = XB$

4. $(5 - 1)(4 - 1)(3 - 1)(2 - 1) - (4 - 1)(3 - 1)(2 - 1) =$

   (A) 4 (B) 5 (C) 12 (D) 18 (E) 24

5. If $a = 2$ and $b = 4$, which of the following is NOT equal to any of the others?

   (A) $(a - b)^2$
   (B) $2a$
   (C) $(b - a)^2$
   (D) $8a - 3b$
   (E) $4a - 2b$

6. How many hours are equal to 264 minutes?

   (A) $4\frac{1}{4}$ (B) $4\frac{2}{5}$ (C) $4\frac{1}{2}$
   (D) $4\frac{2}{3}$ (E) $4\frac{4}{5}$

7. In the figure above, if $PQ = QR$, $RS = ST$, and PRT is a line segment, then $z =$

   (A) 40 (B) 50 (C) 60 (D) 80 (E) 100

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet fill in oval

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

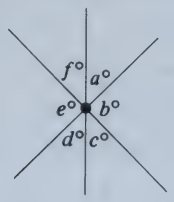

AN E RESPONSE WILL NOT BE SCORED.

EXAMPLES	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● Ⓑ Ⓒ Ⓓ Ⓔ
E2.	 $180 - x$	y	Ⓐ Ⓑ ● Ⓓ Ⓔ
E3.	$p - q$	$q - p$	Ⓐ Ⓑ Ⓒ ● Ⓔ

Notes:

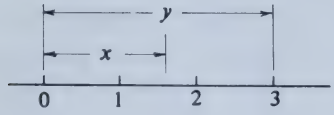

1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

	Column A	Column B
8.	$\frac{5 \times 10 \times 15}{5 \times 5 \times 5}$	6

Three lines intersect in a point.

9.	$a + c + e$	$b + d + f$

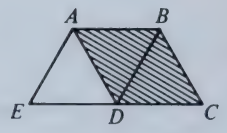

10.	Total length of 300 non-overlapping x-lengths	Total length of 200 non-overlapping y-lengths

If Bill weighed 40 pounds less, his weight would be half as much as it actually is.

11.	Bill's weight	40 pounds

	Column A	Column B
	The measures of the angles of a certain triangle are $x°$, $30°$, and $50°$.	
12.	x	90
	$a + b = 0$	
13.	a	b
14.	$\sqrt{3^4}$	9

$\triangle ADE$, $\triangle ABD$, and $\triangle BCD$ are equilateral.

15.	Perimeter of quadrilateral $ABCE$	Perimeter of shaded parallelogram $ABCD$
16.	The circumference of a circle having radius $\frac{1}{\pi}$	π
17.	$(a + b)^2$	$a(a + b) + b(a + b)$

GO ON TO THE NEXT PAGE

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

AN E RESPONSE WILL NOT BE SCORED.

	Column A	Column B
18.	$\frac{1}{4}x$	$\frac{1}{2}x$

S is the set of integers on the number line from 1 to 100 inclusive.

19.	The number of integers in S that are closer to 35 than to 45	The number of integers in S that are closer to 45 than to 35
20.	3% of (2% of 30)	6% of 30

A box contains a single layer of 30 randomly arranged pieces of candy of which 15 are caramels, 10 are coconut creams, and 5 are chocolates. Jane took a piece of candy without looking.

21.	The chance that Jane took a caramel	The chance that Jane did not take a caramel

$17 + x = 10 + y$

22.	x	y

$x \neq -2$

23.	$\frac{x^2 - x - 6}{x + 2}$	$x - 3$

$p > q > r > 0$

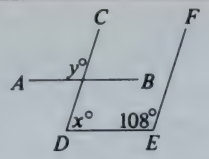

24.	$q - p$	$r - q$

	Column A	Column B
25.	This question was not counted in computing scores.	
26.	$\frac{1}{\sqrt{2} - 1}$	$\sqrt{2} - 1$
27.	Perimeter of a rectangle with area 20	Perimeter of a triangle with area 20

GO ON TO THE NEXT PAGE

5

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

28. In the figure above, $AB \parallel DE$ and $CD \parallel EF$. What is the value of $x + y$?

(A) 72 (B) 108 (C) 144
(D) 180 (E) 216

---

29. If the ratio of x to y is 3 to 4 and the ratio of y to z is 2 to 1, then the ratio of x to z is

(A) 3 to 2
(B) 3 to 1
(C) 2 to 4
(D) 2 to 3
(E) 2 to 1

30. Which of the following equations is (are) true for all positive integers a, b, and c?

I. $(a - b) - c = a - (b + c)$
II. $(a \div b) \div c = a \div (b \div c)$
III. $(a \div b) + c = a \div (b + c)$

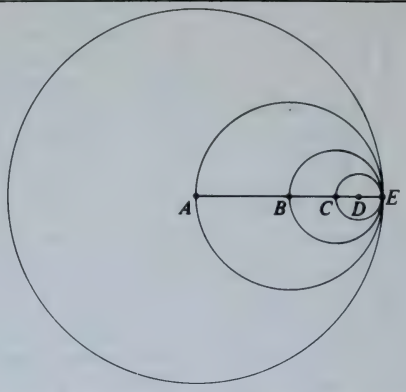

(A) None (B) I only (C) II only
(D) II and III only (E) I, II, and III

31. For any positive integer x, define $\textcircled{x}$ by the following equation.

$\textcircled{x} = x + (x - 1) + (x - 2) + \ldots + 2 + 1$

For example, $\textcircled{4} = 4 + 3 + 2 + 1$. What is the value of $\textcircled{42} - \textcircled{40}$?

(A) 2
(B) 41
(C) 42
(D) 82
(E) 83

32. In the figure above, A, B, C, and D are centers of the four circles that meet at point E. If these five points lie on the same line and the area of the circle with center D is π, then the radius of the circle with center A is

(A) 4 (B) 6 (C) 8 (D) 12 (E) 16

---

33. A car travels 180 kilometers from A to B at 60 kilometers per hour and returns from B to A along the same route at 90 kilometers per hour. The average speed in kilometers per hour for the round trip is

(A) 72 (B) 75 (C) 78 (D) 81 (E) 84

34. If $w = 2x = 3y$, then $5w$ is equal to which of the following?

I. $15y$
II. $2x + 12y$
III. $4x + 8y$

(A) I only (B) II only (C) III only
(D) I and II (E) I and III

$$\begin{array}{r} 6RS \\ +\ RR4 \\ \hline P,QPQ \end{array}$$

35. In the addition problem above, P, Q, R, and S represent four different digits. What digit does S represent?

(A) 1 (B) 2 (C) 5 (D) 6 (E) 8

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

*Indicates four-choice questions. (All of the other questions are five-choice.)
†Not scored

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

$$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.

- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on page 194. Enter this figure on the worksheet.

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for *section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on page 194. Enter this figure on the worksheet.

SAT SCORING WORKSHEET

SAT-Verbal Sections

A. Section 1: _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 4: _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw score (Rounded to nearest whole number) _____ D

E. SAT-verbal reported scaled score (See the conversion table on page 194.) [ ] SAT-verbal score

SAT-Mathematical Sections

A. Section 2: _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 5: Questions 1 through 7 and 28 through 35 (5-choice) _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal B

C. Section 5: Questions 8 through 27 (4-choice) _____ no. correct − ⅓ (_____ no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw score (Rounded to nearest whole number) _____ E

F. SAT-mathematical reported scaled score (See the conversion table on page 194.) [ ] SAT-math score
