TEST 9—FORM CODE 6E

SECTION 1 Time—30 minutes 40 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. SELF-SUFFICIENT: (A) impolite (B) helpless (C) careful (D) faulty (E) extreme

2. SURGE: (A) sudden decrease (B) loud noise (C) unusual color (D) destructive agent (E) negative reaction

3. EXACTNESS: (A) sentimentality (B) imprecision (C) ignorance (D) lack of originality (E) resistance to change

4. RANT: (A) plan carefully (B) speak peaceably (C) request promptly (D) defend bravely (E) convince wholly

5. LAPSE: (A) calculation (B) revelation (C) final decision (D) ample allowance (E) continued improvement

6. DEFUNCT: (A) financial (B) accurate (C) existing (D) colorful (E) saturated

7. INSENTIENT: (A) generous (B) productive (C) permanent (D) unable to hope (E) capable of feeling

8. EMBROIL: (A) determine provisionally (B) accuse falsely (C) handle ineffectually (D) beautify (E) extricate

9. AMBIVALENCE: (A) valuable skill (B) lack of strength (C) honesty (D) certainty (E) success

10. TINGE: (A) recommend (B) conform (C) soothe (D) revise (E) blanch

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. Because she has a great need for ----, she loathes the public appearances demanded of her as a leading literary figure.

(A) luxury (B) privacy (C) reward (D) devotion (E) distraction

12. Barbara McClintock's systematic examination of corn demonstrated the transposition of genes, a finding that overturned entrenched beliefs and proved that ---- study may produce brilliant insights and ---- change.

(A) haphazard..radical
(B) inherent..controversial
(C) improvised..startling
(D) methodical..revolutionary
(E) derivative..gradual

13. Sympathetic from the start, the faculty committee listened to the students' grievances with ---- and then set out to ---- the conditions that caused them.

(A) alarm..exacerbate
(B) remorse..enumerate
(C) disdain..improve
(D) concern..rectify
(E) enthusiasm..restate

14. Ms. Fergusson's main criticism of the artist's rendering of the ancient mammal's physical appearance is that, unsupported by even a ---- of fossil evidence, the image is bound to be ----.
    (A) modicum..speculative
    (B) particle..supplemented
    (C) perusal..substantiated
    (D) fabrication..obsolete
    (E) recapitulation..exhausted

15. Even as the danger of an epidemic has ----, there has risen, paradoxically, ---- the adoption and implementation of proven preventative measures.
    (A) diminished..apathy about
    (B) intensified..interest in
    (C) increased..resistance to
    (D) spread..encouragement for
    (E) evaporated..understanding of

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep (B) anger : madness (C) smile : amusement (D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. SOIL:EARTHWORM :: (A) sky:star (B) skin:mosquito (C) field:tree (D) water:fish (E) grass:cow

17. BLINDFOLD:SEEING ::
    (A) microphone:hearing
    (B) smudge:writing
    (C) tongue:tasting
    (D) muzzle:biting
    (E) tingle:feeling

18. CARPENTER:WOOD :: (A) artist:palette (B) gardener:hoe (C) mason:stone (D) surgeon:scalpel (E) writer:plot

19. ABBREVIATION:WORD ::
    (A) signature:name (B) sentence:paragraph (C) survey:poll (D) shortcut:route (E) bypass:issue

20. HAZE:LANDSCAPE ::
    (A) subtlety:bluntness (B) sand:desert (C) maze:psychology (D) veil:face (E) confusion:conciseness

21. PRIEST:SEMINARY ::
    (A) pilot:aviary
    (B) soldier:maneuver
    (C) artist:exhibit
    (D) comedian:amphitheater
    (E) musician:conservatory

22. REPROBATE:CONDEMNATION ::
    (A) prodigal:wealth
    (B) outcast:exclusion
    (C) renegade:conformity
    (D) turncoat:nationality
    (E) upstart:consequence

23. CRITERION:DECISION ::
    (A) duplicate:adaptation
    (B) standard:comparison
    (C) resolution:antagonism
    (D) sample:purchase
    (E) shame:justice

24. PRECARIOUS:PERCH ::
    (A) risky:investment
    (B) preconceived:notion
    (C) injurious:plunge
    (D) premature:opinion
    (E) pretentious:display

25. LABYRINTHINE:ARGUMENT ::
    (A) discordant:music
    (B) convoluted:pattern
    (C) exotic:cuisine
    (D) symmetrical:proportion
    (E) comprehensive:plan

GO ON TO THE NEXT PAGE

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

While governments wrangled over future canals to the Pacific, the shipwrights of New York and New England were engaged in cutting down the time of ocean passage around Cape Horn. In one month of 1850, thirty-three sailing vessels from New York and Boston entered San Francisco Bay after an average passage of 159 days. Then there came booming through the Golden Gate the clipper ship Sea Witch of New York, 97 days out. At once the cry went up for more clippers.

This type of full-rigged sailing vessel was characterized by great length in proportion to breadth of beam, an enormous sail area, and long concave bows ending in a gracefully curved cutwater. Sea Witch, built for the China-New York tea trade, now proved the new type's value for the California trade. But, as California then afforded no return cargo except gold dust, the Yankee clippers sailed in ballast to China where they came into competition with the British merchant marine. Crack ships of the British East India Company waited for a cargo weeks on end, while one American clipper after another sailed with a cargo of tea at double the ordinary freight.

These clipper ships were built of wood in shipyards from Maine to Baltimore. Their architects obeyed what wind and wave had taught them and created the noblest of all sailing vessels. These were our Gothic cathedrals, our Parthenon; but monuments carved from snow. For a few brief years they flashed their splendor around the world, then disappeared with the finality of the wild pigeon.

26. The main purpose of the passage is to
    (A) compare British and American sailing ships
    (B) discuss the China-New York tea trade in the 1850's
    (C) describe and celebrate the clipper ship
    (D) explain why the clipper ship disappeared
    (E) demonstrate the superiority of American ingenuity to British tradition

27. In the first paragraph of the passage, the author implies that
    (A) American shipwrights acted more effectively than governments did
    (B) the New York to San Francisco route was too long to be commercially viable
    (C) the Sea Witch had an unfair advantage over other sailing ships
    (D) sailing ships of any type would soon be outdated
    (E) only a canal could significantly reduce the time of ocean passage between New York and San Francisco

28. In the passage, the author does NOT state or imply that the clipper ships were
    (A) graceful (B) costly (C) profitable (D) short-lived (E) swift

GO ON TO THE NEXT PAGE

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

However people may be enraptured by Shakespeare's works, whatever merits they may attribute to them, it is certain that he was not an artist. Without a sense of proportion there could never be an artist.

"But to judge Shakespeare one must allow for the times when he wrote," say his admirers. "It was a time of coarse manners, a time of elaborate and artificial speech, a time of life strange to us. In Homer also there is much that is strange to us, but this does not prevent our valuing the beauties of Homer."

But when one compares Shakespeare with Homer, the infinite distance separating true poetic art from its imitation emerges vividly. However alien to us may be the events Homer describes, he believes in what he says and speaks seriously of what he is describing, and therefore he never exaggerates and the sense of measure never deserts him. We can, then, without the slightest effort transport ourselves into the life he describes. But it is not so with Shakespeare. From his first words exaggeration is seen: of events, of feeling, of expression. It is at once evident that he does not believe in what he is saying, that he has devised his characters merely for the stage, to please the public; and so we do not believe either in the actions or in the sufferings of his characters.

29. The author implies that Homer's works are characterized by which of the following?

I. Plausible characters
II. A sense of proportion
III. Sincere expression of feelings

(A) II only (B) I and II only
(C) I and III only (D) II and III only
(E) I, II, and III

30. According to the author, Shakespeare's admirers refer to the times in which Shakespeare lived in order to

(A) praise his use of exaggerated speech
(B) justify the lack of proportion in his writing
(C) emphasize what is most fascinating about his writing
(D) verify the realism of the strange events he describes
(E) establish a standard by which all poetic art should be judged

31. According to the author, Shakespeare's goal in writing was to

(A) imitate the art of Homer
(B) provide an outlet for his inner feelings
(C) immortalize the people of his times
(D) portray significant contemporary issues
(E) find favor with the theater audiences of his day

GO ON TO THE NEXT PAGE

Prostaglandins are short-lived hormonelike substances made by most cells in the body after injury or shock. They are responsible for a number of physiological reactions. Prostaglandins have been shown to influence blood pressure, muscle contraction, and blood coagulation and are involved in producing pain, fever, and inflammation. When released from platelets—minute discs in the blood—a prostaglandin derivative called thromboxane makes the platelets clump together and thus initiates clotting.

In 1971, John Vane, a British researcher, discovered that aspirin interferes with the synthesis of prostaglandins. Scientists now know that aspirin relieves pain by inactivating cyclooxygenase, an enzyme that aids in initiating the synthesis of prostaglandins. When scientists realized that aspirin can also interfere with clotting, they began to wonder whether it could help prevent heart attacks and strokes, which are often caused by blood clots that block arteries in the chest or neck. Studies now indicate that low daily doses of aspirin can cut the risk of a second heart attack by about twenty percent and the risk of a second stroke by nearly half. It seems logical to assume that if the drug can prevent second heart attacks, it can also ward off an attack the first time around. Therefore, many doctors recommend an aspirin tablet every other day to inhibit excessive platelet clumping among people who have high blood pressure or other symptoms that increase the risk of heart attacks.

32. According to the passage, prostaglandins play a role in all of the following EXCEPT the

(A) clotting of blood
(B) sensation of pain
(C) contraction of muscles
(D) manufacture of platelets
(E) inflammation of tissue

33. The passage suggests that which of the following would be most likely to initiate the production of prostaglandins?

(A) Taking an aspirin
(B) Spraining an ankle
(C) Climbing stairs
(D) Flexing a muscle
(E) Running a fever

34. It can be inferred from the passage that when the production of prostaglandins is impeded, which of the following occur(s)?

I. Blood coagulation is slowed.
II. Pain is reduced.
III. Inflammation increases.

(A) I only (B) II only (C) I and II only
(D) II and III only (E) I, II, and III

35. It can be inferred from the passage that aspirin helps prevent heart attacks by

(A) interfering with the production of thromboxane
(B) lowering blood pressure
(C) easing muscular contractions
(D) initiating the production of cyclooxygenase
(E) widening the arteries

GO ON TO THE NEXT PAGE

This free, joking way of Bartley's was one of the things that made him popular; he passed the time of day, and was give and take right along, as his admirers expressed it, from the first, in a community where his smartness had that honor which gives us more smart men to the square mile than any other country in the world. The fact of his smartness had been affirmed and established in the strongest manner by the authorities of the college at which he was graduated, in answer to the reference he made to them when negotiating with the committee in charge for the place he now held as editor of the Equity Free Press. The faculty spoke of the solidity and variety of his acquirements, and the distinction with which he had acquitted himself in every branch of study he had undertaken. They added that he deserved the greater credit because his early disadvantages as an orphan, dependent on his own exertions for a livelihood, had been so great that he had entered college with difficulty, and with heavy conditions. This turned the scale with a committee who had all been poor boys themselves, and justly feared the encroachments of hereditary aristocracy. They perhaps had their misgivings when the young man, in his well-blacked boots, his gray trousers neatly fitting over them, and his diagonal coat buttoned high with one button, stood before them with his thumbs in his waistcoat pockets, and looked down over his mustache at the floor with sentiments concerning their wisdom which they could not explore; they must have resented the fashionable keeping of everything about him, for Bartley wore his one suit as if it were but one of many; but when they understood that he had come by everything through his own unaided smartness, they could no longer hesitate. One, indeed, still felt it a duty to call attention to the fact that the college authorities said nothing of the young man's moral characteristics in a letter dwelling so largely upon his intellectual qualifications. The others referred this point by a silent look to Squire Gaylord.

"I don't know," said the Squire, "as I ever heard that a great deal of morality was required by a newspaper editor." The rest laughed at the joke, and the Squire continued: "But I guess if he worked his own way through college, as they say, that he haint had time to be up to a great deal of mischief. You know it's for idle hands that the Devil provides, doctor."

"That's true, as far as it goes," said the doctor. "But it isn't the whole truth. The Devil provides for some busy hands, too."

36. According to the passage, Bartley is presently employed as a

(A) college professor (B) research scholar
(C) newspaper editor (D) medical doctor
(E) business executive

37. The tone of the phrase "in a community . . . the world" (lines 4-7) is best described as one of

(A) seriousness and concern
(B) bitterness and reproach
(C) indifference and detachment
(D) enthusiasm and admiration
(E) irony and amusement

38. All of the following factors helped Bartley in his candidacy for the position for which he was considered EXCEPT

(A) his amiable personality
(B) his intellectual achievements at college
(C) his fashionable attire
(D) the letter of recommendation from the college he attended
(E) the selection committee's prejudice against those with inherited wealth

39. All of the following statements about Squire Gaylord may be inferred from the passage EXCEPT:

(A) He has the respect of the other committee members.
(B) He displays a sense of humor.
(C) He values the virtue of work.
(D) He is certain Bartley is of unimpeachable character.
(E) He claims some knowledge of newspaper editors.

40. According to the passage, the one observation about Bartley that impresses Squire Gaylord the most is that Bartley

(A) also has an aristocratic background
(B) attended a prestigious university
(C) has been energetic and hardworking
(D) displays a fine moral character
(E) is the favorite of influential citizens

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 2 Time—30 minutes, 35 Questions

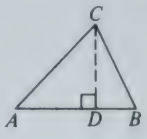

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. If $3x + 5 = 15 - 2x$, then $x =$

(A) -2
(B) 2
(C) 4
(D) 10
(E) 20

2. In the figure above, what is the degree measure of the smaller angle formed by the hour and minute hands of the clock?

(A) 240°
(B) 120°
(C) 80°
(D) 75°
(E) 60°

3. The scale of a certain map is 1 centimeter equals 1 kilometer. On this map 1.5 centimeters would represent how many meters? (1 kilometer = 1,000 meters)

(A) 100.5
(B) 150
(C) 1,000.5
(D) 1,500
(E) 15,000

GO ON TO THE NEXT PAGE

4. Which of the following is equal to a number greater than 1 ?

(A) $\frac{1}{2} \div \frac{1}{3}$

(B) $\frac{1}{2} \times \frac{1}{3}$

(C) $\frac{1}{2} - \frac{1}{3}$

(D) $\frac{1}{2} + \frac{1}{3}$

(E) $\frac{1}{3} \div \frac{1}{2}$

5. If $\frac{x}{3} = \frac{12}{y}$ and $y - 2 = 2$, then $x =$

(A) 3
(B) 4
(C) 6
(D) 9
(E) 12

x	y
2	6
3	8
4	10
5	12

6. The table above gives four sets of values for the ordered pair (x, y). Which of the following could be an equation for y in terms of x?

(A) $y = \frac{x}{2}$ (B) $y = \frac{5x}{2}$ (C) $y = 2x + 2$
(D) $y = 2x - 6$ (E) $y = x + 4$

7. If n is an odd integer, which of the following is an even integer?

(A) $\frac{n}{2}$

(B) $n + 2$

(C) $2n + 1$

(D) n^2

(E) $n(n + 1)$

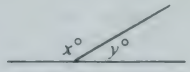

GO ON TO THE NEXT PAGE

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet fill in oval

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

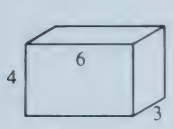

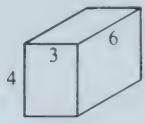

AN E RESPONSE WILL NOT BE SCORED.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● ① ② ③ ④
E2.	 $180 - x$	y	① ② ● ③ ④
E3.	$p - q$	$q - p$	① ② ③ ● ④

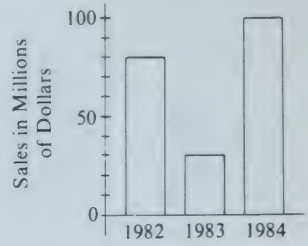

Notes:

1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

	Column A	Column B
	 Solid I	 Solid II
8.	The volume of rectangular solid I	The volume of rectangular solid II
9.	$3^2 \times 5^3$	$3 \times 4 \times 5 \times 6 \times 7$
10.	The number of gumdrops John has after eating 3	The number of gumdrops Ann has after eating 2
11.	$2 \cdot 3 + (24 \div 6)(2)$	14

A cube has each face painted a different one of the colors—red, blue, yellow, orange, green, and black. The cube is evenly balanced and is rolled across a flat surface.

12.	The chance of the cube stopping with a face other than yellow on top	The chance of the cube stopping with the yellow face on top

	Column A	Column B
		
13.	Sales for 1982	Average (arithmetic mean) sales per year for the 2-year period 1983-1984

$\frac{n^a}{n^b} = 1$ and $n > 1$

14.	a	b

Machine A can do a certain job in 7 seconds. Machine B can do the same job in 9 seconds. Both machines operate at constant rates.

15.	The fraction of the job done by machine A in 1 second	The fraction of the job done by machine B in 1 second
16.	0.0009×10^3	900×10^{-3}

GO ON TO THE NEXT PAGE

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

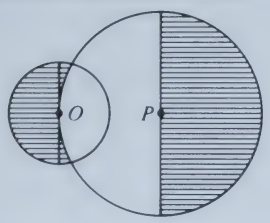

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

AN E RESPONSE WILL NOT BE SCORED.

	Column A	Column B
17.	$\begin{cases} x = 2 \\ x + y = -2 \\ x + y + z = -6 \end{cases}$ y	z

Lines ℓ_1 and ℓ_2 lie in the same plane and have no points in common. Another line, ℓ_3, also lies in this plane.

	Column A	Column B
18.	The number of points of intersection formed by pairs of these three lines	1

O is the center of the small circle with radius 3 and P is the center of the large circle with radius 6.

	Column A	Column B
19.	Four times the area of the shaded portion of the small circle	The area of the shaded portion of the large circle

The least prime factor of the integer k is 7.
The least prime factor of the integer n is 7.

	Column A	Column B
20.	k	n

On a certain trip, Ms. Waters traveled part of the distance at an average speed of 45 miles per hour and the remainder at an average speed of 55 miles per hour.

	Column A	Column B
21.	Ms. Waters' average speed, in miles per hour, for the entire trip	50

	Column A	Column B
22.	 x	y

The ratio of $\frac{1}{3}$ to $\frac{1}{2}$ is equal to the ratio of $\frac{1}{2}$ to w.

	Column A	Column B
23.	w	$\frac{2}{3}$

x is a positive integer.

	Column A	Column B
24.	The value of the units' digit of 2^x	9

	Column A	Column B
25.	RS	PT

For any number x, let $\lceil x \rceil$ be equal to the least integer greater than or equal to x.

	Column A	Column B
26.	$\lceil -3.5 \rceil$	-3

$x^2 + x - 2 = 0$

	Column A	Column B
27.	x	0

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

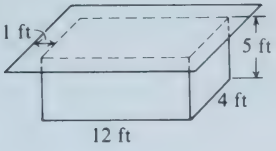

28. If $80^2 = n(40^2)$, then $n =$

(A) 2
(B) 4
(C) 8
(D) 16
(E) 20

29. Of 300 high school students in a gymnasium, which of the following must be true?

I. At least 2 were born in the same year.
II. At least 2 have the same birthday.
III. At least 1 was born at midnight.

(A) I only
(B) II only
(C) III only
(D) I and II only
(E) I, II, and III

30. The figure above shows a rectangular piece of tin laid on a rectangular box. If the tin extends uniformly 1 foot over each edge as shown, what is the area, in square feet, of the top surface of the tin?

(A) 65
(B) 70
(C) 78
(D) 84
(E) 98

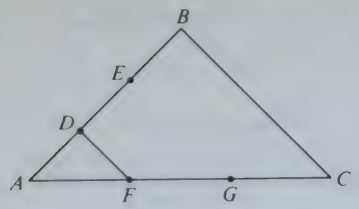

31. If $\begin{smallmatrix} & a & \\ b & & c \end{smallmatrix}$ is defined to be $ab + ac - bc$, for what value of x will $\begin{smallmatrix} & 3 & \\ 4 & & x \end{smallmatrix}$ equal zero?

(A) 12
(B) 7
(C) 5
(D) -7
(E) -12

32. If x is 3 less than $\frac{n}{2}$, which of the following gives n in terms of x?

(A) $\frac{x+3}{2}$
(B) $2(x+3)$
(C) $2x+3$
(D) $2(x-3)$
(E) $2(3-x)$

GO ON TO THE NEXT PAGE

33. In the figure above, D and E divide side AB into three equal parts and F and G divide side AC into 3 equal parts. The ratio $\frac{\text{area of } \triangle ADF}{\text{area of } \triangle ABC}$ is

(A) $\frac{1}{3}$

(B) $\frac{1}{6}$

(C) $\frac{1}{8}$

(D) $\frac{1}{9}$

(E) $\frac{1}{12}$

34. If the sum of n consecutive integers is zero, which of the following must be true?

I. The product of the n consecutive integers is zero.
II. The average (arithmetic mean) of the n consecutive integers is zero.
III. n is an odd number.

(A) I only
(B) II only
(C) III only
(D) I and II only
(E) I, II, and III

35. In 1970, the price of a certain antique car was 30 percent greater than in 1965. In 1975, the price of the same car was 50 percent greater than in 1970. The price of the car was what percent greater in 1975 than in 1965 ?

(A) 40%
(B) 45%
(C) 80%
(D) 90%
(E) 95%

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 3 Time—30 minutes 45 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. FARFETCHED: (A) tranquil (B) probable (C) monotonous (D) exposed to danger (E) readily changed

2. CRUMPLE: (A) confine (B) smooth (C) stifle (D) rub together (E) make clearer

3. SUCCULENT: (A) dry (B) unmusical (C) unfriendly (D) lumpy (E) sore

4. TOPPLE: (A) identify (B) stabilize (C) combine (D) improve (E) increase

5. HILARITY: (A) detachment (B) diligence (C) gloominess (D) meekness (E) patience

6. KINDLE: (A) slash (B) pull (C) bend (D) douse (E) scatter

7. EXPENDABLE: (A) irreconcilable (B) irreplaceable (C) extensive (D) elaborate (E) innovative

8. ACCORD: (A) pleasure (B) curiosity (C) sluggishness (D) disharmony (E) insensitivity

9. CAUSTIC: (A) soothing (B) rash (C) toxic (D) flexible (E) effective

10. REPUDIATE: (A) exaggerate (B) distract (C) adopt (D) finesse (E) deceive

11. OPULENCE: (A) weariness (B) symmetry (C) meagerness (D) flattery (E) despair

12. TAWDRY: (A) significant (B) responsive (C) talkative (D) melodious (E) refined

13. INUNDATE: (A) release (B) drain (C) balance (D) brighten (E) ascend

14. IGNOMINY: (A) honor (B) understanding (C) solemnity (D) tranquillity (E) sincerity

15. ARABLE: (A) dormant (B) disreputable (C) unreliable (D) sloping (E) untillable

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate
(C) sophisticated. .amateur (D) risqué. .crude
(E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. Strobe light (pulses of light rather than ---- illumination) makes it possible for photographers to capture events that occur too ---- for the human eye to see.

(A) artificial..subtly
(B) continuous..rapidly
(C) unfocused..recently
(D) brilliant..casually
(E) local..prominently

17. Food can be ---- element in family life, bringing us together in times of trouble and in times of joy.

(A) an additive (B) a conflicting
(C) a unifying (D) a residual
(E) an inconsistent

18. Arthur lost his cynical attitude toward the study of economics and began to ---- the major contributions of giants in the field.

(A) initiate (B) recant (C) duplicate
(D) recognize (E) authorize

19. Our view of ---- rulers is like our view of stars in the sky: great distances may actually ---- them, but they appear close to each other.

(A) despotic..imprison
(B) famous..denigrate
(C) ancient..separate
(D) legendary..conceal
(E) popular..exaggerate

20. Many of the misconceptions about Queen Victoria were created by those who ---- her most; in their efforts to ---- her as a model of all virtues, they lost sight of the real woman.

(A) esteemed..discredit
(B) idolized..disparage
(C) challenged..delineate
(D) admired..depict
(E) censured..represent

21. Before the introduction of the fur trade, hunting patterns among Native Americans living in the area encouraged the conservation of game, since hunting was a means of ---- for the group, not profit.

(A) experimentation (B) subsistence
(C) continuity (D) domestication
(E) collaboration

22. In contrast to many social science writers who become ---- obfuscating jargon, Welch ---- political concepts in a book suitable for general readers as well as social science classes.

(A) free of..elucidates
(B) mired in..demystifies
(C) enhanced by..camouflages
(D) evasive about..circumvents
(E) ensnared by..eclipses

23. Physical laws do not, of course, in themselves force bodies to behave in a certain way, but merely ---- how, as a matter of fact, they do behave.

(A) determine (B) preclude
(C) counteract (D) describe
(E) commend

24. Public education is regarded in America as the pathway to social salvation, a ---- for secular difficulties.

(A) panacea (B) scapegoat (C) prototype
(D) criterion (E) fountainhead

25. After closely observing the remarkable responsiveness of newborn infants to their environment, scientists are revising a long-held belief that infants are primarily ---- creatures.

(A) innocent (B) passive (C) inquisitive
(D) timid (E) sensitive

GO ON TO THE NEXT PAGE

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

Folklorist Willis James has identified and traced through its various stages what he theorizes to be the basis of Afro-American music: the "cry." The "cry" is the dominant element of Afro-American music that has greatly influenced much of American music.

James contends that the element of the "cry" accounts for the great pull this music has had on people in this country and in Europe: ". . . White people have been trying to find a cause of Afro-American musical uniqueness somewhere in Africa when the cause was always present with us Black people by their side, suffering and struggling for existence."

Based on many years of thoughtful study, James's analysis of Afro-American music proposes that the "cry" is the oldest form of vocal expression and is heard in uninhibited and spontaneous vocalizations that, in the manner of folk music, evolved from oral tradition. "Cries" may be articulate in regard to speech or inarticulate in regard to musical requirements, making possible only the barest type of musical notation. According to James, "cries" of a musical nature are only representations heard at a given moment, since improvisation and originality prevent a "cry" from being vocalized the same way twice. "Cries" that are articulate musically but inarticulate in terms of speech are perhaps older than song, if we are to consider song the "wedding of words to notes." James suggests it is the use of microtones in "cries," particularly at the end of phrases, that brings African and Afro-American music closest together. Also, the use of microtones makes notation more difficult in the Western system of notation.

James divides "cries" into three musical categories, each of which is compared to the European song style of the Gregorian chant: (1) plain cries, the simplest in form and structure, employ one note or tone per word or syllable, and are described as "syllabic"; (2) florid cries, the most prevalent and favored, employ several notes or tones to a word, similar to the "neumatic" treatment in chants; and (3) coloratura cries, which represent one of the most remarkable vocal feats in music, are restricted in use because of their great complexity. The coloratura "cry" is compared with the melismatic treatment in chants in which many notes adorn a single word or syllable.

Aside from James's reputation as a musicologist, the fact that Gregorian chants, too, were handed down from one generation to another and evolved from an oral tradition seems to add credibility to the use of European musical descriptions in the analysis of "cries."

26. The main purpose of the passage is to
    (A) discuss a study
    (B) revive a tradition
    (C) dispel a notion
    (D) describe a procedure
    (E) refute a theory

27. According to the passage, "cries" and Gregorian chants have in common the fact that both
    (A) are difficult for Westerners to appreciate
    (B) are equally recognizable styles of music
    (C) evolved from oral tradition
    (D) created unique systems of musical notation
    (E) resulted from cross-cultural contacts

28. The author apparently considers James's comparison of "cries" with Gregorian chants to be
    (A) contradictory (B) restrictive (C) ironic (D) valid (E) novel

29. According to the passage, which of the following is true of both coloratura cries and melismatic chants?
    (A) They have been a major influence in American music.
    (B) They are musically inarticulate.
    (C) They may be described as syllabic.
    (D) They are spontaneous vocalizations.
    (E) They use many notes to vocalize a single word or syllable.

30. Which of the following best states the central idea of the passage?
    (A) The "cry" is a legitimate form of American folk music.
    (B) The Gregorian chant is the European counterpart of Afro-American music.
    (C) Afro-American music has more European than African elements.
    (D) The basis of Afro-American music is an improvisational vocal style.
    (E) Afro-American music has evolved through both an oral and a recorded tradition.

(This passage was written in 1958.)

In the sixteenth century, Galileo's contemporaries rejected his report that he had seen spots on the face of the Sun. His *Letters on the Solar Spots*, they said, were heretically contrary to the dogma that "this most lucid body" must be without blemish. But knowledge of the existence of sunspots was inescapable. Centuries before Galileo, sky-watchers in China had beheld sunspots with unaided eyes. Galileo's successors in astronomy brought the Sun under close surveillance, and after two or three centuries established that the spots fluctuate in number in a regular cycle. Observation showed this cycle to be synchronized with a fluctuation in the number of displays of the aurora borealis. Observers began to suspect that the sunspots might exert further effects on our planet. It was discovered that the passage of spots across the face of the Sun is associated with violent storms in the Earth's magnetic field; with the arrival of radio it was found that these storms were accompanied by widespread blackouts of radio communication.

Now we are at the beginning of the next significant advance in knowledge of the Sun. Though the statistical coincidence of solar activity and geomagnetic storms is conclusive, physicists have been unable to describe a process connecting events on the solar surface with the Earth's upper atmosphere. The storms that disturb the ionized layers of our atmosphere require a source of high-energy radiation and highly energetic particles. Obviously the Sun is this source. But just as the Earth's atmosphere shelters us from the hard radiation and cosmic particles raining on it, so the Sun's atmosphere absorbs and blocks the radiations of short wavelength and the particles that radiate from the solar surface. Recent advances in instrumentation, however, have made it possible for solar astronomers to turn from the face of the Sun to investigate the solar corona.

For many years astronomers who wanted to observe the Sun's atmosphere had to wait for the infrequent opportunity of a solar eclipse. At other times the dazzling light of the photosphere (the Sun's surface seen in ordinary light) overwhelms the faint light radiated by the gases in the atmosphere. Today, thanks to the genius of Bernard Lyot, astronomers are able to keep a day-to-day watch on the Sun's atmosphere. Lyot invented a coronagraph to make an artificial eclipse. This specialized telescope cuts out the light of the Sun's surface with an occulting disk and employs an elaborate train of optics to get rid of scattered light. Lyot also devised a filter that selectively admits narrow regions of the spectrum; with the coronagraph and filter together, we can observe the processes that go on in the solar atmosphere.

31. It can be inferred that the author would describe Galileo's contemporaries as

(A) apathetic (B) narrow-minded
(C) irresponsible (D) hypocritical
(E) unconventional

32. According to the passage, the Earth's atmosphere and the Sun's atmosphere are alike in which of the following ways?

I. Each protects the surface beneath it from hard radiation.
II. Each is subject to cyclical disturbances.
III. Each protects the surface of the Earth from some radiation from the solar surface.

(A) I only (B) II only (C) I and III only
(D) II and III only (E) I, II, and III

33. The author's statement that solar astronomers can now "turn from the face of the Sun" (line 36) means that they can

(A) study phenomena in the solar atmosphere
(B) study the photosphere in greater detail
(C) view the Sun's disk without suffering harmful effects
(D) determine the sources of solar radiation
(E) prevent communication blackouts caused by solar radiation

34. The passage suggests answers to all of the following questions EXCEPT:

(A) What is a source of high-energy radiation that bombards the Earth's atmosphere?
(B) Why are special instruments needed to observe the Sun's atmosphere?
(C) How are high-energy particles from the solar surface able to penetrate the solar atmosphere?
(D) What is the nature of the evidence that links sunspots and geomagnetic storms?
(E) Why are astronomers interested in studying the Sun's atmosphere?

35. Which of the following first indicated to astronomers that sunspots have an effect on the Earth?

(A) Sunspots appear to occur at regular intervals.
(B) Atmospheric storms cause blackouts of radio communication.
(C) Magnetic storms originate in the Earth's high atmosphere.
(D) Sunspots are so large that they are visible to the unaided eye.
(E) The activity of sunspots coincides with the activity of the aurora borealis.

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep (B) anger : madness (C) smile : amusement (D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. HEADLINE:ARTICLE ::
(A) portrait:painting (B) index:summary (C) encore:performance (D) title:book (E) footnote:thesis

37. PEBBLE:SLINGSHOT :: (A) knuckle:fist (B) clapper:bell (C) nail:hammer (D) powder:rifle (E) arrow:bow

38. SYNCHRONIZE:MOVEMENTS ::
(A) sublimate:goals (B) realize:dreams (C) prolong:intervals (D) remit:payments (E) harmonize:voices

39. BULLETIN:INFORMATION ::
(A) editorial:opinion
(B) journal:instruction
(C) clue:interpretation
(D) report:confidence
(E) rumor:publicity

40. VULGARIAN:TASTE ::
(A) mystic:credibility
(B) stoic:forbearance
(C) scoundrel:conduct
(D) hypochondriac:sensitivity
(E) penitent:deficiency

41. ABSOLVE:OBLIGATION ::
(A) accept:invitation
(B) liberate:bondage
(C) verify:testimony
(D) condemn:property
(E) negotiate:victory

42. CHATTERBOX:GARRULOUS ::
(A) killjoy:merry
(B) volunteer:heedless
(C) fussbudget:dissatisfied
(D) autocrat:didactic
(E) soothsayer:reassuring

43. INTUITIVE:DELIBERATION ::
(A) arduous:hazard
(B) inevitable:logic
(C) ponderous:decision
(D) consecutive:order
(E) spontaneous:planning

44. SOPORIFIC:SLEEP ::
(A) appetizing:hunger
(B) excruciating:relief
(C) prominent:surprise
(D) instantaneous:time
(E) incoherent:order

45. SCUTTLE:SHIP ::
(A) reject:voter
(B) protest:cause
(C) subvert:government
(D) annoy:irritant
(E) confiscate:possession

SECTION 4 Time—30 minutes, 25 Questions

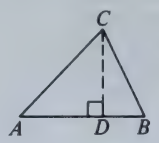

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

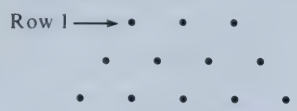

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.
If $\angle CDA$ is a right angle, then
(1) area of $\triangle ABC = \frac{AB \times CD}{2}$
(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. $(5 \times 0.5) + 0.5 =$

(A) 1.5
(B) 3.0
(C) 5.0
(D) 5.5
(E) 6.0

2. If the pattern of dots shown above is continued so that each row after row 1 contains 1 dot more than the row immediately above it, how many dots will row 8 contain?

(A) Seven
(B) Eight
(C) Nine
(D) Ten
(E) Twelve

3. A store offers to reupholster old sofas at a price of \$200 per sofa plus \$50 extra for every loose cushion. If every sofa to be reupholstered has at least one loose cushion, what is the maximum number of sofas, including loose cushions, that can be reupholstered for \$1,150?

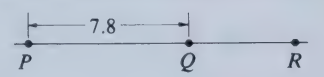

(A) 6
(B) 5
(C) 4
(D) 3
(E) 2

4. In his closet Lewis has 12 garments, all of which are shirts or trousers. If 75 percent of the garments are shirts, how many of the garments are trousers?

(A) Three
(B) Four
(C) Five
(D) Nine
(E) Ten

5. When 6 is added to some number n and this sum is divided by 6, the result is a whole number. Which of the following could be n?

(A) 33,333
(B) 44,444
(C) 55,555
(D) 66,666
(E) 77,777

6. In the figure above, if the average (arithmetic mean) of the lengths of segments PQ and QR is 6.5, what is the length of QR?

(A) 3.9
(B) 4.2
(C) 4.7
(D) 5.2
(E) 5.9

GO ON TO THE NEXT PAGE

7. Two integers have a sum of 53 and a difference of 11. The greater of the two integers is

(A) 22
(B) 25
(C) 28
(D) 31
(E) 32

8. On a certain day the temperature rose 8° between 6 a.m. and 10 a.m., and it rose 7° between 10 a.m. and 2 p.m. It fell 6° between 2 p.m. and 6 p.m. If the temperature at 6 p.m. was 5°, what was the temperature at 6 a.m. that day?

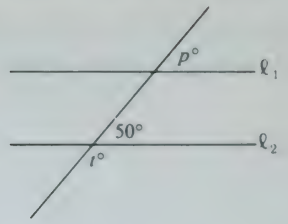

(A) −16°
(B) −4°
(C) 10°
(D) 14°
(E) 26°

9. Alex estimates that if he lies in the sun for k hours it will take him $(10 + 10k)$ minutes to get to sleep at night because of sunburn pain. If Alex wants to get as much sun as possible without taking more than a half-hour to get to sleep, how many hours can he lie in the sun?

(A) $\frac{1}{2}$
(B) 1
(C) 2
(D) $2\frac{1}{2}$
(E) 3

10. If the sum of p and r is 18 and if $s = 12$, what is the average (arithmetic mean) of p, r, and s?

(A) 6
(B) 9
(C) 10
(D) 15
(E) 30

11. In the figure above, if $\ell_1 \parallel \ell_2$, what is the value of $p + t$?

(A) 180
(B) 150
(C) 130
(D) 100
(E) It cannot be determined from the information given.

12. A square piece of paper measuring 5 inches on a side is cut along one of its diagonals. Of the following, what is the closest approximation, in inches, to the perimeter of one of the resulting paper triangles?

(A) 15
(B) 17
(C) 20
(D) 27
(E) 30

$$S = 1 - \frac{1}{3} + \frac{1}{5} - \frac{1}{7} + \frac{1}{9} - \frac{1}{11}$$

$$T = 1 - \frac{1}{3} + \frac{1}{5} - \frac{1}{7}$$

13. For the expressions above, S is how much greater than T?

(A) $\frac{2}{99}$
(B) $\frac{1}{11}$
(C) $\frac{1}{10}$
(D) $\frac{1}{7}$
(E) $\frac{1}{2}$

GO ON TO THE NEXT PAGE

14. How many quarts of a liquid does it take to make $84\frac{1}{2}$ gallons? (4 quarts = 1 gallon)

(A) $21\frac{1}{8}$

(B) $21\frac{1}{2}$

(C) 336

(D) $336\frac{1}{2}$

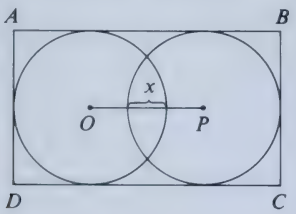

(E) 338

15. If x, y, and z are different integers and $x + y + z = 3$, what is the least possible value of z?

(A) -3
(B) 1
(C) 2
(D) 3
(E) It cannot be determined from the information given.

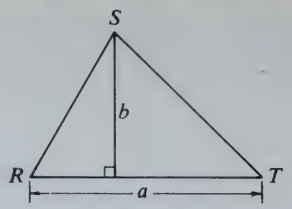

16. In a circle graph showing world production of aluminum, what is the measure of the central angle of the sector representing a country that produces $\frac{4}{15}$ of the total world production of aluminum?

(A) 26°
(B) 60°
(C) 85°
(D) 92°
(E) 96°

17. In the figure above, the circles with centers O and P each have a radius of 2. If $x = 1$, then the perimeter of rectangle $ABCD$ is

(A) 10
(B) 18
(C) 20
(D) 22
(E) 24

Note: Figure not drawn to scale.

18. If the area of triangle RST above is 46, which of the following values can be determined?

(A) a

(B) b

(C) ab

(D) $a + b$

(E) $\frac{a}{b}$

19. If the sum of the positive integers x and y is 12, then x can be equal to all of the following EXCEPT

(A) $5y$
(B) $4y$
(C) $3y$
(D) $2y$
(E) y

20. If segments are drawn to join points $A(-1, 0)$, $B(5, 0)$, and $C(2, -4)$, which of the following statements is true?

(A) $AC < BC$
(B) $AC > BC$
(C) $AB = BC$
(D) $AC = BC$
(E) $AC = AB$

GO ON TO THE NEXT PAGE

21. If a rectangle has area 72, width w, and perimeter p and if $w = \frac{p}{6}$, then $w =$

(A) 4
(B) 6
(C) 8
(D) 9
(E) 12

22. If $p = \frac{a}{a+b}$, then $1 - p =$

(A) $\frac{b}{a+b}$

(B) $\frac{1-a}{a+b}$

(C) $\frac{1-a}{1-(a+b)}$

(D) $-a$

(E) 0

$$\begin{array}{r} A15 \\ \times\ B5 \\ \hline \end{array}$$

23. In the multiplication problem above, A and B are two different digits. In terms of A and B, which of the following is the product?

(A) $100AB + 10B + 25$
(B) $100AB + 50B + 25$
(C) $100AB + 500A + 150B + 75$
(D) $1{,}000AB + 10B + 75$
(E) $1{,}000AB + 500A + 150B + 75$

24. The two legs of a right triangle are a and $a - d$, and the hypotenuse is $a + d$. In terms of a, what is the value of d?

(A) $\frac{1}{4}a$

(B) $\frac{1}{3}a$

(C) $\frac{1}{2}a$

(D) $\frac{2}{3}a$

(E) $\frac{3}{4}a$

25. At the end of each week, the price of a garment was reduced by 25 percent of its price during that week. If p was the price of the garment at the beginning of the first week, then, in terms of p, what was the price of the garment at the beginning of the 5th week?

(A) $\frac{p}{256}$

(B) $\frac{3p}{256}$

(C) $\frac{9p}{256}$

(D) $\frac{27p}{256}$

(E) $\frac{81p}{256}$

*Indicates four-choice questions. (All of the other questions are five-choice.)

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

$$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.

- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

SAT-Verbal Sections 1 and 3

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 3* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on page 270. Enter this figure on the worksheet.

SAT-Mathematical Sections 4 and 2

Step A: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on page 270. Enter this figure on the worksheet.

SAT SCORING WORKSHEET

SAT-Verbal Sections

A. Section 1: _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 3: _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw score (Rounded to nearest whole number) _____ D

E. SAT-verbal reported scaled score (See the conversion table on page 270.) [ ] SAT-verbal score

SAT-Mathematical Sections

A. Section 4: _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 2: Questions 1 through 7 and 28 through 35 (5-choice) _____ no. correct − ¼ (_____ no. incorrect) = _____ subtotal B

C. Section 2: Questions 8 through 27 (4-choice) _____ no. correct − ⅓ (_____ no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw score (Rounded to nearest whole number) _____ E

F. SAT-mathematical reported scaled score (See the conversion table on page 270.) [ ] SAT-math score
