SECTION 1

Time—30 minutes

45 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. WILT: (A) prevent (B) drain (C) expose (D) revive (E) stick

2. ISSUE: (A) dilute (B) revolve (C) depend (D) substitute (E) retract

3. PREMEDITATED: (A) spontaneous (B) conclusive (C) disruptive (D) vindictive (E) strenuous

4. SUMMARY: (A) bracing (B) accented (C) detailed (D) animated (E) disconcerting

5. WOE: (A) honesty (B) obedience (C) generosity (D) happiness (E) cleverness

6. RABID: (A) poignant (B) circular (C) skillful (D) dense (E) calm

7. AIR: (A) conceal (B) conform (C) detain (D) mislead (E) satisfy

8. CIRCUMSCRIBED: (A) unbounded (B) imperfect (C) injurious (D) readily evaded (E) barely legible

9. RANCOR: (A) carelessness (B) restlessness (C) inexperience (D) kindness (E) self-consciousness

10. PERIPHERAL: (A) colossal (B) central (C) condensed (D) subsequent (E) adjacent

11. PROFUSION: (A) activity (B) cleanliness (C) separation (D) adversity (E) scantiness

12. TURGID: (A) strong (B) glossy (C) deflated (D) easily described (E) haphazardly distributed

13. DISINTERESTED: (A) attractive (B) scholarly (C) biased (D) abandoned (E) profitable

14. DISPARITY: (A) fearfulness (B) punctuality (C) prejudice (D) similarity (E) notoriety

15. GARNER: (A) disfigure (B) hedge (C) connect (D) forget (E) disperse

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. He claimed that the document was ---- because it merely listed endangered species and did not specify penalties for harming them.

(A) indispensable (B) inadequate (C) punitive (D) aggressive (E) essential

17. The author makes no attempt at ---- order; a scene from 1960 is followed by one from 1968, which, in turn, is followed by one from 1964.

(A) an impartial (B) an innovative (C) a motley (D) a chronological (E) an extemporaneous

18. Traditionally, countries with ---- frontiers requiring ---- must maintain a large army and support it by imposing taxes.

(A) historic. .markers
(B) vulnerable. .defense
(C) vague. .exploration
(D) unwanted. .elimination
(E) contested. .estimation

19. The ability to estimate distance comes only with ----; a baby reaches with equal confidence for its bottle or the moon.

(A) tranquility (B) talent (C) experience (D) assurance (E) distress

20. She undertook a population census of the island with the ----, if not always the enthusiastic support, of the authorities.

(A) objection (B) elation (C) suspicion (D) acquiescence (E) disdain

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

One of the most significant political advances for the Black community in New York was the election of Harlemites to legislative offices. In 1920, for the first time, a Black man, E. A. Johnson, was nominated by a district organization for the state assembly. In electing Johnson, Harlem Republicans chose a well-qualified politician whose career symbolized a major transition in American history: the transfer of Black political power from the South to northern metropolitan centers.

Harlem was, until the early 1920's, solidly residential, but the Black vote was split between assembly districts which included substantial numbers of Jews in the Nineteenth District and Irish in the Twenty-First, as well as other ethnic groups. This unintentional gerrymander forced Blacks to share power with White politicians. By 1920, after a decade of mass migration, Blacks composed seventy percent of the population of each district. Blacks were aided by an active two-party system in Harlem. Although most Blacks voted for Republicans, the United Colored Democracy was a special organization within the Democratic Party. Its leader, Ferdinand Q. Morton, worked sympathetically with White Democratic bosses until 1935 when Mayor La Guardia, perhaps fortunately for the growing spirit of independence among Harlem Blacks, deliberately broke Morton's control of Black patronage.

Although Republican presidential candidates received Harlem's Black vote until 1932, Democratic mayoralty candidate John Hylan polled an amazing seventy-five percent of that vote in 1921. Black Democrats had represented Harlem on the Board of Aldermen before the twenties, but in 1922, with a landslide vote for Al Smith for governor of New York, Harlem became the first Black community in the nation to significantly support the Democratic Party. No longer could politicians boast that the Black vote could never be driven from the party of Lincoln.

After his victory in 1921, Hylan appointed Morton chairman of the Civil Service Commission, the first time a Black had held that important municipal post. Hylan's successor, James J. Walker, reappointed Morton to the post. In 1925, five Black physicians became, for the first time, regular staff members of the Harlem Hospital. This was the result of prodding from Morton, Republican aldermen, the NAACP, and the North Harlem Medical Society. And, after a decade of pressure, Black Republicans in the state assembly forced the creation of a new administrative entity by subdividing the old Seventh District. This intentional gerrymander guaranteed the election of two Black judges—another city first—to the municipal bench in 1929.

21. Which of the following titles best summarizes the content of the passage?

(A) The Black Migration to New York
(B) Harlem Politics in Transition
(C) The Black Vote in Presidential Elections
(D) Prominent Black Politicians
(E) The Black Vote and the Democratic Party

22. The career of E. A. Johnson is important to the main idea of the passage because it

(A) illustrates a precedent in the acquisition of political power by Harlem Blacks
(B) exemplifies the new aggressive politics of Blacks in the rural South
(C) symbolizes the thwarted political ambitions of American Blacks
(D) heralds the end of political subjugation of Blacks in the South
(E) reflects the desire of Harlem Blacks for separation from the White community

23. According to the passage, Black representation in the New York State Assembly before 1920 was hampered by the

(A) solidly residential nature of the Black community
(B) indifference of other ethnic groups
(C) division of the Black vote between two districts
(D) inability of Black voters to agree on candidates
(E) failure of Harlem voters to sponsor candidates

24. It can be inferred that, beginning with 1932, Harlem's Black vote was

(A) delivered by Ferdinand Q. Morton to the local Democrats
(B) split between two state assembly districts
(C) a point of controversy in all presidential primaries
(D) the controlling factor in the mayoral elections in New York
(E) frequently accorded to Democratic presidential candidates

25. The author cites Harlem's landslide vote for Al Smith in 1922 as an illustration of the

(A) desire of Harlemites to be free of political bosses
(B) Blacks' ability to vote as a unit in spite of gerrymandering
(C) need for a two-party system in Harlem
(D) changing party alignment of Black voters in Harlem
(E) fact that political analysts are often wrong in their predictions

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

1

Studies of children's acquisition of language suggest that the faculty of language includes an inborn knowledge of the formal principles of language structure, a knowledge that depends on genetically determined portions of (usually) the left cerebral hemisphere. Although it is well established that the left hemisphere is specialized for language, one cannot say that language is "located" in this or that part of the hemisphere. What is known is that language disorders are the result of lesions in the left hemisphere. Disorders of language resulting from damage to the brain are called aphasias.

The anterior portion of the "language area" is termed Broca's area. Lesions in this area interfere with the motor and articulatory aspects of language. Speech is slow, labored, grammatically incorrect, and telegraphic; in extreme cases, it may be impossible to carry out. Writing is likewise severely impaired. Comprehension of the spoken or written word, however, may be unimpaired or nearly so. (It is interesting to note that under emotional stress, a patient with Broca's aphasia may be temporarily fluent.) Because Broca's area is close to the motor cortex, if the former is damaged, the latter is often damaged simultaneously. Hence, such patients often suffer from weakness or paralysis of the right side of the body. Similar lesions in the right hemisphere will cause a left-sided weakness or paralysis but will have no effect on language.

Damage to the posterior portion of the "language area," especially to Wernicke's area, results in a loss of comprehension of the spoken word and often of the written word. The patient's native language is now like a foreign language. In addition, the patient's speech is rapid and well-articulated, but without meaning. Writing is defective, and words that are heard cannot be repeated, although hearing itself is completely normal. Similar lesions in the right hemisphere usually have no effect on language.

Injuries to the "language area" in children result in severe aphasias, but the development of language mechanisms in the right hemisphere can often compensate for them to an extraordinary degree. This potential function of the right hemisphere is probably normally suppressed by the left hemisphere. In adults, aphasias from similar lesions are often permanent.

26. The author is primarily concerned with

(A) describing the process of language acquisition
(B) explaining potential treatments of language defects
(C) showing the importance of the left hemisphere of the brain to language mechanisms
(D) depicting various means of diagnosing language defects
(E) explaining why the left hemisphere of the brain dominates the right hemisphere

27. Unlike a patient with Wernicke's aphasia, a patient with Broca's aphasia can do which of the following?

(A) Comprehend written but not spoken language.
(B) Hear and read with comprehension.
(C) Speak articulately and also comprehend spoken language.
(D) Write and speak readily and coherently.
(E) Neither write nor understand his or her native language.

28. According to the passage, which of the following statements about the right hemisphere of the brain is (are) accurate?

I. It has the potential to serve as a "language area."
II. It controls the ability to comprehend but not the ability to speak a language.
III. If it is damaged, gross motor control of the left side of the body may be affected.

(A) I only
(B) I and II only
(C) I and III only
(D) II and III only
(E) I, II, and III

29. It can be inferred that aphasias in adults often result in permanent damage because

(A) much memory is lost
(B) adults have more trouble learning a foreign language
(C) the right hemisphere is no longer as adaptable as it once was
(D) brain cells in adults are especially vulnerable to infection
(E) adults can readily become adept at nonverbal communication

30. It can be inferred that the author uses which of the following as evidence for the specialization of the left hemisphere?

(A) Clinical studies of instances of damage in the left hemisphere
(B) Studies of language development in children without brain damage
(C) Microscopic examination of the left hemisphere
(D) Examples of the integration of functions of the left and right hemispheres
(E) Theoretical explanations of brain specialization

Select the word or set of words that best completes each of the following sentences.

31. Edward was rather ---- about what paintings were hung in his study, but, in contrast, was quite ---- about what furniture was in the room.

(A) fastidious..indifferent
(B) inflexible..obstinate
(C) undecided..tentative
(D) demanding..definite
(E) submissive..timid

32. A curious self-interest, and not the concern for others which might have been expected, motivated his ----.

(A) ambition (B) malevolence (C) apathy
(D) eccentricity (E) philanthropy

33. The dinner was a culinary -----, confirming to all its partakers the reputed ---- of the host.

(A) orgy..extravagance
(B) escapade..conventionality
(C) tragicomedy..expertise
(D) classic..ineptitude
(E) nightmare..infallibility

34. One of the paradoxes of life is the friction between our hunger for ---- and our grudging ---- that there is indeed nothing new under the sun.

(A) variety..denial
(B) infamy..acceptance
(C) novelty..awareness
(D) security..insistence
(E) conformity..admission

35. If improved technology enables researchers to perform more refined experiments, startling evidence may be uncovered that will lead to the ---- of even the most sacrosanct of scientific theories.

(A) tempering (B) diagnosing (C) utilization
(D) supposition (E) formulation

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. COW : BARN :: (A) pig : mud (B) chicken : coop
(C) camel : water (D) cat : tree
(E) horse : racetrack

37. LEAVE : LINGER :: (A) manipulate : manage
(B) warrant : employ (C) surprise : astonish
(D) cease : prolong (E) flout : violate

38. NOTES : SCALE :: (A) solos : harmony
(B) sentences : punctuation (C) attitudes : fact
(D) fractions : numerator (E) letters : alphabet

39. APPAREL : PERSON :: (A) plumage : bird
(B) prey : animal (C) water : fish
(D) insignia : officer (E) scenery : theater

40. SONG : RECITAL :: (A) author : bibliography
(B) episode : series (C) coach : team
(D) intermission : play (E) poetry : prose

41. ANALGESIC : PAIN ::
(A) vaccination : injection
(B) anesthetic : sleep
(C) antidote : poisoning
(D) prescription : medication
(E) liniment : ointment

42. FEINT : ILLUSION ::
(A) insanity : hallucination
(B) decoy : enticement
(C) ambush : cache
(D) impasse : exit
(E) ploy : vengeance

43. BURNISH : LUSTER :: (A) resist : aggression
(B) preserve : area (C) accelerate : rapidity
(D) pivot : reflex (E) plunge : distance

44. HEIRLOOM : INHERITANCE ::
(A) payment : currency (B) belongings : receipt
(C) land : construction (D) legacy : bill
(E) booty : plunder

45. PHILISTINE : CULTIVATED ::
(A) regionalist : authoritarian
(B) anarchist : disorderly
(C) capitalist : greedy
(D) visionary : practical
(E) eccentric : artistic

DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 2

Time—30 minutes

25 QUESTIONS

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

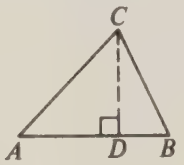

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$

The number of degrees of arc in a circle is 360.

The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

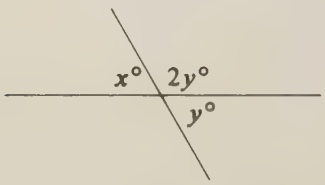

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

---

1. If $x^3 + y = x^3 + 5$, then $y =$

   (A) -5 (B) $-\sqrt[3]{5}$ (C) $\sqrt[3]{5}$ (D) 5 (E) 5^3

2. In the figure above, two lines intersect as shown. What is the value of x ?

   (A) 30 (B) 60 (C) 90 (D) 120 (E) 180

3. If $x = -3$ and $y = 0$, then $x^2y + \dfrac{y}{x} =$

   (A) 9
   (B) 6
   (C) 3
   (D) 0
   (E) -3

4. The number 99,999,999 is NOT divisible by

   (A) 9 (B) 11 (C) 99
   (D) 111 (E) 9,999

Sun.	Mon.	Tue.	Wed.	Thu.	Fri.	Sat.
						30
29	28	27	26	25	24	23
22	21	20	19	18	17	16

5. If the days of a month are numbered consecutively backward as shown on the partial calendar above, on what day of the week will the day numbered 1 occur?

(A) Sunday (B) Monday (C) Tuesday
(D) Friday (E) Saturday

6. In the figure above, a 5-meter pole and a 3-meter pole are tied together so that the length of the overlapping portion is 2 meters. What is the length x of the two poles combined in this way?

(A) 4 m
(B) 5 m
(C) 6 m
(D) 7 m
(E) 8 m

Questions 7-8 refer to the following price list.

PLACE SETTING OF TABLEWARE

Item	Price
Dinner plate	$2.95
Salad plate	$2.45
Bowl	$2.20
Cup	$1.95
Saucer	$1.90

7. Charles bought one of each of the 5 items listed. What was the average (arithmetic mean) price per item for the 5 items?

(A) $2.00 (B) $2.21 (C) $2.29
(D) $2.32 (E) $2.39

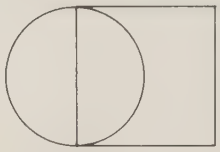

8. If the price of each item in the list above is reduced by 10 percent during a sales promotion, which of the following is the amount of money saved by purchasing 8 saucers at the sale price?

(A) $1.52 (B) $1.73 (C) $13.68
(D) $15.20 (E) $17.00

GO ON TO THE NEXT PAGE

9. Of the following numbers, which is the LEAST?

(A) 0.102
(B) 0.11
(C) 0.1201
(D) 0.101
(E) 0.1001

10. In the figure above, one side of the square is a diameter of the circle. If the area of the circle is p and the area of the square is s, which of the following must be true?

I. $s > p$
II. $s \geqq 2p$
III. $s < p$

(A) None (B) I only (C) II only
(D) III only (E) I and II

List I: 1, 3, 5, 7
List II: 2, 4, 6, 8

11. For how many different ordered pairs, (x, y), where x is a number from List I and y is a number from List II, is $x + y > 11$?

(A) Nine (B) Seven (C) Six
(D) Four (E) Three

---

12. If a and b are even integers, which of the following must be true?

I. $\frac{a+b}{2}$ is odd.
II. $a - b$ is even.
III. $a + b$ is divisible by 2.

(A) III only
(B) I and II only
(C) I and III only
(D) II and III only
(E) I, II, and III

13. If $x^2 - y^2 = 27$, then $3(x + y)(x - y) =$

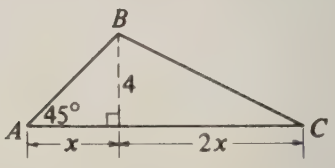

(A) 9 (B) 24 (C) 27 (D) 36 (E) 81

14. Points A, B, X, and Y lie on the same line but not necessarily in that order. Given the lengths $AB = 12$, $BX = 2$, and $XY = 8$, what is length AY?

(A) 2
(B) 6
(C) 18
(D) 22
(E) It cannot be determined from the information given.

15. When x is divided by 7, the remainder is 4. What is the remainder when $2x$ is divided by 7?

(A) 1 (B) 2 (C) 3 (D) 4 (E) 5

16. In $\triangle ABC$ above, what is the length of side AC?

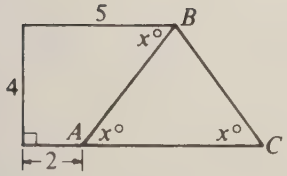

(A) 24 (B) 18 (C) 12 (D) 8
(E) It cannot be determined from the information given.

---

17. If one hundred equally priced tickets cost a total of d dollars, then, in terms of d, five of these tickets cost how many dollars?

(A) $\frac{d}{20}$
(B) $\frac{d}{5}$
(C) $5d$
(D) $\frac{5}{d}$
(E) $\frac{20}{d}$

GO ON TO THE NEXT PAGE

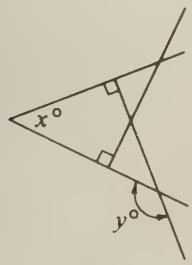

18. In the figure above, what is the area of $\triangle ABC$?

(A) 12
(B) 14
(C) 16
(D) 24
(E) 28

---

19. In a certain period, an agency's editors read 4 out of every 20 scripts submitted. What was the ratio of unread scripts to scripts read during that time?

(A) 3:4
(B) 4:5
(C) 5:4
(D) 4:1
(E) 5:1

20. In the figure above, what is y in terms of x?

(A) $90 + x$
(B) $90 + 2x$
(C) $180 - x$
(D) $180 - 2x$
(E) $2x$

---

21. Ten people meet and everybody shakes hands exactly once with everybody else. What is the total number of handshakes?

(A) 9 (B) 10 (C) 45 (D) 50 (E) 90

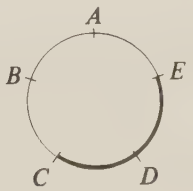

22. If $\frac{x}{y} = \frac{2}{3}$ and $\frac{y}{z} = \frac{-3}{2}$, which of the following must be true?

I. $\frac{x}{z} = -1$

II. $xy = 6$

III. $(x + z)^2 = 0$

(A) None (B) I only (C) II only
(D) III only (E) I and III

23. In the figure above, points A, B, C, D, and E divide the circle into 5 equal arcs. If the area of the circle is 25π, what is the length of arc CDE?

(A) 2π
(B) 4π
(C) 5π
(D) 8π
(E) 10π

---

24. If x is an odd number, what is the sum of the next two odd numbers greater than $3x + 1$?

(A) $6x + 8$
(B) $6x + 6$
(C) $6x + 5$
(D) $6x + 4$
(E) $6x + 3$

25. In a race, if Bob's running speed was $\frac{4}{5}$ Alice's, and Chris's speed was $\frac{3}{4}$ Bob's, then Alice's speed was how many times the average (arithmetic mean) of the other two runners' speeds?

(A) $\frac{3}{5}$ (B) $\frac{7}{10}$ (C) $\frac{40}{31}$ (D) $\frac{10}{7}$ (E) $\frac{5}{3}$

40 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. VERSATILE: (A) unadaptable (B) mediocre (C) impatient (D) egocentric (E) vicious

2. FRAUDULENT: (A) rather pleasing (B) extremely beneficial (C) courteous (D) authentic (E) simplified

3. PROTRUSION: (A) mirage (B) indentation (C) deceleration (D) disorder (E) fruitlessness

4. BOLT: (A) cleanse (B) slide (C) look upon (D) move sluggishly (E) exhibit proudly

5. ANTIQUATED: (A) fake (B) flat (C) modern (D) secret (E) applied

6. SNIPPET: (A) vague response (B) bargain (C) sudden plunge (D) fantasy (E) large amount

7. IMPUGN: (A) speak well of (B) describe in detail (C) forget to complete (D) disassociate (E) stimulate

8. RECANT: (A) reduce (B) ridicule (C) prevent delivery of (D) reaffirm belief in (E) accept remuneration for

9. DEPRAVITY: (A) talent (B) certainty (C) noble behavior (D) successful venture (E) elaborate decoration

10. EPHEMERAL: (A) lasting (B) inhumane (C) contemporary (D) destructive (E) appropriate

GO ON TO THE NEXT PAGE

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ---, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate
(C) sophisticated. .amateur (D) risqué. .crude
(E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. In the North Pacific, the number of whales has been so drastically reduced that the sighting of even one is ---- event.

(A) a newsworthy (B) a treacherous
(C) an everyday (D) an elaborate
(E) an expected

12. Musicians' salaries have risen so much faster than concert admission prices and donations that some famous ---- are threatened with ----.

(A) composers. .silence
(B) orchestras. .bankruptcy
(C) works. .oblivion
(D) conductors. .strikes
(E) soloists. .taxation

13. In view of the ---- value of the new treatment for this complicated case, ---- with another physician is advisable.

(A) questionable. .a consultation
(B) necessary. .an interlude
(C) accepted. .an exploration
(D) impossible. .a confrontation
(E) presumed. .an argument

14. Parental devotion, especially if overly solicitous, has its ----, one of which is ---- a child's progress toward maturity.

(A) delusions. .envisioning
(B) excesses. .abetting
(C) targets. .ensuring
(D) rewards. .ameliorating
(E) pitfalls. .protracting

15. Chesnutt enables the reader to witness the people's conscious ---- of history, to observe how one group in society could ---- turn its back on the truth.

(A) manipulation. .inadvertently
(B) suppression. .accidentally
(C) investigation. .blithely
(D) distortion. .willfully
(E) tabulation. .involuntarily

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. PAINTING : CANVAS :: (A) drawing : lottery
(B) fishing : pond (C) writing : paper
(D) shading : crayon (E) sculpting : design

17. VOLUME : SPHERE :: (A) altitude : triangle
(B) diagonal : square (C) area : circle
(D) angle : rectangle (E) length : cube

18. RAMSHACKLE : COLLAPSE ::
(A) intact : explode (B) threadbare : hem
(C) waterlogged : sink (D) dilapidated : repair
(E) flammable : quench

19. TRICK : ROGUE :: (A) stratagem : friend
(B) sentence : criminal (C) accident : witness
(D) conspiracy : traitor (E) novel : reader

20. CALIPERS : MEASURING :: (A) nails : hammering
(B) crops : harvesting (C) glasses : polishing
(D) decisions : weighing (E) scissors : cutting

21. WHEEDLE : FLATTERY ::
(A) inspire : creations (B) intimidate : threats
(C) scrutinize : clues (D) accuse : denials
(E) appreciate : offers

22. CACOPHONY : SOUND ::
(A) beauty : vision
(B) stench : smell
(C) decadence : age
(D) radiance : illumination
(E) ignorance : knowledge

23. LECHER : LUSTFUL ::
(A) glutton : surly (B) fanatic : ungodly
(C) skinflint : miserly (D) disciplinarian : unruly
(E) spendthrift : homely

24. INSOLVENCY : FUNDS :: (A) economy : inflation
(B) coinage : money (C) exhaustion : energy
(D) addiction : cure (E) liquidity : cash

25. SCOFF : DERISION ::
(A) soothe : mollification
(B) slander : repression
(C) swear : precision
(D) stimulate : appearance
(E) startle : speediness

4

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

My grandmother's notorious pugnacity did not confine itself to the exercise of authority over the neighborhood. There was also the defense of her house and her furniture against the imagined encroachments of visitors. With my grandmother, this was not the gentle and tremulous protectiveness of certain frail people who infer the fragility of all things from the brittleness of their own bones and hear the crash of mortality in the perilous tinkling of a teacup. No, my grandmother's sentiment was more autocratic: she hated having her chairs sat in or her lawns stepped on or the water turned on in her sinks, for no reason but pure administrative efficiency; she even grudged the mailman his daily promenade up her sidewalk. Her home was a center of power, and she would not allow it to be insulted by easy or democratic usage. Under her jealous eye, its social properties had withered and it functioned in the family structure simply as a political headquarters. Family conferences were held there, consultations with the doctor and the clergy; unruly grandchildren were brought there for a lecture or an interval of thought-taking; wills were read and loans negotiated. The family had no friends, and entertaining was held to be a foolish and unnecessary courtesy required only by the bonds of a blood relationship. Holiday dinners fell, as a duty, on the lesser members of the organization: sons and daughters and cousins respectfully offered up baked alaska on a platter, while my grandparents sat enthroned at the table, and only their digestive processes acknowledged the festal nature of the day.

26. The author's main purpose in this passage is to

(A) review childhood impressions and fears
(B) mourn the vanishing unity of the nuclear family
(C) create a vivid portrait of a strong personality
(D) revive the memory of a dimly recalled ancestor
(E) commend some of a grandmother's firmly held principles

27. It can be inferred from the passage that all of the following are characteristic of the author's grandmother EXCEPT

(A) desire for order
(B) pride in authority
(C) disdain for sentiment
(D) reluctance to compromise
(E) jealousy of youth

28. The tone of the passage is best described as

(A) sympathetic and sentimental
(B) restrained and cautious
(C) apathetic and aloof
(D) satirical and candid
(E) bitter and loathing

Mars revolves around the Sun in 687 Earth days, which is equivalent to 23 Earth months. The axis of Mars's rotation is tipped at a 25° angle from the plane of its orbit, nearly the same as the Earth's tilt of about 23° Because the tilt causes the seasons, we know that Mars goes through a year with four seasons just as the Earth does.

From the Earth, we have long watched the effect of the seasons on Mars. In the Martian winter, in a given hemisphere, there is a polar ice cap. As the Martian spring comes to the Northern Hemisphere, for example, the north polar cap shrinks and material in the planet's more temperate zones darkens. The surface of Mars is always mainly reddish, with darker gray areas that, from the Earth, appear blue green. In the spring, the darker regions spread. Half a Martian year later, the same process happens in the Southern Hemisphere.

One possible explanation for these changes is biological: Martian vegetation could be blooming or spreading in the spring. There are other explanations, however. The theory that presently seems most reasonable is that each year during the Northern Hemisphere springtime, a dust storm starts, with winds that reach velocities as high as hundreds of kilometers per hour. Fine, light-colored dust is blown from slopes, exposing dark areas underneath. If the dust were composed of certain kinds of materials, such as limonite, the reddish color would be explained.

29. It can be inferred that one characteristic of limonite is its

(A) reddish color
(B) blue green color
(C) ability to change colors
(D) ability to support rich vegetation
(E) tendency to concentrate into a hard surface

30. According to the author, seasonal variations on Mars are a direct result of the

(A) proximity of the planet to the Sun
(B) proximity of the planet to the Earth
(C) presence of ice caps at the poles of the planet
(D) tilt of the planet's rotational axis
(E) length of time required by the planet to revolve around the Sun

31. It can be inferred that, as spring arrives in the Southern Hemisphere of Mars, which of the following is also occurring?

(A) The northern polar cap is increasing in size.
(B) The axis of rotation is tipping at a greater angle.
(C) A dust storm is ending in the Southern Hemisphere.
(D) The material in the northern temperate zones is darkening.
(E) Vegetation in the southern temperate zones is decaying.

Heresy was a profoundly troublesome problem for Christians in twelfth- and thirteenth-century Europe. Heretics were those who deliberately dissented from accepted Christian belief and repudiated ecclesiastical authority in matters of faith. Differences in belief had disturbed the unity of the Christian Church from its beginning and had contributed to the split between Constantinople and Rome. But Western Christendom had never confronted a large-scale attack on its unity before the twelfth century. Essentially, the threat was a revival in a new form of Manichaeanism, an old heresy condemned by Church leaders in early medieval centuries. There had always been Christians who, from an orthodox point of view, had put too great an emphasis on the problem of evil. The Catharists, as the late-medieval Manichaeans were called, went even further and deified the principle of evil as an actual god of darkness. For them God was spirit and Satan was matter, and the two were engaged in a cosmic struggle in which humanity must take part. The body, particularly its sexual aspect, was to be denied. The *perfecti*, or leaders, were expected to live entirely without sin. For the mass of believers the chief duty was reverence toward the *perfecti*. Catharists rejected the Christian doctrine of the incarnation, believing that Christ could not have appeared in the corrupt human body. They also rejected the sacraments. In their religion there was one sacrament only, the *consolamentum*, a last absolution for sin usually administered just before death.

32. The passage is primarily concerned with presenting the
    (A) conflicts that led to the decline of the Middle Ages
    (B) difficulty Christianity has had with heresy throughout its history
    (C) origins of the belief in the split between mind and body
    (D) beliefs of the Catharists in relation to those of the established Western church
    (E) development of the Catharists from their predecessors, the Manichaeans

33. The author refers to Manichaeanism (line 12) chiefly in order to
    (A) contrast Manichaeans with the Catharists of the Middle Ages
    (B) define what is meant by heresy in the context of this discussion
    (C) emphasize that heresy has always been a problem for the Christian church
    (D) show that the beliefs of the Catharists had a precedent
    (E) demonstrate the consistency of the established Christian doctrine

34. It can be inferred that each of the following applies to the *perfecti* EXCEPT that they
    (A) received the veneration of their followers
    (B) enjoyed luxuries denied to their followers
    (C) rejected the sacrament of marriage
    (D) should not have had need of the *consolamentum*
    (E) were deeply concerned with spiritual matters

35. According to the passage, one way in which Catharist doctrine differed from accepted Christian belief was the Catharist notion that Christ
    (A) was not free from sin
    (B) demanded that humans live without pleasure
    (C) did not assume human form
    (D) rejected the performance of sacraments
    (E) overemphasized the problem of evil

4

Certain economists have criticized advertising as economically wasteful. Most of these attacks usually concentrate on competition in advertising. Other attacks focus on the relative cost of advertising as a percentage of sales. Sometimes an arbitrary percentage, such as 5 percent of total sales, is selected as the dividing line between "high" and more "reasonable" levels of expenditure. Such cutoff points are meaningless, however, since the proper relative expenditure for advertising is a function of the product's characteristics. It is not an accident that relative advertising costs are highest for low-priced items that are available from many retail outlets and are subject to frequent repeat purchases (for example, soaps, soft drinks, cigarettes, etc.).

Particularly criticized as wasteful are emotional appeals, persuasion, and "tug-of-war" advertising when it appears that their main effect is to shift sales among firms rather than to increase the total sales volume of the industry. In such cases, it has been charged that advertising departs from its main function, which is to inform consumers. However we must bear in mind that in a competitive economy such as ours, a company must try to persuade consumers to buy its goods rather than someone else's and that unsold goods are not being put to use.

Sometimes critics claim that if advertising succeeds in expanding the total demand for a product, the result is a shift of demand from other products, the producers of which will then be forced to advertise to attempt to recover their position. The net result of such "counter-advertising" is to add to costs and to prices. But all increases in demand do not necessarily represent a diversion from other products. Thus, an expanded demand for new products can be accompanied by an increase in income and in purchasing power flowing from their production.

Another claim is that advertising is wasteful because it is said to create useless or undesirable wants at the expense of things for which there is greater social need. When advertising makes consumers want and buy such products as powerful automobiles with fancy racing stripes and large, ostentatious swimming pools, critics argue, there is less money available to improve public hospitals, build better schools, or combat juvenile delinquency.

These criticisms of socially undesirable wants are value judgments reached by some economists on the basis of their own subjective standards. The real question is who is to decide what is good for consumers and what they should purchase? In a free economy, there is a wide diversity in opinion as to what combinations of goods and services should be made available. Each one of us must decide what purchases will yield the greatest satisfactions. We may be misled on occasion by popular fads, advertising, or even advice from friends. But these decisions, in the final analysis, are made by the buyers and not by the advertisers, as the latter have so often discovered to their regret.

36. The primary purpose of the passage is to

(A) criticize advertising as economically wasteful
(B) describe and discuss effective advertising strategies
(C) find fault with various arguments that have been made against advertising
(D) persuade consumers to pay more attention to advertising
(E) define and describe counteradvertising and the range of effects it has had

37. According to the fourth paragraph, some economists feel that certain products detract from the general well-being because they

(A) decrease the demand for public services
(B) cost the consumer more than they are worth
(C) are attractive to only a small segment of the public
(D) increase the necessity for businesses to employ expensive counteradvertising
(E) divert money that might have been spent on social improvements

GO ON TO THE NEXT PAGE

38. Which of the following best expresses the author's reaction to those who argue that advertising contributes to the formation of socially undesirable consumer demands?

(A) The critics do not independently formulate the criteria they employ.
(B) The arguments used by the critics are not based on appropriate standards.
(C) Too few economists have input in determining what the ideal components of a desirable market should be.
(D) The theories of these critics cannot predict trends in the popularity of a product.
(E) Businesses are not likely to spend too much money on ineffective advertising.

39. The author apparently feels that which of the following is most important for our economy?

(A) Laws that regulate advertising
(B) A better understanding of advertising strategies
(C) Freedom for advertisers and consumers
(D) A better evaluation of consumer needs
(E) Objective standards for rating the quality of goods

40. With which of the following statements about marketing would the author most probably agree?

I. Emotional appeal does not necessarily constitute an unfair advertising practice.
II. Buyers should be allowed to choose the kinds of products they want to purchase.
III. The consumer needs to be legally protected against certain forms of advertising.

(A) I only
(B) II only
(C) III only
(D) I and II only
(E) II and III only

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 5

Time—30 minutes

35 QUESTIONS

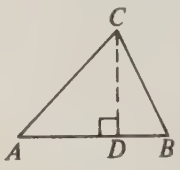

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

---

1. If $\frac{9}{5} + \frac{x}{5} = 2$, then $x =$

   (A) 0 (B) 1 (C) 2 (D) 3 (E) 4

2. A triangle with sides of lengths 4, 8, and 9 has the same perimeter as an equilateral triangle with side of length

   (A) $5\frac{1}{2}$ (B) 6 (C) $6\frac{1}{2}$ (D) 7 (E) $7\frac{1}{2}$

3. If $x = \frac{y}{5}$ and $10x = 14$, then $y =$

   (A) 28
   (B) 14
   (C) 7
   (D) 5
   (E) 2

4. If 14 is 5 more than x and 12 is 3 less than y, then $x - y =$

   (A) 24 (B) 6 (C) 0 (D) -2 (E) -6

5. The memory capacity of one microcomputer is 4K bytes, whereas a larger computer has a memory capacity of 32K bytes (K = 1,024). The memory capacity of the larger computer is how many times that of the smaller?

   (A) 6
   (B) 6K
   (C) 8
   (D) 8K
   (E) 28

6. A set of numbers P is called "heavier" than a set of numbers Q if every number in P is exactly twice some number in Q. If $P = \{2, 6, 10, 14\}$, then P is "heavier" than which of the following?

   (A) $\left\{\frac{1}{2}, \frac{3}{2}, \frac{5}{2}, \frac{7}{2}\right\}$

   (B) $\{1, 2, 3, 4\}$

   (C) $\{1, 3, 4, 7\}$

   (D) $\{1, 3, 5, 7\}$

   (E) $\{4, 12, 20, 28\}$

7. In a certain city, the average (arithmetic mean) of the high temperature readings for four days was 63°F. If the high temperature readings on the first three days were 62°F, 56°F, and 68°F, respectively, what was the high reading on the fourth day in degrees Fahrenheit?

   (A) 70 (B) 66 (C) 63 (D) 62 (E) 58

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet blacken space

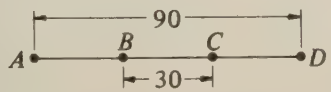

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

Notes: 1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● Ⓑ Ⓒ Ⓓ
E2.	 $180 - x$	y	Ⓐ Ⓑ ● Ⓓ
E3.	$p - q$	$q - p$	Ⓐ Ⓑ Ⓒ ●

	Column A	Column B
8.	0	0×2
9.	$a + 25$	$a - 5$

Note: Figure not drawn to scale.

On segment AD, length AB is not equal to length CD.

	Column A	Column B
10.	Length AC	Length BD

When a certain pitcher contains 3 cups of water, the pitcher contains half its capacity.

	Column A	Column B
11.	The capacity, in cups, of the pitcher	6 cups
12.	The cost of a stereo that is marked "15% off"	The cost of a television set that is marked "20% off"

	Column A	Column B
	$x = -2$ $y = 1$	
13.	The value of $3y^2 - 2x$	0

A triangle has angles with measures $x°$, $100°$, and $z°$.

	Column A	Column B
14.	90	x
15.	$a(b + c)$	$b + c$

$y = 2x + 3$
$x \geqq 0$

	Column A	Column B
16.	x	y

$\ell_1 \parallel \ell_2$

	Column A	Column B
17.	$x + 40$	y

$-1, 0, 1, -1, 0, 1, \ldots$

The numbers $-1, 0, 1$ repeat in a sequence as shown.

	Column A	Column B
18.	The 34th number in the sequence	0

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

	Column A	Column B
19.	A speed of one meter per second	A speed of 60 meters per hour

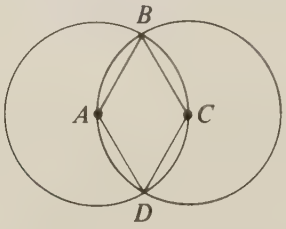

The sum of the three numbers in the column is equal to the sum of the three numbers in the row.

20.	x	w

The ratio of Tina's weight to Rita's weight is 3 : 2.
The ratio of Rita's weight to Maria's weight is 1 : 2.

21.	Tina's weight	Maria's weight

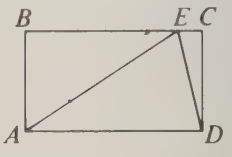

The two circles have centers A and C, respectively, and diameter of length x. B and D are the points of intersection of the two circles.

22.	Perimeter of quadrilateral $ABCD$	$2x$

$y > 2x - 1$
$x > y$

23.	x	1

	Column A	Column B

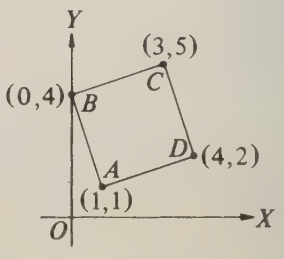

$ABCD$ is a rectangle.

24.	Perimeter of $\triangle ABE$	Perimeter of $\triangle AED$

$2n + 1$ is a multiple of 3 and n is a positive integer less than 10.

25.	n	5

26.	Area of square $ABCD$	10

x is called a "perfect hypercube" if $x = y^4$ and y is a positive integer.

27.	The number of perfect hypercubes less than 1,000	5

GO ON TO THE NEXT PAGE

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

28. The number of seniors at East High School is $\frac{2}{3}$ the number of juniors and the number of juniors is $\frac{3}{4}$ the number of sophomores. What is the number of seniors if the total enrollment for the three classes is 360 ?

(A) 160 (B) 120 (C) 100
(D) 80 (E) 60

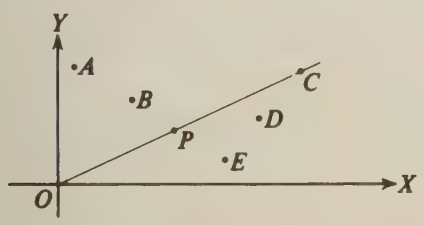

Questions 29-30 refer to the operation defined by the equation $a \oplus b = ab + a$.

29. $3 \oplus 4 =$

(A) 7
(B) 12
(C) 15
(D) 16
(E) 21

30. If $4 \oplus 6 = x \oplus 5$, then $x =$

(A) 3 (B) $\frac{14}{3}$ (C) $\frac{24}{5}$ (D) 5 (E) 6

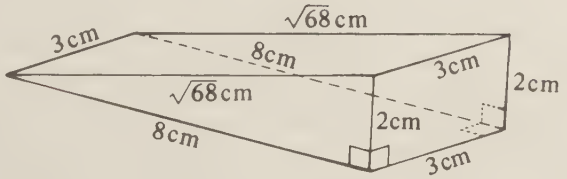

31. In the graph above, point P has coordinates (x, y). If $r > x > y > s$, which of the following points could have coordinates (r, s)?

(A) A (B) B (C) C (D) D (E) E

32. If $3 = b^x$, then $3b$ must equal

(A) b^{x+1}
(B) b^{x+2}
(C) b^{x+3}
(D) b^{2x}
(E) b^{3x}

33. If the wedge above is half of a rectangular solid, what is the total surface area of this wedge in square centimeters?

(A) $\sqrt{68} + 14$
(B) $\sqrt{68} + 46$
(C) $6\sqrt{68} + 14$
(D) $3\sqrt{68} + 46$
(E) $6\sqrt{68} + 46$

34. Jim is now twice as old as Polly. In 2 years Jim will be n years old. In terms of n, how old will Polly be then?

(A) $\frac{n}{2}$
(B) $\frac{n}{2} + 1$
(C) $\frac{n}{2} + 2$
(D) $n + 2$
(E) $2n$

35. The price of a shirt, after it was reduced 20 percent, was P dollars. What was the price of the shirt before the reduction?

(A) \$1.80P (B) \$1.25P (C) \$1.20P
(D) \$0.80P (E) \$0.75P

DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 6

Time—30 minutes

50 QUESTIONS

The questions in this section measure skills that are important to writing well. In particular, they test your ability to recognize and use language that is clear, effective, and correct according to the requirements of standard written English, the kind of English found in most college textbooks.

Directions: The following sentences contain problems in grammar, usage, diction (choice of words), and idiom.

Some sentences are correct.
No sentence contains more than one error.

You will find that the error, if there is one, is underlined and lettered. Assume that elements of the sentence that are not underlined are correct and cannot be changed. In choosing answers, follow the requirements of standard written English.

If there is an error, select the one underlined part that must be changed to make the sentence correct and blacken the corresponding space on your answer sheet.

If there is no error, blacken answer space (E).

EXAMPLE:

The region has a climate so severe that (A) plants growing there (B) rarely had been (C) more than twelve inches high. (D) No error (E)

SAMPLE ANSWER

(A) (B) ● (D) (E)

1. Most people listen to the weather forecast every day, but they know hardly nothing about (A) (B) (C) the forces that influence (D) the weather. No error (E)

2. Him (A) and the other (B) delegates immediately (C) accepted the resolution drafted by (D) the neutral states. No error (E)

3. The foundations of (A) psychoanalysis were established by Sigmund Freud, who begun (B) to develop (C) his theories in (D) the 1880's. No error (E)

4. Charter flights, although (A) much less (B) expensive than scheduled travel, is (C) well known for late takeoffs and other (D) inconveniences. No error (E)

5. Many women reenter the job market when (A) their (B) youngest (C) children started (D) kindergarten. No error (E)

6. After facing (A) so many groups of angry people, Martin Luther King, Jr. became accustomed to (B) confrontations that were (C) unpredictable and even (D) potentially explosive. No error (E)

GO ON TO THE NEXT PAGE

7. During (A) the early Middle Ages, before the development of the printing press, virtually (B) the only books were those (C) that are laboriously (D) copied by monks. No error (E)

8. The decision that has just been (A) agreed with (B) by the committee members should serve as a basis for their (C) work in the years to come (D). No error (E)

9. In her novels, Nella Larson focused on (A) the problems of young black women which (B) lived in (C) Europe and America during (D) the 1920's. No error (E)

10. As general supervisor, Ms. Rodríguez expects (A) her staff to work (B) as carefully and as hard (C) the way (D) she herself does. No error (E)

11. People who dislike cats sometimes (A) criticize them for being (B) aloof and independent; people who are fond of (C) cats often admire them for (D) the same qualities. No error (E)

12. Only a few feet (A) beyond (B) those abandoned and crumbling (C) buildings stand (D) a beautiful cluster of weeping willow trees. No error (E)

13. In contrasting to (A) the popular view, the characteristic way of life of many (B) Native American peoples was (C) neither nomadic nor (D) warlike. No error (E)

14. Until recently (A), Americans drank (B) five cups of coffee for every (C) cup of tea, but now they are drinking more of it (D). No error (E)

15. All our neighbors are wondering what (A) the government will do (B) about the raising (C) gasoline prices and the shortage of (D) oil. No error (E)

16. There are (A) certain areas of (B) the southern United States where (C) snow has never fallen (D). No error (E)

17. When (A) Pelé was playing (B) soccer, he was as talented as, or more talented than (C), baseball or basketball (D). No error (E)

18. The needs of children often (A) are not taken (B) into account (C) in the design of public buildings nor (D) residential areas. No error (E)

GO ON TO THE NEXT PAGE

19. In a recent (A) created wildlife refuge, the birds are now building (B) their (C) nests, thereby greatly changing (D) the ecology of the area. No error (E)

20. Because (A) flashes of light distract them, entertainers often request (B) that people with a camera (C) refrain from (D) taking pictures during performances. No error (E)

21. Color blindness may handicap one (A) in some respects, but you can (B) still function normally (C) in almost (D) all situations you encounter. No error (E)

22. Rising at a rate of (A) (B) ten inches per hour, the Red River soon posed (C) a serious threat to the residents (D) of the valley. No error (E)

23. Astronomy and astrology are both (A) concerned in (B) the heavenly bodies, but their (C) purposes and methods are quite different (D). No error (E)

24. As the discussion between (A) the two candidates continued, they spoke (B) more and more loudly (C) and with less and less (D) dignity. No error (E)

25. The doctor lived in (A) the tropics for (B) three years before (C) he was inflicted by (D) malaria. No error (E)

GO ON TO THE NEXT PAGE

Directions: In each of the following sentences, some part or all of the sentence is underlined. Below each sentence you will find five ways of phrasing the underlined part. Select the answer that produces the most effective sentence, one that is clear and exact, without awkwardness or ambiguity, and blacken the corresponding space on your answer sheet. In choosing answers, follow the requirements of standard written English. Choose the answer that best expresses the meaning of the original sentence.

Answer (A) is always the same as the underlined part. Choose answer (A) if you think the original sentence needs no revision.

EXAMPLE:

Laura Ingalls Wilder published her first book and she was sixty-five years old then.

(A) and she was sixty-five years old then
(B) when she was sixty-five years old
(C) at age sixty-five years old
(D) upon reaching sixty-five years
(E) at the time when she was sixty-five

SAMPLE ANSWER

Ⓐ ● Ⓒ Ⓓ Ⓔ

26. Because dodo birds could not fly, so they were killed by the hogs and monkeys brought to the islands by the explorers.

(A) fly, so they were killed
(B) fly, they were killed
(C) fly and they were killed
(D) fly, and this allowed them to be killed
(E) fly, killing them

27. Performing before an audience for the first time, fear suddenly overcame the child and she could not remember her lines.

(A) fear suddenly overcame the child and she could not remember her lines
(B) the lines could not be remembered by the child because she was overcome by fear
(C) the child was suddenly overcome by fear and could not remember her lines
(D) the child was suddenly overcome by fear, she could not remember her lines
(E) suddenly the child was overcome by fear, and consequently not remembering her lines

28. Young people are not rejecting marriage, but some postponing it.

(A) some postponing it
(B) some are postponing it
(C) it is postponed by some of them
(D) it is being postponed
(E) some having postponed it

29. Violin makers know that the better the wood is seasoned, the better the results for the tone of the instrument.

(A) better the results for the tone of the instrument
(B) better the tone of the instrument
(C) better the result is for the instrument's tone
(D) resulting tone will be better
(E) result will be a better instrument tone

30. Although today many fabrics are made from synthetic fibers, at one time all natural fibers were used in their manufacture.

(A) all natural fibers were used in their manufacture
(B) all fabrics were made of natural fibers
(C) they were making them all of natural fibers
(D) they made fabrics all of natural fibers
(E) their manufacture was of all natural fibers

31. Between three and four per cent of all children born with hearing defects serious enough to require medical treatment.

(A) born with hearing defects
(B) being born with hearing defects that are
(C) are born with hearing defects
(D) are born with hearing defects, these are
(E) born with hearing defects which are

32. Issued in Great Britain in 1840, the first gummed postage stamp in history was known as the "Penny Black."

(A) the first gummed postage stamp in history was known as
(B) they called the first gummed postage stamp in history
(C) history refers to the first gummed postage stamp as
(D) was the first gummed postage stamp in history,
(E) the first gummed postage stamp in history being known as

33. A number of parents are concerned about the protection of high school athletes and the many injuries being reported.

(A) athletes and the many injuries being reported
(B) athletes and numerous reports of injuries
(C) athletes because of reports of numerous injuries
(D) athletes, but many injuries are being reported
(E) athletes, numerous injuries have been reported

34. Many inferior films earn a great deal of money for their producers, some extremely good ones do not.

(A) Many inferior films earn
(B) Many an inferior film earns
(C) With many inferior films which earn
(D) However, many inferior films earn
(E) Although many inferior films earn

35. Gas rationing would force consumers to use their cars less, use public transportation more, while conserving gasoline.

(A) while conserving
(B) as well as conserving
(C) conserving
(D) and thereby conserve
(E) to conserve

36. Dolphins have a basic social organization, a system of communication, and their brains are highly developed.

(A) and their brains are highly developed
(B) and highly developed brains
(C) with highly developed brains
(D) while their brains are developed highly
(E) but their brains are developed highly

37. The Romans built many magnificent aqueducts and roads, they were truly the great engineers of the ancient world.

(A) roads, they were truly the great
(B) roads, consequently they were truly the great
(C) roads and as a consequence, they were truly the greatest
(D) roads; truly the great
(E) roads; they were truly the great

38. The Japanese began their remarkable postwar recovery, but they were able to recover from the psychological effects of the war.

(A) recovery, but they were
(B) recovery, where they were
(C) recovery only when they were
(D) recovery only when being
(E) recovery because it was

39. For success in sports, it is important not only to be in good physical condition but also to know the rules of the game.

(A) to be in good physical condition but also to know
(B) being in good physical condition but also to know
(C) to be in good physical condition but also knowing
(D) being in good physical condition but also knowing
(E) that one be in good physical condition but also that you know

40. Founded in 1910, the Urban League was established and has continuously had for its purpose the aim of assisting blacks who live in large cities.

(A) was established and has continuously had for its purpose the aim of
(B) was established to aim in the purpose of
(C) has continuously had for its purpose the aim of
(D) has always aimed at
(E) was with the purpose of

Note: The remaining questions are like those at the beginning of the section.

Directions: For each sentence in which you find an error, select the one underlined part that must be changed to make the sentence correct and blacken the corresponding space on your answer sheet.

If there is no error, blacken answer space (E) .

EXAMPLE:

The region has a climate so severe that (A) plants growing there (B) rarely had been (C) more than twelve inches high. (D) No error (E)

SAMPLE ANSWER

(A) (B) ● (D) (E)

41. Idealists are not always (A) as ignorant of (B) realities as his (C) critics would like to (D) believe. No error (E)

42. Once an (A) Italian colony, Eritrea was captured (B) by the British in 1941 and was united with (C) Ethiopia in the early (D) 1950's. No error (E)

43. More women (A) are competing in athletics (B) as new (C) opportunities for training develop and as sports programs will expand (D). No error (E)

44. Mayor Jameson was eager (A) to demonstrate (B) that she was not prejudiced in favor of any particular political groups and (C) residents of (D) specific areas of the city. No error (E)

45. In any lively (A) debate, there is (B) at least two sides to (C) an issue and five arguments for every (D) point of view presented. No error (E)

46. After she had spoke (A) for fifteen minutes, the senator answered candidly (B) the questions asked by the reporters, whose (C) skepticism was (D) obvious. No error (E)

47. Demonstrating new products is (A) a more expensive but more effective (B) sales technique than merely talking (C) about them (D). No error (E)

48. Moscow's city officials plan doubling (A) the size of the city's subway system, which already includes (B) more than (C) one hundred miles of (D) track. No error (E)

49. The speaker argued that neither industry nor (A) government have taken (B) full responsibility for reducing (C) the spiral of inflation (D). No error (E)

50. The average taxpayer waits until April to file (A) a tax return unless (B) they expect (C) to receive a refund of considerable size (D). No error (E)

S T O P

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY.
DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

How to Score the Practice Test

Before you can find out what your scores are on the College Board 200 to 800 scale, you need to determine your SAT verbal and mathematical, and TSWE raw scores. The steps for doing so for each section of the test and a scoring worksheet are provided below. Use the table on page 64 to check your correct and incorrect answers for each section.

Determining Your Raw Scores

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for section 1 and record this number in the space provided on the worksheet. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for section 4 and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for section 2 and record the numbers in the spaces provided on the worksheet. To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35)* in section 5 and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27)* in section 5 and record the numbers in the spaces provided on the worksheet. To determine subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

TSWE: Section 6

Step A: Count the number of correct answers for section 6 and record the number in the space provided on the worksheet. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine your unrounded raw score, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{total unrounded raw score}$$

Step B: To obtain B, your raw TSWE score, round A to the nearest whole number. (For example, any number from 34.50 to 35.49 rounds to 35.) Enter the resulting figure on the worksheet.

SCORING WORKSHEET FOR THE PRACTICE TEST

SAT-Verbal Sections

A. Section 1: _____ (no. correct) − 1/4 (_____ no. incorrect) = _____ subtotal A

B. Section 4: _____ (no. correct) − 1/4 (_____ no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw verbal score (Rounded to nearest whole number) _____ D

SAT-Mathematical Sections

A. Section 2: _____ (no. correct) − 1/4 (_____ no. incorrect) = _____ subtotal A

B. Section 5: Questions 1 through 7 and 28 through 35 (5-choice) _____ (no. correct) − 1/4 (_____ no. incorrect) = _____ subtotal B

C. Section 5: Questions 8 through 27 (4-choice) _____ (no. correct) − 1/3 (_____ no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw math score (Rounded to nearest whole number) _____ E

TSWE

A. Section 6: Total unrounded raw score _____ (no. correct) − 1/4 (_____ no. incorrect) = _____ A

B. Total rounded raw TSWE score (Rounded to nearest whole number) _____ B

ANSWERS TO PRACTICE TEST QUESTIONS AND PERCENTAGE OF STUDENTS ANSWERING EACH QUESTION CORRECTLY

Notes: The percentages for the SAT-verbal and SAT-mathematical sections are based on the analysis of the answer sheets for a random sample of juniors and seniors who took this test in November 1982 and whose mean scores were 434 on the SAT-verbal sections and 473 on the SAT-mathematical sections.

The percentages for TSWE are based on the analysis of the answer sheets for a random sample of all students who took this test in April 1981 and whose mean score was 43.

*Question 44 in Section 6 in the edition of the TSWE administered on April 4, 1981, was not counted in computing scores. In the practice test in this book, this question is printed as it appears in a later edition.
