SECTION 1

Time—30 minutes

45 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. HUMANE: (A) mutinous (B) brutal (C) misty (D) lavish (E) proud

2. SERVICEABLE: (A) informal (B) useless (C) impure (D) unfamiliar (E) temporary

3. SCOFF AT: (A) impose on (B) follow up (C) quarrel with (D) get away with (E) speak highly of

4. DILUTE: (A) concentrate (B) infiltrate (C) extricate (D) excavate (E) accelerate

5. CONVERGE: (A) avoid (B) stop (C) wind down (D) move apart (E) fall behind

6. JEOPARDIZE: (A) hasten (B) exaggerate (C) shelter (D) turn aside (E) melt away

7. ABHOR: (A) confuse (B) shout (C) advise (D) unite (E) admire

8. DISSUADE: (A) explain (B) argue (C) address (D) detail (E) induce

9. AUGMENT: (A) immobilize (B) reduce (C) parody (D) irritate (E) hide

10. VERDANT: (A) false (B) unlikely (C) moist (D) unclear (E) barren

11. AMASS: (A) err (B) squander (C) prolong (D) conceal (E) beautify

12. EPHEMERAL: (A) numerical (B) timeless (C) methodical (D) peerless (E) fearful

13. EXTRANEOUS: (A) intermediate (B) inaccessible (C) relevant (D) intermittent (E) effective

14. FURTIVE: (A) flagrant (B) refined (C) confused (D) creative (E) inquisitive

15. INNOCUOUS: (A) indigent (B) restrained (C) ambitious (D) injurious (E) understandable

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ---, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. Although few in number, women in Congress have had ---- impact on a variety of issues.

(A) an arbitrary
(B) a negligible
(C) a substantial
(D) a minor
(E) an inadvertent

17. As a scientist, Leonardo da Vinci was capable of ----, but his mistakes are remarkably few in light of his ---.

(A) error. .accomplishments
(B) artistry. .failures
(C) genius. .works
(D) trivia. .lapses
(E) innovation. .achievements

18. In a recent biography of this renowned millionaire, the subject emerges as a --- and gentle man, proving that money does not necessarily ----.

(A) lonely. .alienate
(B) perceptive. .enlighten
(C) generous. .corrupt
(D) dignified. .ennoble
(E) headstrong. .liberate

19. Goodrich's summary of the aims of modern science is so --- as to be useless; he seems to consider everything and its opposite to be aims.

(A) unobtrusive (B) discriminatory (C) generalized (D) skeptical (E) practical

20. Drake hungered for riches, and with this --- came a ruthless capacity for action.

(A) indolence (B) avarice (C) aversion (D) irresolution (E) fantasy

1

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

Beowulf, the greatest extant work composed in Old English, is thought to have been written in England during the first half of the eighth century A.D. It is a historical poem about the pagan past, or an attempt at one—literal historical fidelity founded on modern research was, of course, unknown at the time. It is a poem by a learned Christian writing of earlier times, who, looking back on the heroism and sorrow, feels in them something permanent and something symbolical.

Nearly all the censure, and most of the praise, that has been bestowed on *Beowulf* has been due either to the belief that it was something that it was not—for example, primitive, pagan, an allegory (political or mythical), or most often, an epic; or to disappointment at the discovery that it was itself and not something that the scholar would have liked better—for example, a heathen heroic ballad, a history of Sweden, a manual of Germanic antiquities, or a statement of Nordic theology.

The pitfalls of such an approach to *Beowulf* are best expressed in an allegory. A man inherited a field in which there was an accumulation of old stone, part of an old hall. Of the old stone, some had already been used in building the house in which the man actually lived, not far from the old house of his ancestors. Of the rest, the man took some and built a tower. But when his friends came, they perceived at once (without troubling to climb the steps) that these stones had formerly belonged to a more ancient building. So they pushed the tower over, with no little labor, in order to look for hidden carvings and inscriptions, or to discover when the man's distant ancestors had obtained their building material. Some, suspecting a deposit of coal under the soil, began to dig for it and forgot even the stones. They all said: "This tower is most interesting." But they also said (after pushing it over): "What a muddle it is in!" And even the man's own descendants, who might have been expected to consider what he had been about, were heard to murmur: "He is such an odd fellow! Imagine his using these old stones just to build a nonsensical tower! Why did he not restore the old house? He had no sense of proportion." But from the top of that tower the man had been able to look out upon the sea.

21. Which of the following would be the most appropriate title for the passage?

(A) *Beowulf*: An Anglo-Saxon Masterpiece
(B) *Beowulf* As Allegory
(C) How Not to Read *Beowulf*
(D) The Historical Accuracy of *Beowulf*
(E) The Tower in *Beowulf*

22. According to the passage, the author of *Beowulf* saw the past as

(A) needing to be preserved in the most minute detail possible
(B) leading naturally to Christian beliefs of the eighth century
(C) possessing something valuable for people of all times
(D) demonstrating a violence that has since vanished
(E) containing a complex and fascinating literature

23. In the allegory, it can be inferred that the man who built the tower represents

(A) the author of the passage
(B) one of the scholars who criticize *Beowulf*
(C) the poet who wrote *Beowulf*
(D) the main character of *Beowulf*
(E) the poem *Beowulf* itself

24. Which of the following statements best expresses the message of the allegory?

(A) Scholarly research always does more harm than good.
(B) The best way to understand a work of art is to take it apart and examine the pieces.
(C) Art should be practical and not merely enjoyable.
(D) Those who focus on their own interests often miss the point of a work of art.
(E) Only works of art that are entirely original will last.

25. The author's attitude toward the *Beowulf* critics described in the passage is one of

(A) tolerant acceptance
(B) grudging admiration
(C) unallayed suspicion
(D) gentle mockery
(E) lofty indifference

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

Tuberculosis, measles, chicken pox, mumps, and influenza constitute a roster of infectious diseases with which people of traditional urban societies remain well acquainted. For all these diseases except tuberculosis and influenza, a single case of illness forms antibodies in the bloodstream that give the individual prolonged, often lifelong, immunity. As a result, these diseases have most commonly afflicted children, and continue to do so where vaccinations and other artificial methods have not altered the natural patterns of disease propagation. In traditional urban societies, such childhood diseases need not be very serious, in the sense that nursing care can usually assure recovery. When a given population has adapted sufficiently to survive the childhood diseases that can only persist among large, concentrated human populations, it has acquired a very potent biological weapon. For these same infections, when invading a human population without any previous exposure to them, are likely to kill a high proportion of those who fall sick. Infections in all populations usually manifest their greatest virulence among young adults, owing, some doctors believe, to excessive vigor in this age-group's antibody reactions to the invading disease organism. Epidemic population losses within the twenty-to-forty age bracket are obviously far more damaging to society at large than comparably numerous destruction of either the very young or the very old. If an initial exposure of a society to one unfamiliar infection is swiftly followed by similarly destructive exposure to others, the structural cohesion of the community is almost certain to collapse.

Historians studying political and social changes brought about by invasions and military campaigns have found that epidemiologists can shed considerable light on their work. The disruptive effect of an epidemic on a population without immunities is likely to be even greater than the actual loss of life, severe as that may be. Often survivors are demoralized and lose all faith in age-old customs and beliefs that had not prepared them for such a disaster. For example, there were significant psychological and social consequences of the medical fact that a smallpox epidemic arrived in Mexico with the Spaniards and decimated the Aztec population during the conquest. An unknown disease that killed only Aztecs and left the invaders unharmed seemed to show a partiality that could only be explained by both parties as supernatural, and that circumstance left little room for doubt about which side of the struggle enjoyed divine favor. The religions, priesthoods, and ways of life built around the traditional Aztec gods were unable to compete with such a demonstration of the impressive power of the god worshipped by the Spanish.

26. Which of the following is the most suitable title for this passage?

(A) New Forms of Old Diseases
(B) Childhood Diseases in the New World
(C) Effects of Infection on Ancient Civilizations
(D) The Epidemic as a Force in Social Change
(E) Invasions, Conquests, and Mortality

27. The author focuses on the interaction between infectious diseases and human populations in order to show that the relationship

(A) has been overemphasized by public health agencies
(B) is responsible for the development of traditional urban societies
(C) can have political and social repercussions
(D) reveals novel aspects of human physiology
(E) must be appreciated before civilization can advance

28. According to the passage, which of the following is true when an infectious disease has been present in a population for a long time?

(A) A large portion of the population has developed long-term immunity.
(B) The population has had little or no contact with the diseases of neighboring populations.
(C) The percentage of 20 to 40 year olds in the population becomes disproportionately small.
(D) Standards of nursing care are not very high.
(E) The social structure has recently been drastically altered.

29. Which of the following is implied by the statement about the Aztec religious institutions being "unable to compete" (line 54) with the Spanish god?

(A) The Spanish missionaries were extraordinarily persuasive.
(B) The Aztec society enthusiastically adopted Spanish values.
(C) The epidemic did not appear to affect the strength of the Aztecs.
(D) Neither the Aztecs nor the Spanish had elaborate religious rituals.
(E) The Aztecs and the Spanish thought immunity to a disease might indicate divine favor.

30. How is the second paragraph related to the first paragraph?

(A) It demonstrates the need for mass immunization against the diseases described in the first paragraph.
(B) It illustrates the historical significance of the medical principles described in the first paragraph.
(C) It challenges the assumption in the first paragraph that infections are not a major health hazard.
(D) It repeats the description given in the first paragraph of infectious disease among an affected population.
(E) It points out the need for more medical information about the contagious diseases described in the first paragraph.

1

Select the word or set of words that best completes each of the following sentences.

31. We were less offended by the irate professor's ---- than we were curious about how he had gained this familiarity with a stevedore's vocabulary.

(A) profanity (B) apathy (C) sophistry
(D) pretentiousness (E) punctiliousness

32. The indigenous inhabitants of America have been called "Indians" thanks to one of the greatest ---- ever to be ---- by history: when Columbus discovered the New World, he thought he had reached India.

(A) enigmas. .foreshadowed
(B) misnomers. .obliterated
(C) predictions. .immortalized
(D) misapprehensions. .hallowed
(E) truths. .contradicted

33. Although aware of the hazards of extrapolating a life-style from a bone fragment or the reconstruction of a skull, most anthropologists by the nature of their work are inclined to indulge in ----.

(A) indecision (B) pessimism (C) reticence
(D) skepticism (E) speculation

34. Considering the ---- of Juan Rulfo's published works and their enduring influence, we can conclude that few other writers have ---- so much in so few pages.

(A) abstruseness. .divulged
(B) paucity. .contributed
(C) immaturity. .developed
(D) vituperation. .experienced
(E) realism. .printed

35. Such a solemn, almost ---- tone is not really appropriate for this biography because, although its subject experienced many misfortunes, she strongly believed in the value of ----.

(A) reverent. .accuracy
(B) pompous. .catharsis
(C) lugubrious. .levity
(D) supercilious. .fatalism
(E) incongruous. .candor

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. STANZA : POEM :: (A) prose : story
(B) rhyme : proverb (C) climax : play
(D) comedy : tragedy (E) chapter : novel

37. ISOLATE : APART :: (A) agitate : lengthy
(B) refrigerate : cool (C) duplicate : alone
(D) concentrate : active (E) regulate : large

38. PATENT : INVENTOR ::
(A) advertisement : merchant
(B) money : customer
(C) copyright : author
(D) monopoly : consumer
(E) novelty : journalist

39. SUGARCOATING : TASTE :: (A) analysis : thought
(B) eyelid : sight (C) static : sound
(D) perfume : smell (E) regret : pleasure

40. LETTER : CORRESPONDENCE ::
(A) hunger : nutrition (B) invitation : loneliness
(C) bell : silence (D) lock : entry
(E) comment : dialogue

41. STRUT : VANITY :: (A) flaunt : humility
(B) swagger : pride (C) amble : determination
(D) cringe : dignity (E) simper : greed

42. QUIP : CLEVER :: (A) insult : derogatory
(B) hint : tactless (C) plea : superficial
(D) pledge : truthful (E) complaint : valid

43. STALEMATE : VICTORY ::
(A) strategy : diplomacy (B) bias : impartiality
(C) majority : election (D) satisfaction : peace
(E) leadership : battle

44. SEQUESTER : JURY :: (A) eradicate : problem
(B) quarantine : patient (C) elect : politician
(D) liquidate : opponent (E) evacuate : city

45. DESPOT : RULER ::
(A) counselor : potentate (B) teller : banker
(C) peasant : duchess (D) magnate : businessman
(E) anarchist : authority

DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 2

Time—30 minutes

25 QUESTIONS

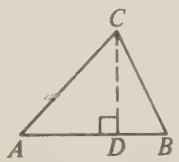

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.
If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

---

1. If $6 - x = 0$, then $10 - x =$

   (A) 16 (B) 10 (C) 6 (D) 4 (E) 0

2. Joe buys a tennis racket and one can of tennis balls for \$38. Mary buys the same-priced racket and two cans of the same-priced tennis balls for \$41. How much does one of these rackets cost?

   (A) \$33
   (B) \$34
   (C) \$35
   (D) \$36
   (E) \$37

3. Kim was k years of age 2 years ago. In terms of k, how old will Kim be 2 years from now?

   (A) $k + 4$ (B) $k + 2$ (C) $2k$
   (D) k (E) $\dfrac{k}{2}$

4. Club A has 10 members and Club B has 15. If a total of 21 people belong to the two clubs, how many people belong to both clubs?

   (A) 3
   (B) 4
   (C) 5
   (D) 6
   (E) 7

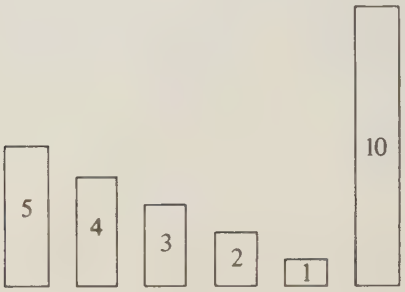

5. In the figure above, what is the area of the shaded region?

   (A) 21 (B) 24 (C) 25 (D) 28 (E) 32

GO ON TO THE NEXT PAGE

6. If $x - y = 7$, what is the value of $x^2 - y^2$?

(A) 0
(B) 14
(C) 49
(D) 98
(E) It cannot be determined from the information given.

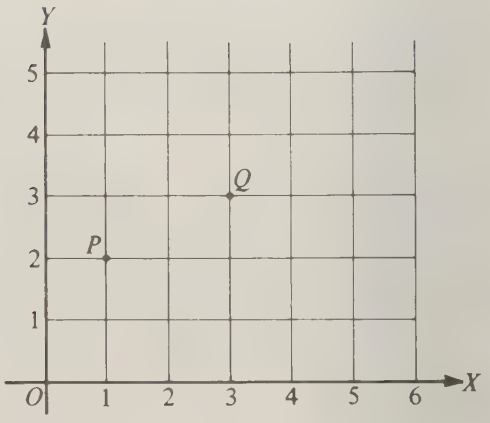

7. The figure above represents six containers whose capacities, in gallons, are shown. The 5-gallon container is full of vinegar and the rest are empty. The contents of the 5-gallon container are used to fill the 4-gallon container and the excess is poured into the 10-gallon container. The 4-gallon container is then used to fill the 3-gallon container and the excess is poured into the 10-gallon container. The process is repeated until all containers are empty except the 1-gallon and 10-gallon containers. What percent of the 10-gallon container is filled?

(A) 4% (B) 6% (C) 40%
(D) 60% (E) 140%

---

8. If the product of the digits of a two-digit number is odd, then the sum of those digits must be

(A) even
(B) odd
(C) less than or equal to 5
(D) greater than 5 and less than 10
(E) 18

9. If a right triangle is drawn on the grid above with PQ as the hypotenuse, which of the following could be the coordinates of the vertex of the right angle?

(A) (1,4) (B) (2,1) (C) (2,4)
(D) (3,1) (E) (3,2)

---

10. If $\sqrt{x}$ is a whole number, which of the following is NOT necessarily a whole number?

(A) $\frac{\sqrt{x}}{2}$ (B) x (C) x^2 (D) $2\sqrt{x}$ (E) x^3

11. The degree measures of the three angles of a triangle are p, q, and r, respectively. If p is the average (arithmetic mean) of q and r, then $p =$

(A) 30°
(B) 45°
(C) 60°
(D) 90°
(E) 120°

GO ON TO THE NEXT PAGE

Questions 12-13 refer to the figure above in which A, B, C, and D represent four of the digits from 1 to 9, inclusive, and $A + B = 10C + D$.

12. In the figure above, what does C represent?

(A) 1 (B) 4 (C) 6 (D) 8 (E) 10

---

13. Under the stated conditions, all of the following could be values of $A + B$ EXCEPT

(A) 12 (B) 14 (C) 16 (D) 17 (E) 22

---

14. If j, k, m, and n are positive integers and if $j > k$ and $m > n$, which of the following must be greater than zero?

I. $j - k$
II. $k - m$
III. $m \div n$

(A) I only (B) II only (C) I and III only
(D) II and III only (E) I, II, and III

15. A tank contains 33.6 liters of gasoline. The tank is emptied in 3 days. If $\frac{1}{7}$ of the gasoline is used the 1st day, twice that quantity is used on the 2nd day, and the rest is used on the 3rd day, how many liters were used on the 3rd day?

(A) 9.6
(B) 11.2
(C) 19.2
(D) 24.0
(E) 28.8

16. If N is a prime number greater than 9, then the sum of N, $2N$, and $4N$ is divisible by 1, N, and

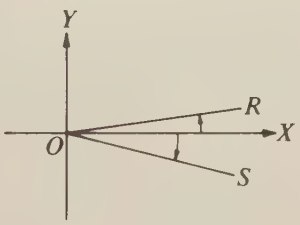

(A) 2
(B) 4
(C) 6
(D) 7
(E) 8

17. If $x = a - 4$ and $y = a + 5$, then $x - y$ is equal to which of the following?

(A) -9
(B) -1
(C) 1
(D) 9
(E) $2a + 1$

18. If 8 people are standing on the circumference of a circle, what is the LEAST number of people who must move so that all 8 will be standing in a straight line?

(A) 4
(B) 5
(C) 6
(D) 7
(E) 8

19. In the figure above, OR and OS start on OX and revolve simultaneously in the plane in opposite directions around point O. If OR revolves at 4° per second and OS at 7° per second, how many complete revolutions will OS have made when OR has made exactly 336 complete revolutions?

(A) 192
(B) 448
(C) 588
(D) 630
(E) It cannot be determined from the information given.

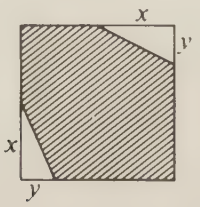

GO ON TO THE NEXT PAGE

20. P is the set of 8 consecutive integers whose sum is 4. Q is the set of 6 consecutive integers whose sum is 9. How many members of Q are members of P?

(A) None
(B) One
(C) Four
(D) Five
(E) Six

21. Of the 60 people in a room, $\frac{2}{3}$ are women and $\frac{2}{5}$ are smokers. What is the maximum number of women in the room who can be nonsmokers?

(A) 16
(B) 24
(C) 34
(D) 36
(E) 40

22. The square above has area $4x^2$. If a rectangle with width x has the same area as the shaded region shown, what is the length of the rectangle in terms of x and y?

(A) $x - y$ (B) $2x - y$ (C) $2x - 2y$
(D) $4x - 2y$ (E) $4x - y$

23. The average (arithmetic mean) age of Dave, Emily, and Frank is 12. The average age of Dave and Emily is 11, and the average age of Emily and Frank is 10. What is the average age of Dave and Frank?

(A) 10.5
(B) 11
(C) 12.5
(D) 13
(E) 15

24. Let $\lceil x \rceil$ be defined for all x by the equation $\lceil x \rceil = 3x + 1$. For example, $\lceil 5 \rceil = 16$.
If $\lceil 2 \rceil - \lceil x \rceil = x$, then $x =$
(A) 1
(B) $1\frac{1}{2}$
(C) 2
(D) $2\frac{1}{2}$
(E) 3

25. What is the ratio of the area of a rectangle with width w and length $2w$ to the area of an isosceles right triangle with hypotenuse of length w?

(A) $\frac{8}{1}$
(B) $\frac{4}{1}$
(C) $\frac{2}{1}$
(D) $\frac{1}{2}$
(E) $\frac{1}{4}$

S T O P

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 4

Time—30 minutes

40 QUESTIONS

For each question in this section, choose the best answer and blacken the corresponding space on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. MUTED: (A) done quickly (B) seen vaguely (C) turned under (D) made louder (E) kept clean

2. SHORTHANDED: (A) leisurely (B) lengthened (C) overstaffed (D) unrivaled (E) extraordinary

3. DISSECTION: (A) understanding (B) assembly (C) detection (D) preference (E) relationship

4. DEMENTED: (A) of doubtful origin (B) of sound mind (C) dangerous (D) fruitful (E) pliable

5. ACUITY: (A) sympathy (B) boldness (C) dullness (D) proper behavior (E) half-hearted decision

6. DISPUTATIOUS: (A) questionable (B) sincere (C) conciliatory (D) disappointing (E) inoperable

7. TRANSIENCE: (A) urgency (B) immaturity (C) unfamiliarity (D) everlastingness (E) falseheartedness

8. ANOMALOUS: (A) showing no emotion (B) holding as security (C) voicing no opinion (D) fitting a pattern (E) relating an event

9. VILIFICATION: (A) acclaim (B) activity (C) clear communication (D) acquisition of possessions (E) reduction in size

10. SURREPTITIOUS: (A) aboveboard (B) credible (C) vulnerable (D) highly successful (E) freely chosen

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ---, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. In the late nineteenth century, scientists were mystified by the schooling behavior of certain fish; today's marine biologists are still --- by the behavior of these fish.

(A) baffled (B) inspired (C) bored (D) frightened (E) convinced

12. Perhaps because they feel --- by the rules of school and society, many children long for an escape to another world.

(A) emancipated (B) nurtured (C) assuaged (D) intrigued (E) constricted

GO ON TO THE NEXT PAGE

13. Many artists maintained that the arts commission was guilty of discrimination because it not only ---- to appoint more minorities to policy-making positions but also attempted to ---- three female program directors.

(A) refused. .recruit (B) agreed. .promote
(C) tried. .fire (D) failed. .oust
(E) hesitated. .retain

14. The fact that poverty often ---- in highly industrialized areas may indicate that the condition is ---- by industrial progress itself.

(A) thrives. .thwarted (B) occurs. .engendered
(C) arrives. .threatened (D) recurs. .alleviated
(E) languishes. .encouraged

15. He has several talents that ---- the possibility of genius; however, no one of them is quite transcendent enough to ---- that possibility.

(A) preclude. .surpass
(B) intimate. .realize
(C) proclaim. .condone
(D) vindicate. .challenge
(E) verify. .disprove

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. BYSTANDER : EVENT :: (A) juror : verdict
(B) culprit : crime (C) tourist : journey
(D) spectator : game (E) model : portrait

17. GLACIER : ICE :: (A) rain : snow
(B) bay : ocean (C) cloud : storm
(D) river : water (E) pond : fish

18. STAR : CONSTELLATION :: (A) crew : airplane
(B) member : club (C) weather : forecast
(D) partner : associate (E) hymn : church

19. FULL-BLOWN : ROSE :: (A) withered : vine
(B) prolific : weed (C) fertile : field
(D) edible : corn (E) ripe : tomato

20. ACTOR : PLAYWRIGHT :: (A) editor : novelist
(B) competitor : mascot (C) collector : painter
(D) attorney : witness (E) soloist : composer

21. PARALLEL : MEET :: (A) opaque : see
(B) horizontal : span (C) eternal : end
(D) philosophical : judge (E) conventional : grow

22. RESPITE : DRUDGERY ::
(A) rumor : information
(B) malady : hygiene
(C) lull : conversation
(D) embarkation : navigation
(E) divorce : marriage

23. WAIVE : RIGHT :: (A) exercise : authority
(B) forgo : pleasure (C) inhibit : imagination
(D) release : feeling (E) denounce : country

24. INSIPID : FLAVOR ::
(A) concise : brevity (B) meticulous : care
(C) banal : triviality (D) inane : significance
(E) fortuitous : chance

25. EMBROIL : ARGUMENT :: (A) enlarge : picture
(B) fuel : resentment (C) raise : stake
(D) snare : net (E) conspire : defeat

GO ON TO THE NEXT PAGE

Each passage below is followed by questions based on its content. Answer all questions following a passage on the basis of what is stated or implied in that passage.

Lately it has become customary to equate wisdom with knowledge and knowledge with science. Hence science equals wisdom, and as we all need the latter, we must therefore all have the former. Nonsense. Science, whose truths depend on the social beliefs of the time and the cultural atmosphere in which they are created, is but one special and actually rather small part of knowledge. If you learned by heart all the non-scientific articles in an encyclopedia, you would indeed be a very knowledgeable person, though an unscientific one. Wisdom is a quite special condition, and one which all people should strive to attain if conditions on this planet are ever to improve. It has extraordinarily little to do with science.

Another confusion is that between logical, rational thought and science. Now science does require logic and rationality. But it has no monopoly on either. Logic and rationality are far older than science, and in many circumstances more useful. And they are required, along with inventiveness and ingenuity and creativity, to improve current conditions. But to say that only science can bring progress is to deny humanity its very essence—its ability to create, to invent, and to think. Human beings have always displayed these qualities, and will continue to do so. In fact, it is these qualities that bring about progress.

26. According to the passage, all of the following can be said of science EXCEPT:

(A) Science can contribute to knowledge.
(B) Science and knowledge are essentially the same.
(C) Science is not an absolutely objective pursuit.
(D) Science alone will not bring about progress.
(E) Scientific doctrines are subject to change.

27. The author's attitude toward those who equate science with progress is best described as

(A) dispassionate (B) contemptuous
(C) threatening (D) sympathetic
(E) complimentary

28. The author's statements about logic, rational thought, and science in the second paragraph support a belief that

(A) scientific thinking is only one area in which logic and rationality are valuable
(B) other disciplines are less effective and less beneficial than science
(C) logical reasoning is more useful than science because it is older
(D) the qualities of logic and rationality are often lacking in science
(E) logic and rational thought at times invalidate the findings of science

4

Elizabeth's father was fond of the country and of books; and from these tastes had risen his principal enjoyments. To his wife he was very little otherwise indebted, than as her ignorance and folly had contributed to his amusement. This is not the sort of happiness which a man would in general wish to owe to his wife; but where other powers of entertainment are wanting, the true philosopher will derive benefit from such as are given.

Elizabeth, however, had never been blind to the impropriety of her father's behavior as a husband. She had always seen it with pain; but respecting his abilities, and grateful for his affectionate treatment of herself, she endeavored to forget what she could not overlook, and to banish from her thoughts that continual breach of conjugal obligation and decorum which, in exposing his wife to the contempt of her own children, was so highly reprehensible. But she never felt so strongly as now the disadvantages which must attend the children of so unsuitable a marriage, nor ever been so fully aware of the evils arising from so ill-judged a direction of talents; talents which, rightly used, might at least have preserved the respectability of his daughters, even if incapable of enlarging the mind of his wife.

29. The passage suggests that the "powers of entertainment" that "are wanting" (lines 7-8) in the life of Elizabeth's father include

(A) amusement at the ignorance and folly of his wife
(B) the enjoyment he derives from books
(C) pleasure in his wife's company
(D) satisfaction from his social position
(E) pride in his children

30. The passage suggests that Elizabeth agrees with her father's opinion of

(A) the intellectual ability of his wife
(B) the disadvantages of marriage
(C) how a talented man should spend his time
(D) the example a father should set for his children
(E) how to preserve the reputation of children

31. The passage can best be described as

(A) a description of a disagreement between a woman and her parents
(B) an analysis of the reasons for the disintegration of a marriage
(C) an account of one woman's reflections on the problems in her parents' marriage
(D) a discussion of a young woman's attitude toward marriage
(E) a description of a foolish wife and mother

According to a listing in the twenty-fifth anniversary issue of *La Prensa*, a Spanish-language newspaper published in San Antonio, Texas, a total of 451 different Spanish-language newspapers were published in the United States between 1876 and 1937. These newspapers served the Hispanic communities as necessary vehicles for the exchange of news, information, and opinions. Their relative success or failure often mirrored the special effects on the Hispanic communities of general economic, cultural, and political forces in the United States at the time they were published. The short-run newspapers were especially sensitive to the ups and downs of the economy, but almost all of the Spanish-language newspapers were equally vulnerable to the Great Depression of the thirties.

One of the longest-lasting survivors in this highly competitive market was *La Prensa*, which had a solid commercial basis and depended on advertising sales for financial support. *La Prensa's* editor, Ignacio Lozano, consistently steered a course that was perceived as politically nonpartisan. The newspaper first appeared in 1913, with a political posture designed to be neutral and pacifistic at a time when the Mexican Revolution of 1910-1911 had left Hispanic communities in the United States wearied of continuing political hostilities. The appeal of the newspaper, whether intended or not, was based on its ability to project an image of a mediator and an agent of peace. This public view, in addition to a well-organized business approach, helped *La Prensa* survive stiff competition and economic crises.

Lozano, according to his biographer, carefully planned the focus of *La Prensa's* coverage. Whereas many newspapers tended to be biased in their coverage of developments in Mexico, or to concentrate on American news, Lozano insisted on objective reporting of the politics of the homeland. Subscribers wanted to read about developments brought about by the Revolution; many of the political exiles and refugees wanted to know about postwar conditions so that they could determine when they should return to Mexico. Lozano also allocated a section of the newspaper for announcements of local events, devoted a small section to literature, and included an abundance of advertising. Within its first year, *La Prensa* increased its circulation from 1,500 to 10,000 copies per issue and became a daily. In the 1920's, the newspaper had correspondents in Mexico City, New York City, and Paris. By 1926, it had begun publishing another newspaper in Los Angeles, *La Opinión*, had become a member of El Congreso Panamericano de Periodistas, an international association of journalists, and had joined a New York news service. This type of success helped *La Prensa* survive the Great Depression while other newspapers, both Spanish- and English-language, were going out of business.

32. Which of the following is the most appropriate title for the passage?

(A) The Success of *La Prensa*
(B) The Political Career of Ignacio Lozano
(C) *La Prensa*'s Coverage of the Mexican Revolution of 1910-1911
(D) The Effects of the Great Depression on Spanish-Language Newspapers
(E) The Influence of Spanish-Language Newspapers in Hispanic Communities

33. According to the passage, which of the following most strongly affected the financial well-being of Spanish-language newspapers?

(A) Fluctuations in the size of Hispanic communities
(B) Changing economic trends
(C) The types of commercial advertisements published
(D) The high quality of news reporting
(E) The outcome of the Mexican Revolution of 1910

34. The author seems to consider which of the following as LEAST important to the success of *La Prensa*?

(A) Its nonpartisan political image
(B) Its large number of advertisements
(C) Its publication of poetry and fiction
(D) Ignacio Lozano's editorial policies
(E) Ignacio Lozano's business sense

35. Which of the following can be inferred from the passage about the first several issues of *La Prensa*?

(A) The coverage of Mexican affairs was not as objective as Lozano wished.
(B) The circulation per issue was nearly 10,000 copies.
(C) The issues included reports from the paper's news correspondents around the world.
(D) The issues were not published every day of the week.
(E) The issues were printed in both Spanish and English.

36. The passage suggests that *La Prensa* was probably useful to all of the following members of the Hispanic community EXCEPT those

(A) interested in reading Hispanic views about domestic and foreign affairs
(B) wanting to read literature written in Spanish
(C) interested in information about events in the San Antonio area of Texas
(D) seeking to expand business dealings within the Hispanic community
(E) wanting to read editorials supporting a particular side in the Mexican Revolution

GO ON TO THE NEXT PAGE

A fissionable atom is one that, after capturing a neutron, will split, releasing energy and more neutrons. The only naturally occurring fissionable material that can serve as a fuel for an atomic reactor is the very rare uranium, U-235. The more plentiful U-238, however, can be converted into fissionable plutonium, which may then function as a fuel. This phenomenon has made possible the so-called breeder reactor. All that is needed is a supply of neutrons sufficient to continue a chain reaction and also to manufacture more plutonium from U-238. Plutonium (which is first made when U-238 captures high-energy neutrons from an initial charge of fissioning U-235) is the source of these neutrons, for when a plutonium atom captures a neutron, it fissions, yielding an average of 2.9 neutrons. One of these can be captured by another plutonium atom, thus sustaining the chain reaction, and most of the remainder can be captured by atoms of U-238. Thus the amount of fuel in a breeder reactor gradually increases.

Thorium may also be used in a breeding cycle because, when thorium captures a neutron, an atom of fissionable U-233 is formed. This latter atom functions similarly to plutonium except that it produces an average of only 2.3 neutrons per fission.

37. The passage is primarily concerned with

(A) defining what is meant when it is said that an atom is fissionable
(B) revealing that atoms of U-235 can be transformed into atoms of plutonium
(C) debating the social desirability of the use of breeder reactors
(D) discussing fission and the breeding cycles of certain fissionable materials
(E) proposing the thorium cycle as a preferred alternative to the plutonium cycle

38. According to the passage, an atom of which of the following substances, "after capturing a neutron, will split, releasing energy and more neutrons" (lines 1-2) ?

I. U-235
II. Plutonium
III. U-233

(A) I only (B) II only (C) I and III only
(D) II and III only (E) I, II, and III

39. The passage suggests that, when an atom of U-238 in a breeder reactor captures one of the neutrons released by fissioning plutonium atoms, which of the following happens to the atom of U-238 ?

(A) It fissions to become U-235.
(B) It fissions, releasing 2.9 neutrons.
(C) It is converted to plutonium.
(D) It is converted to a fissionable atom of U-233.
(E) It remains unchanged until more neutrons are captured.

40. The passage suggests that the elements in which of the following pairs operate analogously in their respective breeding cycles?

I. Thorium and plutonium
II. U-235 and thorium
III. Plutonium and U-233

(A) I only (B) II only (C) III only
(D) II and III only (E) I, II, and III

DO NOT WORK ON ANY OTHER SECTION IN THE TEST.

SECTION 5

Time—30 minutes

35 QUESTIONS

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

The following information is for your reference in solving some of the problems.

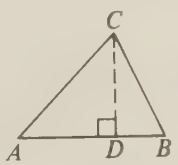

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$

The number of degrees of arc in a circle is 360.

The measure in degrees of a straight angle is 180.

Definitions of symbols:

$=$	is equal to	$\leqq$	is less than or equal to
$\neq$	is unequal to	$\geqq$	is greater than or equal to
$<$	is less than	$\parallel$	is parallel to
$>$	is greater than	$\perp$	is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures which accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

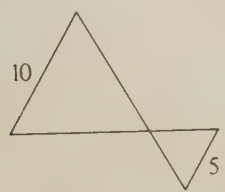

---

1. If $x + 1 + x + 2 + x + 3 = 1 + 2 + 3$, then $3x =$

   (A) -1
   (B) 0
   (C) $\frac{1}{3}$
   (D) 1
   (E) 3

2. If a penguin swims at an average rate of 4 meters per second, how many seconds will it take for the penguin to swim 50 meters?

   (A) 11 (B) 11.5 (C) 12 (D) 12.5 (E) 13

3. The two triangles above are equilateral with sides as shown. The ratio of the perimeter of the larger triangle to that of the smaller is

   (A) $\frac{50}{1}$ (B) $\frac{15}{1}$ (C) $\frac{4}{1}$ (D) $\frac{3}{1}$ (E) $\frac{2}{1}$

---

4. John had exactly \$7 before Bill paid him a \$26 debt. After the debt was paid, Bill had $\frac{1}{3}$ the amount that John then had. How much did Bill have before the debt was paid?

   (A) \$33 (B) \$35 (C) \$36
   (D) \$37 (E) \$47

5. Which of the following is an expression for 3 times the sum of c and the square of d?

   (A) $3(c + d^2)$
   (B) $3c + d^2$
   (C) $3(c + d)^2$
   (D) $3cd^2$
   (E) $3(c + \sqrt{d})$

6. $2(a)(-b)(-c)(-d) + 2abcd =$

   (A) $4abcd$
   (B) $-4abcd$
   (C) $-4a^2b^2c^2d^2$
   (D) $4a^2b^2c^2d^2$
   (E) 0

7. If $xy \neq 0$, then $\left(\dfrac{x^6y^5}{x^3y^2}\right)^2 =$

   (A) x^9y^9
   (B) x^9y^5
   (C) x^6y^6
   (D) x^5y^5
   (E) x^4y^6

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet blacken space

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

Notes: 1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● ① ② ③
E2.	 $180 - x$	y	① ● ③
E3.	$p - q$	$q - p$	① ② ●

	Column A	Column B
8.	$1(2 + 3(4 + 5))$	$5(4 + 3(2 + 1))$

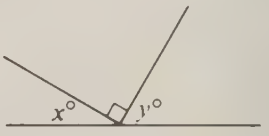

The monthly rainfall in City X for April was 5 inches.

9.	The amount of rainfall in City X from April 1st through April 4th	The amount of rainfall in City X from April 1st through April 8th

10.	$0.4 \times 10{,}000$	40×100

11.	x^2	x^3
12.	$\frac{x + x + x}{3}$	3
13.	The amount of sales tax on \$6.00 at a rate of 4%	The amount of sales tax on \$5.00 at a rate of 5%

	Column A	Column B
		
14.	$90 - (x + y)$	0

$3 + x < 7$
$3 + y < 7$

15.	x	y

If x and y are positive integers less than 12, $x \boxdot y$ is defined as the number in the figure above that is located by starting at the number x and moving $(y - 1)$ intervals of x units each in a clockwise direction. For example, $6 \boxdot 2 = 0$, since by starting at 6 and moving 1 interval of 6 units in a clockwise direction, the number located will be 0.

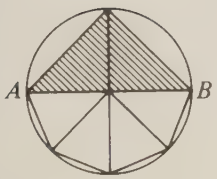

16.	$5 \boxdot 4$	10
17.	$10^6 - 10$	$10^5 + 10$

GO ON TO THE NEXT PAGE

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

Column A | Column B

The shaded triangles with bases on diameter AB are isosceles and congruent. The unshaded triangles are isosceles and congruent.

18. Total area of shaded triangular regions | Total area of unshaded triangular regions

---

PURCHASES BY THREE BOYS ON JANUARY 7, 1982

	Al	Bob	Ed
Number of Shirts Number of Pants	1 1	1 2	2 1
Total Cost	\$40	\$$x$	\$$y$

19. x | y

---

20. The average (arithmetic mean) of 13, 42, and 67 | The average (arithmetic mean) of 0, 13, 42, and 67

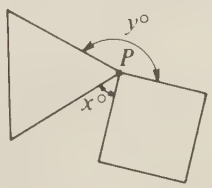

$1-a,\ 2-2a,\ 3-3a, \ldots,\ n-na$ is a sequence of numbers in which $n > 15$.

21. The sum of the first 15 terms of the sequence above when $a = 1$ | 0

Column A | Column B

n is an odd positive integer greater than 1.

22. $(-1)^n\left(\frac{1}{2}\right)^{n-1}$ | $(-1)^{n-1}\left(\frac{1}{2}\right)^{n}$

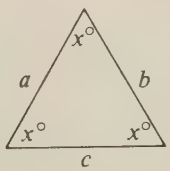

The square and the equilateral triangle have vertex P in common.

23. $x + y$ | 200

Along a certain highway, City R is 12 kilometers from City P and 25 kilometers from City Q.

24. The distance in kilometers from City P to City Q along this highway | 13 kilometers

---

$0 < a < 1$

25. a | bc

$rt = 2$
$ts = 2$

26. rts | 4

$[x]$ denotes the greatest integer less than or equal to x. For example: $[4.2] = 4$ and $[3] = 3$

27. $[5.2] + [-5.2]$ | 0

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and blacken the corresponding space on the answer sheet.

28. Let $x = y \div z$, where $yz \neq 0$. If both y and z are multiplied by 6, then x is

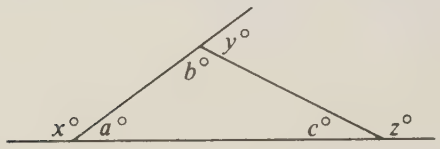

(A) increased by 1

(B) decreased by 1

(C) multiplied by 6

(D) multiplied by $\frac{1}{6}$

(E) not changed

29. In the figure above, $x + y + z - (a + b + c) =$

(A) 360
(B) 180
(C) 90
(D) 0
(E) −90

---

30. If $1 + \frac{x}{y} = 0$, then $\frac{y}{x} + \frac{x}{y}$ is equal to which of the following?

(A) −2 (B) −1 (C) 0 (D) 2
(E) It cannot be determined from the information given.

31. If $x + y$ is 3 more than $x - y$, which of the following has exactly one value?

(A) x
(B) y
(C) $x + y$
(D) $x - y$
(E) xy

32. $\frac{3x}{60}$ hours and $\frac{4y}{300}$ minutes together equal how many seconds?

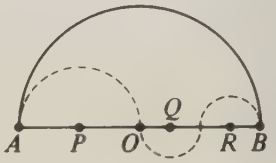

(A) $180x + 48y$

(B) $180x + \frac{4}{5}y$

(C) $3x + 48y$

(D) $3x + \frac{4}{5}y$

(E) $\frac{3x}{60^3} + \frac{4y}{18{,}000}$

33. Points P, O, Q, and R are the midpoints of the diameters of the 4 semicircles in the figure above. AB is a line segment containing the diameters of these semicircles. If $OB = 6$, what is the length of the dotted path from A to B?

(A) 3π (B) 6π (C) 9π (D) 12π (E) 36π

---

34. In a certain garden, $\frac{1}{5}$ of the flowering plants represents $\frac{1}{10}$ of all the plants. What is the ratio of flowering plants to nonflowering plants in that garden?

(A) 1:1 (B) 1:2 (C) 1:5
(D) 1:9 (E) 1:10

35. The lengths of the edges of a rectangular solid are whole numbers. If the volume of the solid is 11, what is the total area of its six faces?

(A) 26
(B) 44
(C) 46
(D) 52
(E) 66

*Indicates four-choice questions. (All of the other questions are five-choice.)

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

  $$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

  Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.
- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

You can verify the College Board SAT scores reported to you recently by using the information in this booklet along with the copy of your answer sheet. *Before you begin, check that the first two characters (number and letter) of the form code you marked in item 3 on your answer sheet are the same as the form code printed on the front of this booklet.* Compare the responses shown on the copy of your answer sheet with the list of correct answers.

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on the back cover. Enter this figure on the worksheet. (The SAT-verbal score you just recorded and your reported SAT-verbal score should be identical. If not, see the paragraph at the bottom of the next page.)

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for *section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on the back cover. Enter this figure on the worksheet. (The SAT-mathematical score you just recorded and your reported SAT-mathematical score should be identical. If not, see the paragraph at the bottom of the next page.)

SAT-SCORING WORKSHEET

FORM CODE 2I

SAT-Verbal Sections

A. Section 1: _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 4: _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw score (Rounded to nearest whole number) _____ D

E. SAT-verbal reported scaled score (See the conversion table on the back cover.) [ ] SAT-verbal score

SAT-Mathematical Sections

A. Section 2: _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal A

B. Section 5: Questions 1 through 7 and 28 through 35 (5-choice) _____ (no. correct) − ¼ (_____ no. incorrect) = _____ subtotal B

C. Section 5: Questions 8 through 27 (4-choice) _____ (no. correct) − ⅓ (_____ no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw score (Rounded to nearest whole number) _____ E

F. SAT-mathematical reported scaled score (See the conversion table on the back cover.) [ ] SAT-math score

Should you have any questions on these scoring instructions, you may call the phone number below. If, after following the above scoring directions and checking your work at least twice, your results disagree with the SAT-verbal or SAT-mathematical score reported on your ATP score report, you may request rescoring of your answer sheet. If rescoring confirms that an error had been made (resulting in either higher or lower scores than those originally reported), corrected reports will be sent to all recipients of your original scores. Please send your request to:

College Board ATP
Box 592
Princeton, NJ 08541
Attention: Rescore Request
Telephone: (609) 771-7600

Please indicate whether it is your SAT-verbal or SAT-mathematical score, or both, that you want to be rescored. When you write, please include a copy of this scoring worksheet on which you did your calculations.
