SECTION 1 Time—30 minutes 45 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. PROTECT: (A) endanger (B) ignore (C) excite (D) alert (E) imprison
2. BIZARRE: (A) worthless (B) ordinary (C) humble (D) genuine (E) flexible
3. VIBRANT: (A) solvent (B) adaptable (C) constant (D) unified (E) lifeless
4. BLUNDER: (A) confess (B) persevere (C) plan jointly (D) act wisely (E) play happily
5. BULGE: (A) continuity (B) solidity (C) restoration (D) compliance (E) indentation
6. ANGULAR: (A) hollow (B) shallow (C) rotund (D) motionless (E) detached
7. MONOTONY: (A) authenticity (B) resiliency (C) opposition (D) usefulness (E) diversity
8. CONVICTION: (A) doubt (B) simplicity (C) decline (D) reflection (E) depression
9. INDEFATIGABLE: (A) distinctive (B) faithful (C) partial (D) instantly done (E) easily tired
10. BEGUILE: (A) surmise (B) ratify (C) remonstrate (D) enlighten (E) pretend
11. STYMIE: (A) exhibit (B) assist (C) evade (D) brighten (E) empty
12. CONFOUND: (A) distinguish between (B) dislodge from (C) dominate (D) terminate (E) prolong
13. DISSOLUTION: (A) integration (B) triviality (C) receptivity (D) wariness (E) supplication
14. VOLUBLE: (A) tedious (B) pertinent (C) taciturn (D) voracious (E) furtive
15. NOISOME: (A) tranquil (B) frugal (C) profuse (D) meddlesome (E) wholesome

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. . respectable (B) extensive. . moderate (C) sophisticated. . amateur (D) risqué. . crude (E) perfect. . spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. Stick insects have elongated, twig-shaped bodies that enable them to be ---- when they alight on shrubbery.

(A) devoured (B) foliated (C) nurtured (D) camouflaged (E) acclimated

17. An accurate assessment of this shore community's ---- is complicated by the ---- migrations of part-time residents.

(A) age. .historical
(B) revenue. .negligible
(C) geography. .regional
(D) population. .seasonal
(E) environment. .predictable

18. Within the tribal government of the Crow Indians, the clan system serves as a method of checks and balances that ---- the assumption of authoritarian rule by any one clan.

(A) determines (B) prevents (C) examines (D) delegates (E) incorporates

19. The research is so ---- that it leaves no part of the issue unexamined.

(A) comprehensive (B) rewarding (C) sporadic (D) economical (E) problematical

20. Mr. McNulty seems to like hardly anyone; but since his ---- is witty and controlled, his commentaries are a delight to the reader.

(A) deceit (B) malice (C) empathy (D) magnanimity (E) pomposity

1

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

The 1920's marked a new independence in political party affiliation among Black Americans—they were ready to move in a new political direction. This direction was not, however, to the extreme left, despite the wooings of the socialists and the communists.

Notwithstanding the zeal and dedication of A. Philip Randolph and Chandler Owen, prominent Black socialists of the early 1920's, the Socialist party made little impression upon the postwar Black population. Because their entire program revolved around the working person, socialists viewed the problems of society as mainly economic rather than racial; they saw the Black person primarily as a worker and only incidentally as a "Negro." No matter how eloquent, their program was generally viewed by Black Americans as remote from their immediate needs.

The failure of the socialists to win mass support from the Black population was carefully studied by the communists. They regarded Black people as assets capable of helping to spearhead the proletarian revolution in the United States. To win the support of Black Americans, the Communist party devoted most of its efforts to practical measures rather than to indoctrination in Marxist theory.

The communists sought to recruit Black workers and then to persuade White workers to accept them. In addition, they organized in 1925 the American Negro Labor Congress, which was designed to bring all Black trade unionists together in order to strengthen the party. They also organized the International Labor Defense, a legal arm that was designed to defend communists in the courts, but that concerned itself particularly with cases involving Black people regardless of their political affiliations.

Another approach was the practicing of social equality in an effort to make Black people feel a complete personal acceptance. Still another part of their program was designed to give Black Americans responsible positions in the Communist party and to have them run for high office on the party ticket in state and national elections.

Even with such strenuous efforts the communists made few Black converts. In 1928, realizing that they must adopt a new line, the American communists launched the idea of a separate Black republic within the United States. But this idea was based on an incorrect analogy with Russia, where different areas were occupied by different races with different languages and customs. Black Americans' chief objection to the idea was its underlying assumption that Black people did not and could not fit into American life. Black Americans simply did not seem to be attuned to the communist message for reasons that are not hard to fathom.

21. The first paragraph suggests that, prior to 1920, Black Americans

(A) were not inclined to be politically active
(B) had little freedom in making political decisions
(C) had traditionally followed one political course
(D) sanctioned the activities of leftist organizations
(E) were secretive about their political alliances

22. According to the passage, the fundamental purpose for which the Communist party solicited Black members was to

(A) promote racial equality in the United States
(B) establish a separate republic for the Black population
(C) foment a working-class rebellion in the United States
(D) include Black Americans in national politics
(E) stabilize the economic situation of Black Americans

23. According to the passage, the communists de-emphasized which of the following in their attempt to persuade Black Americans to join the party?

(A) Unionization of Black workers
(B) Legal defense in the courts
(C) Promotion of social equality
(D) Inclusion in political endeavors
(E) Instruction in political theory

24. The passage as a whole is primarily concerned with

(A) describing tactics
(B) condemning attitudes
(C) interpreting reactions
(D) comparing goals
(E) accounting for results

25. The author apparently feels that the Black population's rejection of the communist plan for a separate Black republic was

(A) a surprising refusal
(B) an understandable response
(C) a self-defeating act
(D) an unreasonable reaction
(E) a clever political maneuver

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

The tremendous explosion, known as the Tunguska blast, that flattened hundreds of square miles of Siberian pine forest in 1908 was probably equal in power to that of a modern thermonuclear bomb. The blasted region of the forest had an irregular shape similar to that of a butterfly. Decades later, specialists noticed an accelerated growth of trees in the region immediately surrounding the blast. Any theory describing the cause of the Tunguska blast must account for these puzzling factors.

For many years scientists just assumed that the blast had been caused by the impact of a large meteor, although no crater was ever found. After the bombings of Hiroshima and Nagasaki in 1945, suggestions were made that the otherwise enigmatic Tunguska blast had actually been an atomic explosion that had been set off by an alien vehicle from another world. The spaceship hypothesis claims that an interstellar vehicle was attempting to make a landing on Earth when its nuclear power plant accidentally detonated. The hull of the ship acted like a Claymore mine, shaping the charge into the irregular pattern. As at Hiroshima and Nagasaki, radiation caused the accelerated growth of trees around the bomb site.

The generally accepted hypothesis, however, is that the Tunguska blast was caused by the impact of a cometary nucleus with Earth. The explosion of the comet, which occurred at an altitude of several miles above the ground, was caused when the tremendous kinetic energy of the onrushing comet was converted into heat by its passage through Earth's atmosphere.

Proponents of the comet hypothesis also suggest that the forest fire ignited by the thermal pulse of the blast caused the accelerated growth of trees around the blast site by clearing the undergrowth and fertilizing the soil. In fact, a Soviet survey team discovered that the accelerated growth did indeed follow the outline of the burned areas quite well–even though some unburned areas were quite close to ground zero, and some burned areas were quite distant.

Comet hypothesis advocates also contend that a combination of sonic boom and detonation were quite sufficient to account for the seemingly odd shape of the flattened area. Dynamics specialists in Moscow attempted to recreate the shock waves of the original event, assuming that the passage of the object through the air produced a supersonic shock wave, and that at the end of this trail a detonation wave resulted from the sudden disintegration of the comet. The specialists strung explosives along a string suspended above a "forest" of miniature match sticks. When the explosives were set off, the match sticks were smashed down in a beautiful butterfly pattern.

26. The main purpose of the passage is to discuss the

(A) explosive power of comets
(B) puzzling cause of the Tunguska blast
(C) role of atomic energy in explosions
(D) major features of the Tunguska blast
(E) attempts to recreate the Tunguska blast

27. The passage suggests that which of the following would indicate that the Tunguska blast was caused by a meteor, rather than a spaceship exploding above the Earth?

I. The presence of a crater in the area
II. Evidence of accelerated tree growth in the area surrounding the blast
III. A circular pattern of destruction in the area surrounding the blast

(A) I only (B) III only (C) I and II only
(D) II and III only (E) I, II, and III

28. According to the comet hypothesis, the Tunguska blast occurred when the

(A) forest fire produced by the heat of the comet ignited the comet nucleus
(B) impact of the comet's nucleus against the Earth's surface caused the comet to explode
(C) extremely high temperature of the comet heated up the atmospheric gases surrounding it to the point that they exploded
(D) tremendous speed of the comet through the Earth's atmosphere created so much heat that the comet nucleus suddenly disintegrated
(E) supersonic shock wave produced by the comet's flight through the atmosphere caused the explosive material in the comet to detonate

29. Which of the following best describes the author's tone in the discussion of the comet hypothesis?

(A) Amused (B) Defensive (C) Impartial
(D) Sarcastic (E) Overstated

30. If the experiment described in the last paragraph helps support the comet hypothesis, all of the following assumptions must be made EXCEPT:

(A) A series of small explosions will produce an effect similar to that of a supersonic shock wave.
(B) A supersonic shock wave will cause the object that created it to disintegrate.
(C) A "forest" of matchsticks will behave in much the same way as trees in an ordinary forest.
(D) The disintegration of a comet could create a detonation blast.
(E) A falling comet can travel through the Earth's atmosphere at a speed sufficient to cause a supersonic shock wave.

1

Select the word or set of words that best completes each of the following sentences.

31. Some historians have been searching so diligently for the ---- of modern culture that they have reduced the Renaissance period to little more than ---- the present.

(A) justification. .an antithesis to
(B) influence. .a paradigm for
(C) perils. .a duplication of
(D) inspiration. .a climax of
(E) origins. .a prelude to

32. The ancient politicians were masters of carefully disguised ---- that almost always reached the discerning part of their audience, but left them free to pretend innocence and good will.

(A) enthusiasm (B) vacuities (C) accolades
(D) insinuations (E) policies

33. To ---- the ravages of acid rain, the curators moved the statues that once ---- the monument's facade to the safety of a museum.

(A) imperil. .defaced (B) perpetuate. .enhanced
(C) belittle. .surrounded (D) forestall. .adorned
(E) protect. .comprised

34. The senator chose to incur dislike rather than ---- her principles to win favor with the public.

(A) gratify (B) endorse (C) accuse
(D) compromise (E) advertise

35. Her vague sense of ---- grew into anxiety and then alarm when she discovered that her initial doubts about the success of the undertaking were well founded.

(A) foreboding (B) remorse
(C) anticipation (D) intrigue
(E) complacency

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. INFLATE : BIGGER :: (A) expel : shorter
(B) extend : longer (C) extract : wider
(D) expose : softer (E) expunge : lighter

37. CHART : NAVIGATOR :: (A) novel : reader
(B) log : captain (C) map : motorist
(D) pedigree : dog (E) graph : mathematician

38. SIEVE : DRAINING :: (A) paper : writing
(B) oven : cleaning (C) faucet : washing
(D) film : developing (E) filter : separating

39. POKER : CARDS :: (A) racetrack : horses
(B) lottery : dice (C) roulette : wheel
(D) football : points (E) dealer : odds

40. BRUSH : TOUCH :: (A) glimpse : see
(B) study : read (C) chatter : speak
(D) dodge : run (E) finger : point

41. MARBLE : SCULPTURE :: (A) canvas : portrait
(B) slivers : kaleidoscope (C) upholstery : sofa
(D) glass : goblet (E) glue : collage

42. CLOUDBURST : RAINFALL ::
(A) ashes : fire (B) sunbeam : warmth
(C) ripple : wave (D) drizzle : mist
(E) gust : wind

43. FOOLHARDY : BOLD :: (A) cruel : disobedient
(B) discontented : smug (C) gullible : trusting
(D) fearful : heroic (E) helpless : sympathetic

44. UPROARIOUS : FUNNY ::
(A) mysterious : alarming
(B) outrageous : improper
(C) anxious : serene
(D) thunderous : rainy
(E) ponderous : tired

45. PRESCIENT : FORESIGHT ::
(A) obstinate : compliance
(B) oblivious : awareness
(C) assiduous : diligence
(D) renounced : preference
(E) superficial : appeal

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 2 Time—30 minutes, 25 Questions

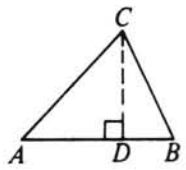

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. $\dfrac{0.25 + 0.25 + 0.25 + 0.25}{4} =$

(A) 0.025 (B) 0.125 (C) 0.25
(D) 0.50 (E) 0.75

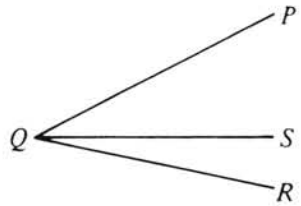

2. Jack goes to the store and, after spending a total of 75 cents to buy 15 identical erasers, has no money left. If he then decides he needs 2 pencils at 15 cents each, how many erasers must he exchange?

(A) Two (B) Four (C) Six
(D) Eight (E) Ten

3. Which of the following is (are) true?

I. $(10 - 5) - 3 = 10 - (5 - 3)$
II. $(2 \times 3) \times 5 = 2 \times (3 \times 5)$
III. $(2 + 3) + 5 = 2 + (3 + 5)$

(A) I only (B) II only (C) III only
(D) I and III (E) II and III

Note: Figure not drawn to scale.

4. In the figure above, the measure of $\angle SQR$ is $\frac{2}{5}$ the measure of $\angle PQR$. If the measure of $\angle PQR$ is $\frac{2}{3}$ the measure of a right angle, what is the measure of $\angle SQR$?

(A) 24°
(B) 36°
(C) 48°
(D) 60°
(E) 96°

GO ON TO THE NEXT PAGE

2

5. For what positive value of x does $\frac{4}{x} = \frac{x}{16}$?

(A) 2
(B) 8
(C) 20
(D) 32
(E) 64

6. The decimal representation for $1{,}000 + 1 + \frac{1}{1{,}000}$ is

(A) 1,000.1001
(B) 1,000.101
(C) 1,001.0001
(D) 1,001.001
(E) 1,001.01

7. If $p = 15$, then $\frac{p^2 + 2p}{p} =$

(A) 3
(B) 15
(C) 17
(D) 45
(E) 227

8. What is the circumference of a circle with radius π?

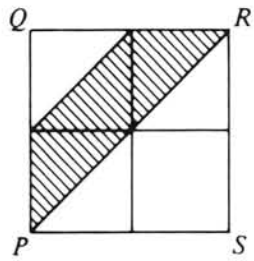

(A) π (B) 2π (C) π^2 (D) 4π (E) $2\pi^2$

9. What is the least positive integer divisible by the numbers 2, 3, 4, and 5?

(A) 30 (B) 40 (C) 60 (D) 90 (E) 120

10. Three children each weigh 100 pounds or less. Their average (arithmetic mean) weight is 80 pounds. If one of them weighs 80 pounds, what is the least possible weight, in pounds, of a child in the group?

(A) 1
(B) 50
(C) 60
(D) 70
(E) 80

11. In the figure above, square $PQRS$ is divided into four smaller squares. If the area of the shaded region is 3, what is the area of $PQRS$?

(A) 8 (B) 7 (C) 6 (D) 5 (E) 1

---

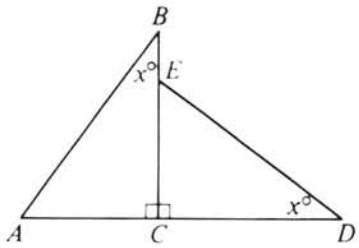

12. If x and y are negative integers and $x < y$, which of the following is greatest?

(A) xy (B) $-xy$ (C) $x - y$
(D) $x + y$ (E) $x^3 + y$

13. The Smith Metal Company's old machine makes 300 bolts per hour. Its new machine makes 450 bolts per hour. If both machines begin running at the same time, how many minutes will it take the two machines to make a combined total of 900 bolts?

(A) 36
(B) 72
(C) 120
(D) 144
(E) 180

GO ON TO THE NEXT PAGE

14. In the figure above, if $AB = 5$, $AC = 3$, and $BC = CD$, then $BE =$

(A) 1 (B) 2 (C) 3 (D) 4 (E) 5

---

15. Jane buys one goldfish and two guppies for \$3.00. Dave buys two goldfish and four guppies for \$6.00. If goldfish cost x dollars each and guppies cost y dollars each, what is the value of x ?

(A) \$0.50
(B) \$0.80
(C) \$1.00
(D) \$1.20
(E) It cannot be determined from the information given.

Note: Figure not drawn to scale.

16. Points P, Q, R, and S are on line ℓ in the order shown. If Q is the midpoint of segment PS and if $RS = 4$ and $PQ = 7$, then $PR =$

(A) 3
(B) 10
(C) 11
(D) 14
(E) 18

Questions 17-18 refer to the following definition.

For all positive integers x,

$\boxed{x} = \frac{1}{2}x$, if x is even;

$\boxed{x} = 2x$, if x is odd.

17. $\boxed{1 + 5} =$

(A) 2 (B) 3 (C) 6 (D) 12 (E) 24

18. For a positive integer q, which of the following equals $\boxed{4q + 1}$?

(A) $2q + \frac{1}{2}$

(B) $2q + 1$

(C) $2q + 2$

(D) $8q + 1$

(E) $8q + 2$

---

19. There are x exposures on a certain roll of film. The cost of the roll of film is d dollars, and the cost to develop the film is c cents per exposure. What is the cost, in dollars, to purchase and develop the roll of film?

(A) $\frac{cx}{100} + d$

(B) $\frac{dx}{100} + c$

(C) $\frac{cdx}{100}$

(D) $cx + 100d$

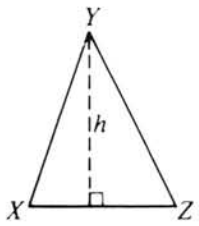

(E) $100dx + c$

GO ON TO THE NEXT PAGE

2, 0, 4, 0, 6, 0, 8, 0

20. If x and y represent any two unequal numbers from the list above, how many different values are possible for xy ?

(A) Four (B) Five (C) Six
(D) Seven (E) Eight

21. In $\triangle XYZ$ above, the length of XZ is $\frac{6}{7}$ of the length of altitude h. What is the area of $\triangle XYZ$ in terms of h ?

(A) $\frac{h^2}{3}$
(B) $\frac{3h^2}{7}$
(C) $\frac{3h}{7}$
(D) $\frac{6h^2}{7}$
(E) $\frac{12h^2}{7}$

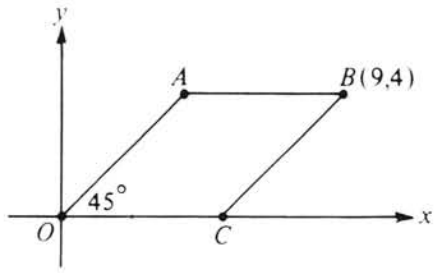

---

22. If x and y are two different integers and the product $35xy$ is the square of an integer, which of the following could be equal to xy ?

(A) 5
(B) 70
(C) 105
(D) 140
(E) 350

23. Of 220 stamps in a certain stamp collection, exactly 60 were United States stamps and 110 were canceled. If 60 percent of the United States stamps were canceled, how many of the stamps were both not United States stamps and not canceled?

(A) 36
(B) 50
(C) 74
(D) 86
(E) 110

24. In the figure above, what is the perimeter of parallelogram $OABC$?

(A) $10 + 4\sqrt{2}$
(B) $10 + 8\sqrt{2}$
(C) 18
(D) 36
(E) It cannot be determined from the information given.

---

25. A pilot surveys a flat circular area represented by 4π square inches on a map. If 1 inch on the map represents 60 miles, how many square miles does the pilot survey?

(A) 15π (B) 240π (C) 900π
(D) $7{,}200\pi$ (E) $14{,}400\pi$

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 4 **Time—30 minutes**
40 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. FERTILE: (A) tiresome (B) unsettled (C) methodical (D) continuous (E) unproductive

2. APPREHEND: (A) apply for (B) turn loose (C) obey regulations (D) perform (E) obstruct

3. ZEAL:
   (A) loss of virtue
   (B) respect for others
   (C) appreciation for beauty
   (D) lack of enthusiasm
   (E) fear of interference

4. ERRATIC: (A) compact (B) irresistible (C) consistent (D) clearly heard (E) formally received

5. ADORN: (A) dislike (B) distrust (C) move away (D) prove useless (E) make unattractive

6. DECLIVITY: (A) ascending slope (B) general aptitude (C) extreme passivity (D) detriment (E) waste

7. UNCONDITIONAL: (A) commensurate (B) qualified (C) organized (D) identifiable (E) endurable

8. JETTISON: (A) ambush (B) command (C) lead astray (D) slow down (E) bring aboard

9. SUMPTUOUS: (A) moist (B) close (C) paltry (D) showing disfavor (E) seeking change

10. DECORUM: (A) impropriety (B) admonition (C) simplicity (D) indignation (E) embellishment

4

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate
(C) sophisticated. .amateur (D) risqué. .crude
(E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. Because heroin is regarded as the most ---- drug threat to society, there has been a much more ---- effort to develop treatment for heroin addicts than for other drug users.

(A) incidental. .general
(B) trivial. .concerted
(C) serious. .concentrated
(D) obvious. .tentative
(E) dangerous. .disastrous

12. How can we learn to ---- the situation as right and proper when the whole tendency of our thought and interest carries us in ---- direction?

(A) defend. .an evident (B) reject. .a parallel
(C) protest. .a reverse (D) accept. .a contrary
(E) enjoy. .a reciprocal

13. She contributed to the project after much ----, and then only because she realized that its failure would ---- all previous progress.

(A) procrastination. .accelerate
(B) consultation. .reaffirm
(C) inattention. .overlook
(D) hesitation. .negate
(E) resentment. .emphasize

14. Mexico's discovery of oil created a nation-wide economic ---- that ---- many Mexican-American scientists and engineers to take jobs with thriving Mexican companies.

(A) failure. .convinced (B) upturn. .required
(C) boom. .induced (D) prosperity. .doomed
(E) slump. .inspired

15. The practice of ---- coins that end up on edge in a coin-flipping experiment illustrates one method of dealing with the ambiguous case within a ---- system.

(A) ignoring. .classification
(B) destroying. .production
(C) minting. .logical
(D) cleaning. .scientific
(E) saving. .fiscal

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN : BOREDOM :: (A) dream : sleep
(B) anger : madness (C) smile : amusement
(D) face : expression (E) impatience : rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. PARACHUTE : AIRPLANE :: (A) trunk : tree
(B) lifeboat : ship (C) knapsack : school
(D) trampoline : tent (E) elevator : floor

17. PULSE : HEART :: (A) pitch : music
(B) nerve : brain (C) tick : clock
(D) motor : engine (E) blood : artery

18. MOMENT : ETERNITY :: (A) light : beam
(B) darkness : sun (C) space : time
(D) water : ocean (E) point : infinity

19. CATHEDRAL : CHAPEL :: (A) mortar : bricks
(B) landscape : views (C) horizon : sky
(D) shelf : tier (E) city : village

20. ANARCHIST : LAWS :: (A) partisan : allegiance
(B) federalist : union (C) pacifist : war
(D) insurgent : rebellion (E) despot : leadership

21. CARICATURE : PORTRAIT :: (A) parody : poem
(B) clown : jester (C) medley : symphony
(D) episode : tragedy (E) opera : soprano

22. RACONTEUR : ANECDOTES ::
(A) editor : books (B) screenwriter : credits
(C) comedian : jokes (D) lecturer : digressions
(E) actor : roles

23. DEADPAN : EMOTION ::
(A) distrustful : alertness
(B) lethargic : energy
(C) mobile : movement
(D) ambivalent : precision
(E) petty : openness

24. INTRACTABLE : OBEY :: (A) modest : hide
(B) forlorn : comfort (C) cynical : sneer
(D) steadfast : change (E) pompous : proclaim

25. SWINDLER : DUPE :: (A) embezzler : thief
(B) robber : cash (C) bully : weakling
(D) magician : illusion (E) advertiser : hoax

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

Pterosaurs (from the Greek for "winged lizard") appeared and died out with the dinosaurs, after a long history of nearly 140 million years. They ranged from sparrow-sized flutterers to giant soarers with wingspans of nearly forty feet.

The flying abilities of pterosaurs have never been fully appreciated. Although pterosaurs have been represented traditionally as clumsy gliders, with leathery curtain-like wings, new evidence suggests that they were strong and graceful fliers. Unlike bats' wings, those of pterosaurs were narrow and gull-like and extended along the body wall only to the limits of the pelvis. We know pterosaurs were powerful flappers by the enormous bony expansion of the breastbone, which covers most of the chest region and has a deep keel for attachment of the flight muscles. The bones of the upper arm are also well developed to support flight musculature, and are perforated at their ends by tiny pores, as in birds. (These pores, called pneumatic foramina, allow the expansion of the respiratory surface of the lungs into the bones, to increase the animal's ability to receive oxygen and breathe out carbon dioxide, thus maintaining the high metabolic rate that flight requires.) In addition, the bones are hollow and unusually thin. Skeletal lightness by itself might be an adaptation merely for gliding, but no gliding animal has these other modifications for flight. Add to all this the recent discovery of a kind of hairy covering on a pterosaur found in the Soviet Union, and one can only conclude that pterosaurs, the first fliers, were warm-blooded, active animals long before the birds arose from dinosaurs: not cold-blooded, or slow, or awkward at all.

26. The passage as a whole is an attempt to

(A) distinguish the flight strategies of pterosaurs from those of birds and bats
(B) revise the conventional view of the pterosaur's airborne behavior
(C) introduce an innovative approach to the study of flight physiology
(D) determine the features necessary for the development of flight capabilities
(E) trace the origin of diverse winged creatures to a common ancestor

27. The passage states that pterosaurs differed from bats with respect to

(A) aesthetic appeal (B) flying altitude
(C) nocturnal habits (D) skeletal lightness
(E) wing structure

28. The discussion of the "pneumatic foramina" (line 19) suggests that flying is an activity that

(A) demands a large expenditure of energy
(B) places great stress on the skeletal structure
(C) is more efficient than other means of locomotion
(D) involves still-obscure biochemical processes
(E) has reached its maximum point of development

4

Her image accompanied me even in places the most hostile to romance. On Saturday evenings when my aunt went marketing I had to go to carry some of the parcels. We walked through the flaring streets, jostled by drunken men and bargaining women, amid the curses of laborers, the shrill litanies of shop-boys who stood on guard by the barrels of pigs' cheeks, the nasal chanting of street-singers, who sang a "come-all-you" about O'Donovan Rossa, or a ballad about the troubles of our native land. These noises converged in a single sensation of life for me: I imagined that I bore my chalice safely through a throng of foes. Her name sprang to my lips at moments in strange prayers and praises which I myself did not understand. My eyes were often full of tears (I could not tell why) and at times a flood from my heart seemed to pour itself out into my bosom. I thought little of the future. I did not know whether I would ever speak to her or not or, if I spoke to her, how I could tell her of my confused adoration. But my body was like a harp and her words and gestures were like fingers running upon the wires.

Line
(5)
(10)
(15)

29. It can be inferred from the passage that places that are "the most hostile to romance" (lines 1-2) are places that are characterized chiefly by

(A) monotonous tranquillity
(B) imminent danger
(C) routine bustle
(D) illusory conviviality
(E) desolate remoteness

30. All of the following are implied contrasts in the passage EXCEPT

(A) religious chants and litanies *versus* the actual sounds of shop-boys and street-singers
(B) a sack of goods from the market *versus* a personal symbol of reverence
(C) the oaths of workers *versus* the unspoken prayers and praises of the boy
(D) tearful eyes *versus* a flood from the heart
(E) wordless emotions *versus* senseless babble

31. In the context of the passage, the image of the chalice (line 11) suggests all of the following EXCEPT

(A) the purity of the boy's feelings
(B) the sacredness of the boy's imagined relationship
(C) something to be guarded amid some danger
(D) a sacrifice for the benefit of all
(E) the superior level on which the boy places the girl

32. In which of the following sentences does the descriptive focus of the passage shift most dramatically?

(A) "We walked . . . our native land." (lines 4-9)
(B) "These noises . . . throng of foes." (lines 9-11)
(C) "My eyes . . . into my bosom." (lines 13-16)
(D) "I thought little of the future." (line 16)
(E) "I did not know . . . confused adoration." (lines 16-18)

The fundamental distinction between the professional historian and the amateur lies in the intellectual treatment of the questions asked. This is not always an easy distinction to make, for it is not identical with that between those who earn their living by the study of history and those who engage in it as an avocation. The distinction I have in mind rests between the person who has learned the job and the person who, sometimes with touches of genius, comes to it in a happy spirit of untrained enterprise: crudely, the distinction between those who have grasped that research means assimilating the various and often very tiresome relics of the past and those who think that research means reading a lot of books. Examples of both are found inside as well as outside the academic profession.

The hallmark of the amateur is a failure of instinctive understanding. This expresses itself most clearly in a readiness to see the exceptional in the commonplace and to find the unusual ordinary. The amateur shows a tendency to find the past, or parts of it, quaint; the professional is totally incapable of this. On the other hand, the professional, truly understanding an age from the inside—living with its attitudes and prejudices—can also judge it; refusal to judge is quite as amateurish a characteristic as willingness to judge by the wrong, because anachronistic, standards. By all these criteria, Lord Acton appears an amateur, and so he was, a prince of amateurs. Very wide reading and self-consciously deep thinking may have attended him; but he was forever expressing distress or surprise at some turn in the story, was alternately censorious and uncomprehending, suspected conspiracies and deep plots everywhere. In short, he lived in history as a stranger, a visitor from Mars.

The professional lives in history as a contemporary, though a contemporary equipped with immunity, hindsight, and arrogant superiority—a visitor from the Inquisition. How is such professionalism created? G. M. Young once offered celebrated advice: read in a period until you hear its people speak. But this is amateurishness of a drastic kind, because it is superficially professional. Who ever knew or understood people just because he heard them speak? The truth is that one must read them, study their creations, and think about them until one knows what they are going to say next.

33. The passage can best be described as which of the following?

(A) A passionate plea for revision of historical methodology
(B) A satirical look at the limitations of one type of scholar
(C) A portrait of a famous but ultimately unsuccessful historian
(D) A consideration of the problems inherent in studying the past
(E) A discussion of what the author considers desirable and undesirable in a historian

34. According to the passage, the chief characteristic of the professional historian is

(A) a fixed desire to instruct others about history
(B) a natural attraction to exotic practices
(C) a profound comprehension of a past age
(D) an intransigent feeling of outrage at ancient injustice
(E) an implicit rejection of contemporary life

35. Which of the following best describes the reference to Lord Acton in lines 26-33 ?

(A) It illustrates a general type through the case of an individual.
(B) It supports a previous statement with generally accepted facts.
(C) It presents a standard of excellence for all historians.
(D) It demonstrates that past historians were not well trained.
(E) It offers a balanced view of the habits of certain historians.

36. All of the following are cited in the passage as common to the amateur historian EXCEPT

(A) extensive reading with insufficient focus
(B) profound meditation with dubious results
(C) indifference to genuinely important facts
(D) exclusion from the academic community
(E) alienation from the period under study

37. The author compares the professional with the amateur historian through the metaphor of two distinctly different

(A) tamers of the same wilderness
(B) subjects of the same ruler
(C) participants in the same contest
(D) travelers to the same place
(E) spectators at the same play

4

Much of our thinking consists of trains of images suggested one by another, of a sort of spontaneous reverie in which the links between the terms are either "contiguity" or "similarity." As a rule, in this sort of irresponsible thinking, the terms that happen to be coupled together are concrete rather than abstract ones. A sunset may call up the vessel's deck from which I saw one last summer, the companions of my voyage, my arrival into port, etc.; or it may make me think of solar myths, of Hercules' funeral pyre, of Homer, of the Greek alphabet, etc. If habitual contiguities predominate, we have a prosaic mind; if rare contiguities, or similarities, have free play, we call the person fanciful, poetic, or witty. But the thought is of matters taken in their entirety. Having been thinking of one, we find later that we are thinking of another, to which we have been lifted along, we hardly know how. If an abstract quality figures in the procession, it arrests our attention but for a moment and fades into something else and is never very abstract. Thus, in thinking of the sun myths, we may have a gleam of admiration at the gracefulness of the mythologies of early civilizations or a moment of disgust at the narrowness of modern interpreters. But, in the main, we think less of qualities than of whole things. The upshot of it may be that we are reminded of some practical duty; we write a letter to a friend, or we study our Greek lesson. Our thought is rational and leads to a rational act, but it can hardly be called reasoning in a strict sense of the term.

38. The author most probably calls the kind of thinking described in the passage "irresponsible" (line 4) because it

(A) lacks originality
(B) is fundamentally immoral
(C) fails to abstract from specific images
(D) ignores the realities of the present
(E) is not consciously analytical

39. The author claims that the thought process by which people connect one image or term to another is

(A) either analytical or poetic
(B) neither spontaneous nor rational
(C) not clearly understood by them
(D) wholly determined by the nature of their formal education
(E) deliberately directed toward achieving a practical outcome

40. Which of the following elements is most central to the thought process described in the passage?

(A) Rationalization (B) Association
(C) Memorization (D) Analysis
(E) Innovation

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 5 Time—30 minutes, 35 Questions

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

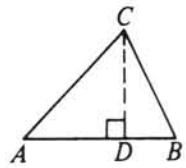

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$

The number of degrees of arc in a circle is 360.

The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

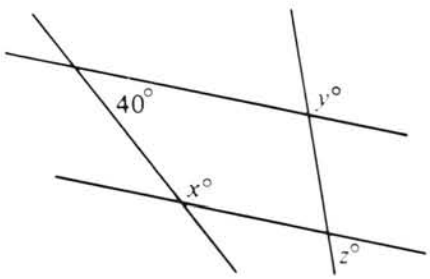

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. If $x + 3 = 6$ and $x + y = 8$, then $y =$

(A) -1 (B) 2 (C) 5 (D) 6 (E) 11

2. In the figure above, if $y + z = 180$, then $x =$

(A) 40 (B) 50 (C) 120 (D) 140 (E) 180

The sum of $3x$ and 5 is equal to the product of x and $\frac{1}{3}$.

3. Which of the following equations gives the relationship stated in the problem above?

(A) $3x = \frac{1}{3}x + 5$

(B) $5(3x) = x + \frac{1}{3}$

(C) $3(x + 5) = \frac{1}{3}x$

(D) $3x + 5 = x \div \frac{1}{3}$

(E) $3x + 5 = \frac{1}{3}x$

4. Eric has \$3.50. Of this amount, he owes his mother 14 percent and his sister 76 percent. How much will he have left after he pays these debts?

(A) \$0.10
(B) \$0.35
(C) \$0.70
(D) \$0.72
(E) \$0.84

5. The cube above has a number on each of its six faces. If the sum of the numbers on each pair of opposite faces is 10, what is the sum of the numbers on the faces not shown?

(A) 8 (B) 10 (C) 12 (D) 14 (E) 16

6. If $4x - 2 = 10$, then $1 - 2x =$

(A) -5
(B) -3
(C) 2
(D) 3
(E) 5

7. Which of the following could be the remainders when 4 consecutive positive integers are each divided by 3 ?

(A) 1, 2, 3, 1 (B) 1, 2, 3, 4 (C) 0, 1, 2, 3
(D) 0, 1, 2, 0 (E) 0, 2, 3, 0

5

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet fill in oval

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

AN E RESPONSE WILL NOT BE SCORED.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● Ⓑ Ⓒ Ⓓ Ⓔ
E2.	 $180 - x$	y	Ⓐ Ⓑ ● Ⓓ Ⓔ
E3.	$p - q$	$q - p$	Ⓐ Ⓑ Ⓒ ● Ⓔ

Notes:

1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

	Column A	Column B
8.	$0.3 + 0.09$	$0.3 + 0.009$

$c = 0$

9.	$a(b + c)$	ab

There are 26 chairs arranged in rows so that the first row has 5 chairs and each successive row has one more chair than the row immediately preceding it.

10.	The number of rows of chairs	5
11.	An even number multiplied by 2	An odd number multiplied by 2

12.	The total number of triangles that can be named in the figure above	6

$r > s > t > 0$

13.	$r - t$	$s - t$

	Column A	Column B

$P = \{1, 3, 5, 6\}$
$Q = \{2, 4, 6, 7, 9\}$

14.	A number that is a member of set P but not of set Q	A number that is a member of both sets P and Q

$8t - 8 = 40$
$9u - 9 = 45$

15.	t	u

16.	The y-coordinate of point P	-4

$x^2 + kx + 12 = 0$
k is a positive integer.

17.	k	7

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

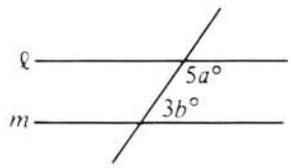

Answer: A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

AN E RESPONSE WILL NOT BE SCORED.

	Column A	Column B
	$6 \times 10^n = 3 \times 20 \times 100$	
18.	n	2

	Column A	Column B
	 P is the center of the circle.	
19.	$AD \times CD$	$BD \times BD$

	Column A	Column B
	The ratio of 3 to 6 equals the ratio of $\sqrt{x}$ to 4.	
20.	x	4

	Column A	Column B
	 Note: Figure not drawn to scale. $\ell \parallel m$	
21.	a	b

	Column A	Column B
22.	$\dfrac{1}{2 - \frac{7}{4}}$	$2 + \frac{7}{4}$

	Column A	Column B
	$-9 \leqq x \leqq -2$	
23.	The greatest possible value of $18x$	The least possible value of $4x$

	Column A	Column B
	$a > 0$	
24.	a^{100}	$a^{1,000}$

	Column A	Column B
		
25.	Area of the shaded triangle inside rectangle $PQRS$	15

	Column A	Column B
	The sum of the lengths of three sides of rectangle R is 18. One side of R has length 4.	
26.	Perimeter of R	22

	Column A	Column B
	$x + y = 3z$ $xyz \neq 0$	
27.	The average (arithmetic mean) of x, y, and z	$\frac{4z}{3}$

5

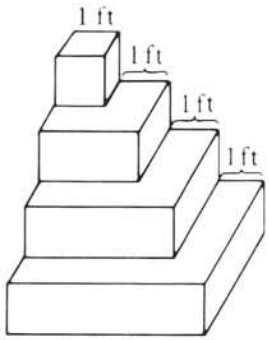

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

28. The weight of the tea in a box of 100 identical tea bags is 8 ounces. What is the weight, in ounces, of the tea in one bag?

(A) 0.04 (B) 0.08 (C) 0.125
(D) 0.8 (E) 1.25

29. If $\frac{1}{3x} = 9$, then $3x =$

(A) 27 (B) 3 (C) $\frac{1}{3}$ (D) $\frac{1}{9}$ (E) $\frac{1}{27}$

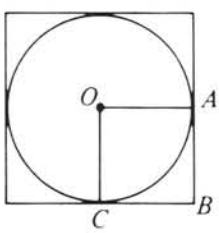

30. The figure above shows the dimensions of a pedestal constructed of 4 layers of marble. Each layer is 1 foot high and has a square base. How many cubic feet of marble make up the pedestal?

(A) 14 (B) 16 (C) 30 (D) 36 (E) 80

31. How many positive integers less than 30 are equal to 5 times an even integer?

(A) Two
(B) Three
(C) Four
(D) Five
(E) Six

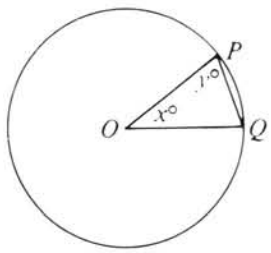

32. In the figure above, if the area of square $OABC$ is 2, what is the area of the circle with center O?

(A) $\frac{\pi}{4}$ (B) $\pi\sqrt{2}$ (C) 2π (D) 4π (E) 16π

33. One cup of vinegar and 1 cup of oil are added to 2 cups of an original vinegar-and-oil salad dressing. If the yield is 4 cups of dressing that is $\frac{1}{3}$ vinegar by volume, what fraction of the original dressing was vinegar?

(A) $\frac{1}{6}$
(B) $\frac{1}{3}$
(C) $\frac{1}{4}$
(D) $\frac{1}{2}$
(E) $\frac{2}{3}$

34. In the circle above with center O, if $0 < x < 40$, what are all possible values of y?

(A) $40 < y < 60$
(B) $50 < y < 70$
(C) $60 < y < 90$
(D) $70 < y < 90$
(E) $y > 70$

35. If $x = 5^y$ and $y = z + 1$, what is $\frac{x}{5}$ in terms of z?

(A) z
(B) $z + 1$
(C) 5^z
(D) $5^z + 1$
(E) 5^{z+1}

*Indicates four-choice questions. (All of the other questions are five-choice.)

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

$$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

  Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.
- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on page 118. Enter this figure on the worksheet.

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for *section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on page 118. Enter this figure on the worksheet.

SAT SCORING WORKSHEET

SAT-Verbal Sections

A. Section 1: _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal A

B. Section 4: _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw score (Rounded to nearest whole number) _____ D

E. SAT-verbal reported scaled score (See the conversion table on page 118.) [ ] SAT-verbal score

SAT-Mathematical Sections

A. Section 2: _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal A

B. Section 5: Questions 1 through 7 and 28 through 35 (5-choice) _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal B

C. Section 5: Questions 8 through 27 (4-choice) _____ (no. correct) − ⅓ (_____) (no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw score (Rounded to nearest whole number) _____ E

F. SAT-mathematical reported scaled score (See the conversion table on page 118.) [ ] SAT-math score
