SECTION 1 Time—30 minutes 45 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. LINK: (A) disturb (B) depart (C) disallow (D) disconnect (E) discredit

2. EQUILIBRIUM: (A) brevity (B) vulnerability (C) prominence (D) imbalance (E) angularity

3. ROBUST: (A) fortunate (B) opinionated (C) frail (D) crass (E) carefree

4. AFFIRMATION: (A) commonality (B) plurality (C) negation (D) transmission (E) concession

5. IMMACULATE: (A) obvious (B) stained (C) prolonged (D) meaningful (E) customary

6. FEASIBLE: (A) inexpensive (B) inconspicuous (C) unworkable (D) morally wrong (E) easily forgotten

7. LISTLESS: (A) rude (B) energetic (C) undesirable (D) decisive (E) uninformed

8. RECONCILIATION: (A) impetuosity (B) vigilance (C) initiation (D) foolishness (E) alienation

9. SCINTILLATING: (A) dull (B) moral (C) loud (D) exact (E) shaky

10. DIMINUTION: (A) agreement (B) hazard (C) construction (D) enlargement (E) brightness

11. STYMIE: (A) please (B) assist (C) purify (D) spare (E) engage

12. PRECURSOR: (A) descendant (B) supporter (C) beneficiary (D) subordinate (E) convert

13. PUERILE: (A) modest (B) definitive (C) mature (D) serene (E) private

14. DROSS: (A) gratitude (B) consistency (C) candor (D) valuable matter (E) current rate

15. FORSWEAR: (A) treat confidentially (B) embrace eagerly (C) handle carefully (D) think optimistically (E) wander aimlessly

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate
(C) sophisticated. .amateur (D) risqué. .crude
(E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

16. The supposedly ---- defenses on the country's eastern border became ---- when the enemy discovered the defenses could be avoided by an approach from the north.

(A) obsolete. .modern
(B) flexible. .impassable
(C) inexpensive. .vital
(D) impregnable. .worthless
(E) independent. .isolated

17. In the past, Black scientists and researchers received scant credit for their achievements, but today their contributions are more widely ----.

(A) inferred (B) acknowledged (C) elaborated
(D) standardized (E) envied

18. Fairly incompetent himself, he tended to favor those who were even less ---- than he was and who therefore were not ---- to him or his authority.

(A) capable. .a threat (B) efficient. .a boost
(C) qualified. .an asset (D) weak. .a danger
(E) inferior. .a risk

19. Even those who do not ---- Robinson's views ---- him as a candidate who has courageously refused to compromise his convictions.

(A) shrink from. .condemn
(B) concur with. .recognize
(C) profit from. .dismiss
(D) disagree with. .envision
(E) dissent from. .remember

20. After observing several vicious territorial fights, Jane Goodall had to revise her earlier opinion that these particular primates were always ---- animals.

(A) ignorant (B) inquisitive (C) responsive
(D) cruel (E) peaceful

21. Although his opinions are ----, his word is not gospel and his report will not be without its ----.

(A) valid. .adherents
(B) personal. .partisans
(C) respected. .critics
(D) familiar. .negotiators
(E) confusing. .misinterpreters

22. Traditional Native American storytellers acted as ---- of their tribes' repertory of tales and, as such, were especially valued for their ability to ---- material familiar to their audiences.

(A) gatherers. .invent
(B) detractors. .celebrate
(C) performers. .dramatize
(D) inheritors. .debase
(E) guardians. .corrupt

23. Although often victims of circumstance, the heroines of Shakespearean comedy tend to be ---- women, usually ready with a clever stratagem or verbal ploy for getting out of a difficult situation.

(A) imperious (B) suffering (C) excitable
(D) resourceful (E) precocious

24. The language of Anne Spencer's poetry conveys an impression of ---- that can be misleading: just when a poem seems to be echoing routine feelings, the diction suddenly sharpens to embody fresh and unexpected ideas.

(A) frivolity (B) triteness (C) diversity
(D) lyricism (E) precision

25. Our fear of being branded ---- if we do not unquestioningly accept new fashions forestalls dismissal of much recent art that is merely novel and momentarily ----.

(A) tolerant. .appealing
(B) contemporary. .interesting
(C) impulsive. .unsettling
(D) reactionary. .seductive
(E) insensitive. .defective

GO ON TO THE NEXT PAGE

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

Kangaroos are fascinating creatures because they differ so much from the usual notion of what constitutes a mammal. Kangaroos rear their young in a pouch and they hop. The explanation often given for these odd features is simply that kangaroos are marsupials and marsupials are primitive mammals. This is no answer, but reflects an impression that seems to have arisen, particularly among people who live in the Northern Hemisphere, from statements made about the Virginia opossum, the only marsupial in North America. The opossum is frequently described as an archaic primitive mammal, little changed since the time of dinosaurs. There is perhaps some basis for such statements: fossils of marsupials that coexisted with dinosaurs toward the end of the Mesozoic era, some 100 million years ago, have been classified as belonging to the same genus as that of the Virginia opossum. But even if the opossum can in some ways be considered a "living fossil," the same cannot be inferred for the kangaroo. These Australian marsupials of the Macropodidae (literally, "big feet") family represent a recent specialized adaptation to a changing environment. Macropodidae evolved from small forest-dwelling browsing animals into predominantly open-range grazing ones. Their rise was probably related to the spread of grassland in the interior of Australia in the Miocene epoch, between 10 and 15 million years ago.

There are indications that all mammals are descended from a mammal-like reptile that lived late in the Triassic period, more than 200 million years ago. Soon thereafter, about 180 million years ago, the stocks leading to two groups of mammals separated. One group was the prototherians, which consists of egg-laying monotremes such as the platypus. The other group was the therians, which includes the marsupial and the placental animals. Information from a variety of sources suggests the marsupials developed in North America and were the dominant therians there for most of the Cretaceous period, or until about 70 million years ago.

The placentals apparently developed initially in Asia and only reached North America late in the Cretaceous period, when there was no oceanic barrier betwen the two landmasses. Competition with the invading placentals has been suggested as the reason for the great marsupial extinction, but other causes may have been involved, since this was also the time when dinosaurs finally died out.

Tracing the evolution of the tiny insect-eating marsupials of the Cretaceous period in North America to the grasslands of Australia was aided by evidence supporting the theories of continental drift. They probably migrated via the Central American bridge to South America and from there to Australia when South America was linked to Australia by Antarctica. Whatever the form of the earliest Australian marsupials, by the start of the Miocene epoch, 25 million years ago, the process of differentiation had established their major groups. One of these groups was the Macropodidae.

26. The primary focus of the passage is on

(A) events characteristic of geological time periods
(B) evidence that marsupials coexisted with dinosaurs
(C) the evolutionary history of kangaroos
(D) the nonmammalian features of kangaroos
(E) the importance of placental fossils in geological research

27. According to the passage, which of the following events happened first?

(A) Marsupials of the same genus as the Virginia opossum coexisted with dinosaurs.
(B) The stocks leading to two groups of mammals separated.
(C) The Macropodidae evolved into open-range grazing animals.
(D) The marsupials were the dominant mammals in North America.
(E) South America, Australia, and Antarctica separated.

28. Based on information in the passage, kangaroos could be classified as

(A) insect-eating marsupials
(B) mammal-like monotremes
(C) monotreme prototherians
(D) marsupial prototherians
(E) marsupial therians

The reading passages in this test are brief excerpts or adaptations of excerpts from published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the text suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

29. Which of the following statements about the mammal-like reptile mentioned at the beginning of the second paragraph can be inferred from the information given in the passage?

(A) It was the dominant animal in the Triassic period.
(B) It was the ancestor of many other species.
(C) It was more similar to the therians than to the prototherians.
(D) It lived only in certain regions of North America.
(E) Its diet was similar to that of the Virginia opossum.

30. In developing the passage, the author does all of the following EXCEPT

(A) cite a specific source
(B) refute a mistaken notion
(C) define terms
(D) speculate about causes
(E) relate independent occurrences

GO ON TO THE NEXT PAGE

Tomás Rivera's book entitled . . .*and the earth did not part* is difficult to describe. It is not a novel in the conventional sense, but then neither is it a mere collection of stories and sketches. The book contains a set of twelve thematically unified stories—symbolic of the twelve months of the year—framed at the beginning by an introductory selection entitled "The Lost Year," and at the end by a summarizing selection entitled "Under the House." Preceding each of these pieces except "The Lost Year" is a brief anecdote, now directed backward (echoing or commenting on the thematic concerns of the preceding narrative), now pointed forward (prefacing the narrative that follows). Sometimes the anecdote does not relate directly either to what immediately precedes or to what follows, but instead echoes or reechoes values, motifs, themes, or judgments found elsewhere in the book. The effect is incremental. Through the reinforcement, variation, and amplification provided by the twelve stories and thirteen anecdotes, a picture of the community is gradually filled. In the summarizing selection, the entire experience is synthesized and brought to a thematic conclusion through the consciousness of the central character.

The central figure—presumably the author's alter ego—is the unnamed hero of the two frame pieces. Though it may be conjectured that this central figure is the same one who moves through some of the other selections in the book, direct and explicit identification of the characters in the stories with the central figure is of minor importance, for the overall impression created by the book is not of an individual but a group experience. The various persons of the stories, the experiences and the landscapes of these lives, belong unmistakably to the hero's past. The emphasis, however, remains on the general experience, communal and social rather than individual and personal. Even in the two frame selections at the beginning and end, the protagonist's voice is not that of an individual hero intent on discovering and expressing his own subjective reality, but that of a Mexican American in the significant process of discovering and embracing representatively his community's experience and culture. The end toward which the narrative is directed is one of social identity.

The hero of the frame pieces plays no explicitly active part in the book. He serves merely as the "rememberer," the central figure—however unrealized he may appear as a fully developed character—around whom Rivera weaves his thematic tapestry. At the beginning the hero is confused, alone, frightened, and disoriented. He is the one for whom the year is lost. The succeeding twelve stories and thirteen anecdotes compose his effort to reclaim a past. At the end of the book he has become the synthesizer and commentator, the one who discovers his "lost year."

31. The primary purpose of the passage is to

(A) summarize the plot of a novel
(B) describe the main characters in a book
(C) discuss the distinctive features of a literary work
(D) present the moral lesson learned by the hero of a novel
(E) compare and contrast different stories in a collection

32. The author of the passage is LEAST sure of which of the following?

(A) Whether the central character is seeking a social identity
(B) Whether the central character of the frame pieces appears in the other selections
(C) What state of mind the protagonist is in at the beginning of the novel
(D) Which society is being portrayed in the stories and anecdotes
(E) Why there are exactly twelve stories with common themes

33. According to the passage, the different anecdotes and stories in Rivera's work are unified by which of the following?

I. A shared theme
II. A temporal arrangement
III. The repetition and expansion of particular ideas

(A) I only (B) III only (C) I and II only
(D) II and III only (E) I, II, and III

34. As described in the passage, the function of the central character of the book is primarily to

(A) express the author's criticism of society and the modern world
(B) convey a uniquely personal view of a bewildering series of events
(C) interconnect the elements of the book by providing a thematic focus
(D) confirm the impression of despair established by other major characters
(E) balance the extreme views presented by the minor characters

GO ON TO THE NEXT PAGE

35. It can be inferred from the passage that Rivera's novel is best characterized as

(A) a representation of Mexican-American culture
(B) an insightful satire on American culture and politics
(C) a comic treatment of social issues affecting Mexican Americans
(D) a traditional literary work depicting radical social changes
(E) a book that appeals primarily to readers of mystery novels

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN:BOREDOM :: (A) dream:sleep (B) anger:madness (C) smile:amusement (D) face:expression (E) impatience:rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

36. GLAUCOMA : EYE :: (A) emphysema : lung (B) anemia : strength (C) obesity : weight (D) ventricle : heart (E) circulation : artery

37. CHARGE : BATTERY :: (A) melt : candle (B) wind up : clock (C) paddle : canoe (D) steer : wheel (E) turn on : switch

38. SHEEP : BLEAT :: (A) bear : den (B) fish : bait (C) whale : spout (D) horse : neigh (E) cow : grass

39. BRIDGE : GORGE :: (A) railing : balcony (B) tunnel : mountain (C) chimney : roof (D) stream : cavern (E) desert : quicksand

40. COURIER : MESSAGE :: (A) soldier : battle (B) student : knowledge (C) prophet : revelation (D) judge : law (E) athlete : prowess

41. QUIBBLE : OBJECT :: (A) boggle : decide (B) wail : cry (C) dawdle : hurry (D) exclaim : state (E) bicker : quarrel

42. DELECTABLE : FOOD :: (A) expensive : money (B) attractive : magnetism (C) delicate : health (D) distilled : water (E) engaging : personality

43. CARICATURE : FACE :: (A) amusement : formality (B) parody : poem (C) cartoon : politics (D) rhyme : verse (E) ridicule : clown

44. PARRY : BLOW :: (A) compile : evidence (B) mediate : dispute (C) instigate : argument (D) deflect : criticism (E) delineate : issue

45. MISNOMER : NAME :: (A) malcontent : person (B) malapropism : word (C) maze : network (D) euphemism : insult (E) stereotype : role

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION **2** Time—30 minutes 25 Questions

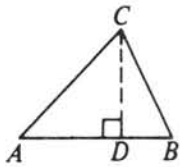

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \frac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. Jim's annual take-home pay is \$13,200. If this amount is paid in 12 equal monthly payments, how much does Jim receive each month?

(A) \$101
(B) \$110
(C) \$1,010
(D) \$1,100
(E) \$1,200

2. Which of the following CANNOT be written as the sum of two negative numbers?

(A) -4
(B) $-2\sqrt{2}$
(C) $-\frac{1}{2}$
(D) $-\frac{1}{8}$
(E) 2

3. Model A of a machine produces 300 parts per hour and model B produces 450 parts per hour. If a company has 3 model A machines and 1 model B machine, how many parts can the company produce in one hour?

(A) 750
(B) 900
(C) 1,350
(D) 1,650
(E) 2,250

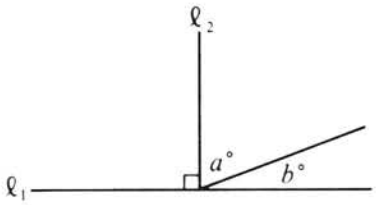

4. If the length of a side of a square is 0.25, what is the perimeter of the square?

(A) 0.0625
(B) 0.50
(C) 0.75
(D) 1.00
(E) 2.50

GO ON TO THE NEXT PAGE

5. If the price of a computer was decreased from \$1,000 to \$750, by what percent was the price decreased?

(A) 25%
(B) $33\frac{1}{3}\%$
(C) $66\frac{2}{3}\%$
(D) 75%
(E) 250%

Note: Figure not drawn to scale.

6. In the figure above, $\ell_1 \perp \ell_2$. Which of the following must be true?

I. $a = 70$
II. If $a = 70$, then $b = 20$.
III. If $b = 20$, then $a = 70$.

(A) I only
(B) II only
(C) III only
(D) II and III only
(E) I, II, and III

7. Pat has 1,114 pennies in a jar. What is the least number of pennies that Pat should remove so that she would be able to divide the remaining pennies equally among 3 of her friends?

(A) 0
(B) 1
(C) 2
(D) 3
(E) 4

8. If the sum of two consecutive odd integers is 24, what is their product?

(A) 48
(B) 130
(C) 143
(D) 156
(E) 195

9. In a recipe for sugar cookies, the ratio of flour to sugar is 3:2. If the recipe is doubled in order to make twice the number of cookies, the ratio of flour to sugar will be

(A) 3:1
(B) 2:1
(C) 3:2
(D) 1:1
(E) 3:4

10. Al has \$5. If the cost of pads of paper ranges from 60 cents to 90 cents per pad, what is the greatest number of pads that he can buy?

(A) 9
(B) 8
(C) 7
(D) 6
(E) 5

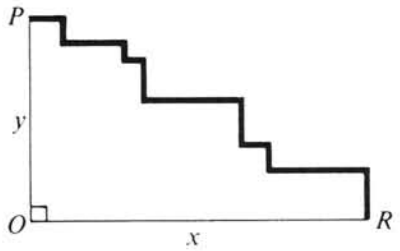

11. If the lengths of the sides of squares S and T are $\sqrt{5}$ and $\sqrt{7}$, respectively, then the area of T minus the area of S is

(A) $\sqrt{2}$
(B) 2
(C) 4
(D) 24
(E) 35

12. What is the average (arithmetic mean) of 3^2, 4^2, and 5^2?

(A) 12
(B) $12\frac{2}{3}$
(C) 16
(D) $16\frac{2}{3}$
(E) 25

GO ON TO THE NEXT PAGE

13. In the figure above, the heavy broken line from P to R is composed of line segments that are parallel either to OR or OP. If the length of OR is x and the length of OP is y, what is the total length of the heavy broken line from P to R?

(A) $\sqrt{x^2 + y^2}$
(B) $x + y$
(C) $2(x + y)$
(D) $x^2 + y^2$
(E) $(x + y)^2$

14. The sum of two integers is 72. If the integers are in a ratio of 3:5, what is the value of the greater integer?

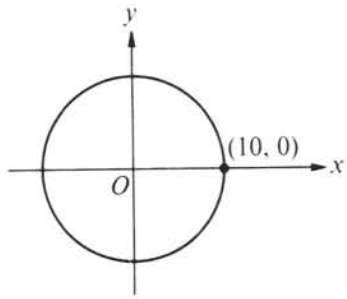

(A) 38
(B) 39
(C) 40
(D) 45
(E) 48

15. How many cubical blocks, each with edge of 4 centimeters, are needed to fill a rectangular box with inside dimensions 20 centimeters by 24 centimeters by 32 centimeters?

(A) 38
(B) 96
(C) 192
(D) 240
(E) 384

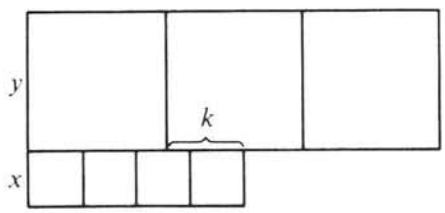

16. If $x - 3$ is 1 greater than y, then $x + 10$ is how much greater than y?

(A) 6
(B) 7
(C) 8
(D) 13
(E) 14

17. In the figure above, if O is the center of the circle, which of the following points lies outside the circle?

(A) $(-7, -8)$
(B) $(-7, 7)$
(C) $(8, -6)$
(D) $(8, 5)$
(E) $(9, 4)$

18. The figure above is made up of 4 squares with sides of length x and 3 squares with sides of length y. In terms of x and y, what does k equal?

(A) $4x - y$
(B) $2y - 4x$
(C) $3y - 2x$
(D) $3y - 3x$
(E) $3y - 4x$

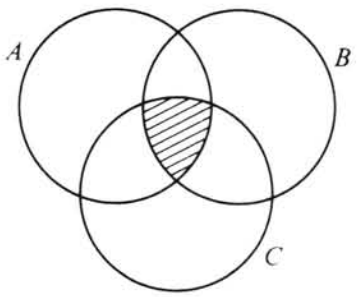

19. A train leaves the station at 11 a.m. traveling at the rate of 40 miles per hour. A faster train leaves the same station at 1 p.m. that afternoon and travels in the same direction on a parallel track at a rate of 60 miles per hour. At what time will the faster train overtake the slower one?

(A) 3 p.m.
(B) 4 p.m.
(C) 5 p.m.
(D) 6 p.m.
(E) 7 p.m.

GO ON TO THE NEXT PAGE

20. If x and y are integers greater than zero and $x + y = 12$, what is the least possible value of $x - y$?

(A) -12
(B) -11
(C) -10
(D) -1
(E) 0

21. In the figure above, circular region A represents the set of all numbers of the form $2m$, circular region B represents the set of all numbers of the form n^2, and circular region C represents the set of all numbers of the form 10^k, where m, n, and k are positive integers. Which of the following numbers belongs in the set represented by the shaded region?

(A) 2
(B) 4
(C) 10
(D) 25
(E) 100

22. Triangles ABC and ABD share side AB. Triangle ABC has area Q and triangle ABD has area R. If AD is longer than AC and BD is longer than BC, which of the following could be true?

I. $R > Q$
II. $R = Q$
III. $R < Q$

(A) I only
(B) III only
(C) I and II only
(D) I and III only
(E) I, II, and III

23. For any real number x, define $\boxed{x}$ as the least non-negative number such that $x + \boxed{x}$ is an integer. For example, $\boxed{2.8} = 0.2$, since $2.8 + 0.2 = 3$. What is the value of $0.4 - \boxed{0.4}$?

(A) -0.6
(B) -0.2
(C) 0
(D) 0.6
(E) 1

24. If n is a positive integer, then $(4^n)^2 =$

(A) 2^{4n}
(B) 2^{2n^2}
(C) 4^{n+2}
(D) 4^{n^2}
(E) $16n^2$

25. If $\frac{a^2 - 4}{(a - 2)^2} = b$ and $a \neq 2$, what is the value of a in terms of b?

(A) $\frac{2 + b}{2 - b}$

(B) $\frac{4}{b - 1}$

(C) $\frac{b + 2}{b - 2}$

(D) $2\sqrt{\frac{1 + b}{1 - b}}$

(E) $\frac{2 + 2b}{b - 1}$

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 4 Time—30 minutes 40 Questions

For each question in this section, choose the best answer and fill in the corresponding oval on the answer sheet.

Each question below consists of a word in capital letters, followed by five lettered words or phrases. Choose the word or phrase that is most nearly opposite in meaning to the word in capital letters. Since some of the questions require you to distinguish fine shades of meaning, consider all the choices before deciding which is best.

Example:

GOOD: (A) sour (B) bad (C) red (D) hot (E) ugly

Ⓐ ● Ⓒ Ⓓ Ⓔ

1. EVACUATE: (A) compel (B) fill (C) delay (D) fix (E) tighten

2. WATERY: (A) agitated (B) polluted (C) filtered (D) thick (E) warm

3. ROUSE: (A) succeed (B) discover (C) dry off (D) place together (E) lull to sleep

4. COMPREHENSIVE: (A) restorative (B) adaptable (C) apprehensive (D) narrowly focused (E) rigidly enforced

5. UNKEMPT: (A) neat (B) slim (C) creative (D) sociable (E) generous

6. JAUNTY: (A) depressed (B) natural (C) unpopular (D) distorted (E) satiated

7. APPEND: (A) deny (B) damage (C) delete (D) straighten (E) solidify

8. REPLETE: (A) self-evident (B) ill-provided (C) irregularly shaped (D) awkwardly placed (E) carefully restored

9. CARP: (A) ponder (B) destroy (C) treat seriously (D) accomplish without effort (E) accept without complaint

10. PENURY: (A) symmetry (B) frequency (C) wealth (D) honor (E) innocence

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five lettered words or sets of words. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Although its publicity has been ----, the film itself is intelligent, well-acted, handsomely produced, and altogether ----.

(A) tasteless. .respectable (B) extensive. .moderate (C) sophisticated. .amateur (D) risqué. .crude (E) perfect. .spectacular

● Ⓑ Ⓒ Ⓓ Ⓔ

11. His frequent stage appearances during those few years, though they brought him more ----, hardly added to his ---- as an actor.

(A) fame. .development
(B) money. .activity
(C) admirers. .popularity
(D) joy. .years
(E) regret. .responsibility

12. Contemporary novelist Alice Walker is quite the opposite of ----; through the ability of her heroines to rise above tragic setbacks, she expresses the belief that people can take charge of their destinies.

(A) an optimist (B) an idealist (C) a moralizer (D) a fatalist (E) a competitor

13. The world, accustomed to ---- whenever governments change hands, expected rioting and bloodshed; but the transition of power was remarkably ----.

(A) turmoil. .chaotic
(B) harmony. .orderly
(C) ceremony. .solemn
(D) violence. .uneventful
(E) splendor. .unpopular

GO ON TO THE NEXT PAGE

14. Researchers studying dieters conclude that exercise should be an ---- to any decrease in calorie intake, noting that efforts to lose weight without regular physical activity are usually ----.

(A) alternative. .sustained
(B) equivalent. .misguided
(C) incentive. .notable
(D) adjunct. .doomed
(E) impediment. .detrimental

15. Most doctors say that to deny the ---- link between cigarette smoking and lung disease is to make a mockery of the statistical evidence that so clearly ---- the connection.

(A) significant. .undermines
(B) causal. .demonstrates
(C) meager. .refutes
(D) questionable. .acknowledges
(E) residual. .suppresses

Each question below consists of a related pair of words or phrases, followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to that expressed in the original pair.

Example:

YAWN:BOREDOM :: (A) dream:sleep
(B) anger:madness (C) smile:amusement
(D) face:expression (E) impatience:rebellion

Ⓐ Ⓑ ● Ⓓ Ⓔ

16. SLINGSHOT : STONE :: (A) pistol : trigger
(B) missile : rocket (C) bow : arrow
(D) firecracker : fuse (E) knife : blade

17. COMPASS : DIRECTION :: (A) tent : shelter
(B) scale : weight (C) watch : dial
(D) thunder : noise (E) camera : film

18. RIND : LEMON :: (A) shell : egg
(B) slice : bread (C) pit : seed
(D) tree : apple (E) cream : milk

19. CHOIR : SING :: (A) herd : stampede
(B) class : instruct (C) court : testify
(D) team : cheer (E) troupe : act

20. PRESUME : ASCERTAIN :: (A) garble : express
(B) help : rescue (C) theorize : prove
(D) propel : halt (E) idealize : believe

21. PURSE : LIPS :: (A) bend : knee
(B) knit : brow (C) grimace : eye
(D) speak : tongue (E) stretch : neck

22. IDOLATRY : ADMIRATION ::
(A) absurdity : enjoyment
(B) thanklessness : patronage
(C) exasperation : annoyance
(D) intimacy : solitude
(E) eccentricity : conformity

23. NECROMANCY : SORCERER ::
(A) boredom : sophisticate
(B) ambition : politician
(C) legislation : governor
(D) verdict : jury
(E) quackery : charlatan

24. HAIRDRESSER : COIFFURE ::
(A) model : photograph
(B) tailor : garment
(C) beautician : cosmetology
(D) pharmacist : illness
(E) artist : studio

25. MAGNATE : POWER ::
(A) novice : youth (B) miser : generosity
(C) paragon : excellence (D) sentry : protection
(E) student : knowledge

Each passage below is followed by questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

Carruthers was an artist. He was also a clerk in the Foreign Office. His reputation as a writer was distinguished; he was not interested in the vulgar, and to sell well would possibly have damaged his career. I could not surmise what had induced him to invite me to have coffee with him. It is true he was alone, but I should have supposed he found his thoughts excellent company, and I could not believe he imagined that I had anything to say that would interest him. Nevertheless I could not but see that he was doing his dreary best to be affable. We talked for a moment of common friends in London. Our conversation did not go easily and I made up my mind that as soon as I civilly could I would leave. Presently I had an odd sensation that he was conscious of this and was desperately anxious not to give me the opportunity. I was surprised. I noticed that whenever I paused he broke in with a new topic. He was trying to find something to interest me so that I should stay. He was straining every nerve to be agreeable. Surely he could not be lonely; he must know plenty of people with whom he could have spent the evening. He talked with a sort of harsh eagerness as though he were afraid of a moment's silence. It was very strange. Though I did not like him, though he meant nothing to me and to be with him irked me somewhat, I was against my will a trifle interested.

Line (5) (10) (15) (20) (25)

26. Which of the following best characterizes the existing relationship between Carruthers and the narrator?

(A) Close friends
(B) Former colleagues
(C) Distant relatives
(D) Casual acquaintances
(E) Political opponents

27. The "opportunity" mentioned in line 16 is best interpreted as the opportunity for

(A) the narrator to respond to Carruthers
(B) the narrator to depart from Carruthers' presence
(C) the narrator to change the topic of conversation
(D) Carruthers to confess his problems to the narrator
(E) Carruthers to change the topic of the conversation

28. The primary purpose of the passage is to

(A) relate an incident
(B) explain a custom
(C) refuse an invitation
(D) transcribe a conversation
(E) evaluate a career

GO ON TO THE NEXT PAGE

Imagine a portion of space far removed from all appreciable masses. Next, imagine in this portion of space a large closed chest resembling a room with a man inside. Gravitation naturally does not exist for this person; upon slightest impact with the floor, he moves toward the ceiling. On the outside of the lid of the chest is a hook with rope attached. Now imagine that a "being" begins to pull on this rope with constant force; the chest moves "upward" with a uniformly accelerated motion.

But how does the person in the chest regard the process? In the accelerated frame of reference of the chest, he is suddenly standing exactly as anyone stands on Earth. When he releases an object from his hand, it approaches the floor with an accelerated relative motion. He will further ascertain that, whatever kind of object he experiments with, its acceleration toward the floor is always of the same magnitude. Relying on his knowledge of gravity, the man concludes that he and the chest are now within the influence of a constant gravitational field.

Ought we to smile and say that this person errs in his conclusion? We must rather admit that his interpretation violates neither reason nor known mechanical laws. Even though the chest is being accelerated, we can nevertheless regard it as being at rest. This hypothetical case thus suggests for us the validity of the principle that a gravitational field can be equivalent in every respect to an accelerated frame of reference in which gravity is absent.

29. The primary purpose of the passage is to

(A) discuss a complex problem and its solution
(B) present a new theory and suggest several ways of testing it
(C) give background information on recent discoveries
(D) provide a basis for choosing between two hypotheses
(E) illustrate the validity of a general principle

30. The author's attitude toward the reasoning displayed by the person inside the chest is best described as one of

(A) sympathetic understanding
(B) reluctant acceptance
(C) apologetic embarrassment
(D) cynical skepticism
(E) amused dismissal

31. Which of the following best describes the method by which the author develops the passage?

(A) Generalization followed by support
(B) Argument followed by rebuttal
(C) Statement of fact followed by theories and laws
(D) Controversial proposal followed by debate
(E) Extended example followed by thesis

GO ON TO THE NEXT PAGE

The form of rural England as it is today is largely the result of an agricultural revolution that took place between about 1760 and 1815. The central point of this critical period was the enclosure of the open fields traditionally used by each village. The changes have a poignant interest because, in the early nineteenth century, disaster fell upon the English village. How much was this disaster a result of the agricultural revolution? Controversy raged round the question of enclosures in the eighteenth century and rages round it still, controversy that has obscured as well as illuminated the issue of enclosures. In the past, the controversy became acute in times of dearth and distress, and those involved in the dispute were apt to put the blame for hard times on everything they disliked: enclosures, rich farmers, dealers in grain, speculators, the consumption of tea, and luxury—the last being a vague and question-begging term.

In the eighteenth century, the controversy over enclosures was confused by a belief that the population was shrinking rapidly, although it was actually increasing faster than ever before. Two things gave rise to the belief: first, a fall in the number of deaths (due really to the fall in the death rate) and, second, a decline in the exportation of grain. About 1773 England ceased to be a grain-exporting country on a large scale. This development was really a result of the increased consumption of a larger population and of an enormous increase in the number of horses used to provide improved transport. But the decline in deaths and in grain exports was attributed, at the time, to "depopulation and luxury," and it was argued that this (imaginary) decline in the population and food supply was brought about by enclosures. As usual there were the exceptional cases that could be cited in support of an unsound generalization. The well-known line in Goldsmith's *The Deserted Village*, "Where wealth accumulates and men decay," sums up the contentions of a number of dreary pamphlets. But though in most cases the population of villages increased after enclosures, as the food supply certainly did, the number of farms often decreased.

Although the enclosures of the sixteenth and early seventeenth centuries had been for sheepfarming and the production of wool and did definitely lead to depopulation of villages, the enclosures of the eighteenth century were for improved agriculture. Mixed farming and an advanced rotation system resulted in crops that provided food for stock and more stock produced manure for more and better crops. Moreover, with the new Norfolk rotation and turnip cultivation, sandy wastes were turned into rich arable land. These innovations brought about a revolution in agriculture.

32. The passage can best be described as an

(A) explanation of the political climate that provoked enclosure in England
(B) explanation of incorrect assumptions about the effects of enclosures
(C) inquiry about a particularly bad time of famine in England
(D) analysis of England's falling population rate
(E) analysis of the effects of methods of farming on agricultural exports

33. Which of the following best describes the author's attitude toward "those involved in the dispute" (lines 13-14)?

(A) Admiration of their persistent search for the truth
(B) Compassion for the seriousness of their plight
(C) Confusion in assessing the value of their beliefs
(D) Criticism of their simple view of a complex situation
(E) Rage at the disorder they caused in their own time

34. The author believes that enclosures made at which of the following times led to depopulation of villages in England?

I. The sixteenth century
II. The early seventeenth century
III. The eighteenth century

(A) I only
(B) III only
(C) I and II only
(D) II and III only
(E) I, II, and III

35. The author cites a line from Goldsmith's *The Deserted Village* to illustrate

(A) a theory similar to that held by the author
(B) a popular unfounded conclusion held in eighteenth-century England
(C) an exception to the statements made by most eighteenth-century writers
(D) the views of many modern historians about eighteenth-century England
(E) the influence of Goldsmith's writing on opinions in eighteenth-century England

36. It can be inferred from the passage that one effect of the Norfolk rotation was

(A) an increase in agricultural production
(B) an increase in grain exports
(C) a decrease in population
(D) a decrease in livestock
(E) a decrease in food consumption in England

GO ON TO THE NEXT PAGE

It is perhaps ironic that in today's hypertechnological climate there flourish, if only fleetingly, "theories" or "systems" that pretend to scientific status. Cynics argue
Line that people are free to lavish money on anything they
(5) wish, and laugh at books about out-of-body travel, astrological predictions generated by computers, and diets purporting to double the human lifespan. It is unfortunate, however, when people substitute sham remedies for effective medical or psychiatric treatment. Also
(10) regrettable is the ignorance pseudoscientific fads abet: a benighted public may fall prey to spurious doctrines promoted by political forces that exploit credulity.

The best way to counter pseudoscience is to distinguish between authentic research and humbug. Two
(15) criteria apply. One is a scale of the degree to which a theory has been confirmed. At one end of the scale are theories almost certainly false, like the view that an embryo retains in its memory conversations its mother has held. Toward the middle are theories advanced as
(20) working hypotheses, like current efforts to describe the ultimate composition of atomic particles. At the other end are theories almost certainly true, like the belief that the Earth is a slightly compressed sphere.

The second criterion is a scale of personal compe-
(25) tence, ranging from brilliant professionalism to gross ineptitude. That there are scientists of debatable competence ought not to obscure the fact that certain self-styled scientists are cranks. The label "crank" is justified neither by the novelty of the cranks' views nor by the
(30) neurotic motivation behind their theories, but by the failure of those theories to meet the standards by which all theories are judged. Whoever maintains views that contradict all available evidence and offer no reason for serious consideration is rightly exposed and dismissed.

37. The passage as a whole constitutes

(A) a demolition of certain dearly held popular misconceptions
(B) an attempt to criticize the standards scientists use to judge theories
(C) a personal attack on well-known purveyors of groundless claims
(D) an analysis of the methods by which frauds deceive people
(E) an admonition concerning false notions masquerading as science

38. The comment in line 30 about "neurotic motivation" suggests that, in the author's view, such motivation

(A) is as common among reputable scientists as it is among cranks
(B) is not a pertinent criterion for determining what is pseudoscience
(C) is too complex for even modern psychiatry to illuminate
(D) might remain hidden even from a crank's closest colleagues
(E) may be a stimulus to creative individuals in nonscientific fields

39. The author's attitude toward pseudoscience is a mixture of

(A) concern and disapproval
(B) scorn and despair
(C) vindication and amusement
(D) confusion and revulsion
(E) puzzlement and insolence

40. The author does all of the following in considering pseudoscience EXCEPT

(A) provide common examples of it
(B) allude to its dangerous consequences
(C) grant it a limited usefulness
(D) compare it to authentic science
(E) suggest methods for discerning it

IF YOU FINISH BEFORE TIME IS CALLED, YOU MAY CHECK YOUR WORK ON THIS SECTION ONLY. DO NOT TURN TO ANY OTHER SECTION IN THE TEST. **STOP**

SECTION 5 Time—30 minutes 35 Questions

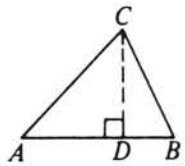

In this section solve each problem, using any available space on the page for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

The following information is for your reference in solving some of the problems.

Circle of radius r: Area $= \pi r^2$; Circumference $= 2\pi r$
The number of degrees of arc in a circle is 360.
The measure in degrees of a straight angle is 180.

Definition of symbols:

$=$ is equal to	$\leqq$ is less than or equal to
$\neq$ is unequal to	$\geqq$ is greater than or equal to
$<$ is less than	$\parallel$ is parallel to
$>$ is greater than	$\perp$ is perpendicular to

Triangle: The sum of the measures in degrees of the angles of a triangle is 180.

If $\angle CDA$ is a right angle, then

(1) area of $\triangle ABC = \dfrac{AB \times CD}{2}$

(2) $AC^2 = AD^2 + DC^2$

Note: Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that its figure is not drawn to scale. All figures lie in a plane unless otherwise indicated. All numbers used are real numbers.

1. If $x + 3x + 5x = -9$, then $x =$

(A) -1

(B) $-\frac{1}{9}$

(C) 0

(D) $\frac{1}{9}$

(E) 81

2. If the following numbers were graphed on a number line, which would be closest to zero?

(A) $-\frac{16}{3}$

(B) $\frac{7}{2}$

(C) 5

(D) -3

(E) $\frac{11}{2}$

3. If $\frac{a}{b} = 4$, $\frac{b}{c} = 5$, and $c = 2$, what is the value of a?

(A) $\frac{5}{4}$

(B) $\frac{5}{2}$

(C) 10

(D) 20

(E) 40

4. The average (arithmetic mean) of three numbers is 7. If the sum of two of the numbers is 16, then the third number is

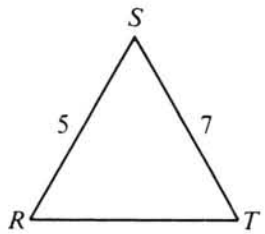

(A) 4
(B) 5
(C) 6
(D) 7
(E) 8

GO ON TO THE NEXT PAGE

5

5. $a \cdot 3 \cdot b^2 \cdot \frac{1}{2} =$

(A) a^3b
(B) $1.5ab^2$
(C) $1.5a^2b^2$
(D) $3ab$
(E) $6ab^2$

Note: Figure not drawn to scale.

6. If the perimeter of $\triangle RST$ above is 3 times the length of RS, then $RT =$

(A) 3
(B) 5
(C) 8
(D) 9
(E) 10

7. Let the symbol (x) represent the number of different pairs of positive integers whose product is x. For example, $(16) = 3$, since there are 3 different pairs of positive integers whose product is 16:

16×1, 8×2, and 4×4.

What does (36) equal?

(A) 5
(B) 6
(C) 8
(D) 10
(E) 12

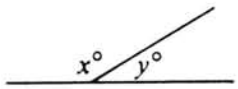

GO ON TO THE NEXT PAGE

Questions 8-27 each consist of two quantities, one in Column A and one in Column B. You are to compare the two quantities and on the answer sheet fill in oval

A if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

AN E RESPONSE WILL NOT BE SCORED.

EXAMPLES

	Column A	Column B	Answers
E1.	2×6	$2 + 6$	● Ⓑ Ⓒ Ⓓ Ⓔ
E2.	 $180 - x$	y	Ⓐ Ⓑ ● Ⓓ Ⓔ
E3.	$p - q$	$q - p$	Ⓐ Ⓑ Ⓒ ● Ⓔ

Notes:

1. In certain questions, information concerning one or both of the quantities to be compared is centered above the two columns.
2. In a given question, a symbol that appears in both columns represents the same thing in Column A as it does in Column B.
3. Letters such as x, n, and k stand for real numbers.

	Column A	Column B
8.	$\frac{3}{4} + \frac{1}{3}$	$\frac{4}{7}$

$$\begin{array}{r} P15 \\ \times\ Q5 \\ \hline 2075 \\ 2490 \\ \hline 26{,}975 \end{array}$$

P and Q represent digits in the correctly solved multiplication problem above.

	Column A	Column B
9.	P	Q

$$\frac{4}{6} = \frac{a}{9}$$

$$\frac{3}{12} = \frac{b}{12}$$

	Column A	Column B
10.	a	b

	Column A	Column B
11.	Percent of increase when a \$10.00 price is increased by \$1.00	Percent of increase when a \$15.00 price is increased by \$1.50

$$x + 2y = 6 \text{ and } 5y = 10$$

	Column A	Column B
12.	x	y

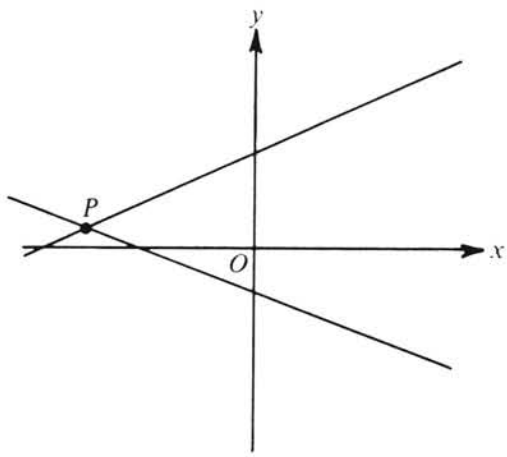

$$3 < x < 7$$
$$2 < y < 6$$

	Column A	Column B
13.	$x - y$	5

	Column A	Column B
14.	$0 \cdot 1 \cdot 2 \cdot 3 \cdot 4 \cdot 5 \cdot 6$	$0 \cdot 1 \cdot 2 \cdot 3 \cdot 4 \cdot 5 \cdot 6 \cdot 7$

x is one less than a multiple of 4.
y is a prime number.

	Column A	Column B
15.	x	y

	Column A	Column B
16.	The x-coordinate of point P	The y-coordinate of point P

5

SUMMARY DIRECTIONS FOR COMPARISON QUESTIONS

Answer: **A** if the quantity in Column A is greater;
B if the quantity in Column B is greater;
C if the two quantities are equal;
D if the relationship cannot be determined from the information given.

AN E RESPONSE WILL NOT BE SCORED.

	Column A	Column B
17.	 180	$x + y$
18.	The cost per orange, if a 4-pound bag of oranges costs \$1.59	\$0.16
	$x > y > 0$	
19.	$\frac{2y + x}{2}$	$y + x$
	$ab \neq 0$	
20.	a^2b^2	$(-ab)^2$
	$y^2 = x$ $y > 0$	
21.	x	1
22.	 x	45

	Column A	Column B
	Charles and David live the same walking distance from school. It took Charles and David 20 minutes and 15 minutes, respectively, to walk directly from home to school without stopping.	
23.	Average number of kilometers per hour at which Charles walked	Average number of kilometers per hour at which David walked
	 $x > 90$ $\ell_1 \parallel \ell_2$	
24.	a	b
25.	Sum of all integers from -5 to 25 inclusive	Sum of all integers from 6 to 25 inclusive
	$y \neq 0$	
26.	$y + y^2$	$y^2 - y$
	x is the circumference of circle O. y is the diameter of circle O.	
27.	x	$3y$

Solve each of the remaining problems in this section using any available space for scratchwork. Then decide which is the best of the choices given and fill in the corresponding oval on the answer sheet.

28. If on a certain day there were only 28 of 32 students present for a gym class, what percent of the class was absent?

(A) 4%
(B) 12.5%
(C) 25%
(D) 28%
(E) 87.5%

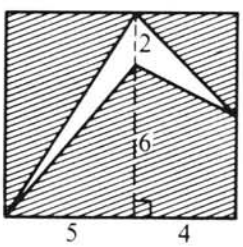

29. If neither a nor b is an integer, which of the following could be an integer?

I. $\frac{a}{b}$

II. $a \cdot b$

III. $\sqrt{a + b}$

(A) None
(B) I only
(C) II only
(D) I and II only
(E) I, II, and III

30. In the rectangle above, what is the area of the unshaded region?

(A) 36
(B) 27
(C) 18
(D) 12
(E) 9

31. If $\frac{v}{w} + \frac{x}{y} = z$, $v = 3x$, and $w = 2y$, what is the value of $\frac{2z}{5}$ in terms of x and y?

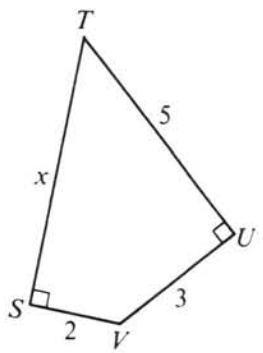

(A) $\frac{2x}{3y}$

(B) $\frac{2y}{3x}$

(C) $\frac{x}{y}$

(D) $\frac{y}{x}$

(E) $\frac{5x}{2y}$

32. In the figure above, x =

(A) 7

(B) 6

(C) $4\sqrt{2}$

(D) $\sqrt{30}$

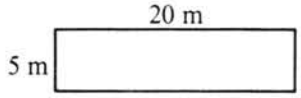

(E) $\sqrt{34} - \sqrt{2}$

GO ON TO THE NEXT PAGE

5

33. The radius of a unicycle wheel is 1 foot. When the unicycle travels continuously in one direction f... 500 feet, the wheel makes v revolutions. Of the following, which is the best approximation of v ?

(A) 80
(B) 160
(C) 310
(D) 3,140
(E) 6,280

34. The rectangle above is a diagram of the fencing surrounding an animal pen 20 meters by 5 meters. If an additional 4 square meters is to be enclosed by moving just one side of the pen, while retaining its rectangular shape, what is the least possible number of meters of additional fencing needed?

(A) 2.0
(B) 1.6
(C) 1.0
(D) 0.8
(E) 0.4

35. Let P be the product of the first 10 positive integers. If $\frac{P}{10^x}$ is an integer, what is the maximum possible value of x ?

(A) 1
(B) 2
(C) 4
(D) 5
(E) 10

*Indicates four-choice questions. (All of the other questions are five-choice.)

The Scoring Process

Machine-scoring is done in three steps:

- *Scanning.* Your answer sheet is "read" by a scanning machine and the oval you filled in for each question is recorded on a computer tape.
- *Scoring.* The computer compares the oval filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not count toward your score. For each wrong answer, a fraction of a point is subtracted to correct for random guessing. For questions with five answer choices, one-fourth of a point is subtracted for each wrong response; for questions with four answer choices, one-third of a point is subtracted for each wrong response. The SAT-verbal test has 85 questions with five answer choices each. If, for example, a student has 44 right, 32 wrong, and 9 omitted, the resulting raw score is determined as follows:

$$44 \text{ right} - \frac{32 \text{ wrong}}{4} = 44 - 8 = 36 \text{ raw score points}$$

Obtaining raw scores frequently involves the rounding of fractional numbers to the nearest whole number. For example, a raw score of 36.25 is rounded to 36, the nearest whole number. A raw score of 36.50 is rounded upward to 37.

- *Converting to reported scaled score.* Raw test scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different editions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the edition of the test taken nor by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT-verbal score of 400 on a test taken at one administration indicates the same level of developed verbal ability as a 400 score obtained on a different edition of the test taken at another time.

How to Score the Test

SAT-Verbal Sections 1 and 4

Step A: Count the number of correct answers for *section 1* and record the number in the space provided on the worksheet on the next page. Then do the same for the incorrect answers. (Do not count omitted answers.) To determine subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for *section 4* and record the numbers in the spaces provided on the worksheet. To determine subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: To obtain C, add subtotal A to subtotal B, keeping any decimals. Enter the resulting figure on the worksheet.

Step D: To obtain D, your raw verbal score, round C to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step E: To find your reported SAT-verbal score, look up the total raw verbal score you obtained in step D in the conversion table on page 224. Enter this figure on the worksheet.

SAT-Mathematical Sections 2 and 5

Step A: Count the number of correct answers and the number of incorrect answers for *section 2* and record the numbers in the spaces provided on the worksheet. To determine the subtotal A, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal A}$$

Step B: Count the number of correct answers and the number of incorrect answers for the *five-choice questions (questions 1 through 7 and 28 through 35) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal B, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{4} = \text{subtotal B}$$

Step C: Count the number of correct answers and the number of incorrect answers for the *four-choice questions (questions 8 through 27) in section 5* and record the numbers in the spaces provided on the worksheet. To determine the subtotal C, use the formula:

$$\text{number correct} - \frac{\text{number incorrect}}{3} = \text{subtotal C}$$

Step D: To obtain D, add subtotal A, subtotal B, and subtotal C, keeping any decimals. Enter the resulting figure on the worksheet.

Step E: To obtain E, your raw mathematical score, round D to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the worksheet.

Step F: To find your reported SAT-mathematical score, look up the total raw mathematical score you obtained in E in the conversion table on page 224. Enter this figure on the worksheet.

SAT SCORING WORKSHEET

FORM CODE 7A

SAT-Verbal Sections

A. Section 1: _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal A

B. Section 4: _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal B

C. Total unrounded raw score (Total A + B) _____ C

D. Total rounded raw score (Rounded to nearest whole number) _____ D

E. SAT-verbal reported scaled score (See the conversion table on page 224.) [ ] SAT-verbal score

SAT-Mathematical Sections

A. Section 2: _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal A

B. Section 5: Questions 1 through 7 and 28 through 35 (5-choice) _____ (no. correct) − ¼ (_____) (no. incorrect) = _____ subtotal B

C. Section 5: Questions 8 through 27 (4-choice) _____ (no. correct) − ⅓ (_____) (no. incorrect) = _____ subtotal C

D. Total unrounded raw score (Total A + B + C) _____ D

E. Total rounded raw score (Rounded to nearest whole number) _____ E

F. SAT-mathematical reported scaled score (See the conversion table on page 224.) [ ] SAT-math score
